It seems to us very fitting that the professor at the college should give the students the benefit of his observations of the North star. That luminous body has been the professor's guiding star for so many months and he doubtless speaks as one having authority—the only question arising is as to the completeness of the report, as it has been hinted that the expeditions made in that direction were those of conquest as well as discovery.

A gentleman whose name we did not learn, got caught in a tight place Friday evening. He came into town from the east on Third St. When he reached the railroad track, a headlight of a locomotive standing at the water tank was shedding its light on the track and the man took it for a street and started down it. When he had gone about half way to Second St. he noticed his mistake, and endeavored to leave the track, but in going up the embankment on the west side upset his vehicle. The train men helped him right things and he went on his way rejoicing, worse scared than hurt.—Transcript.

A stranger who came into town during the week, being a recent arrival from the East, asked a Record man where men's, children's and ladies' shoes and boots and a dress suit and hat and ordinary furnishings could be procured. The Record man replied by handing him a late copy of the Record. After carefully perusing its advertising columns he drove out of town with a look of disgust on his face.—North Yamhill Record.

The moral to the above needs no sign-board.

For many years she was a resident of this city, where she was honored and respected by all.—Transcript.

Mr. and Mrs. Rasmus Hanson, of Michigan, old time friends of Mr. and Mrs. N. E. Britt, were here the first of the week visiting. Several years ago Mr. Britt was in the employ of Mr. Hanson in the great lumbering regions of Michigan where an attachment was formed which still exists. Mr. Hanson has large interests in the Michigan forests and is also interested in the best sugar business to some extent. He is taking a look at some of the timbered lands belonging to the Southern Pacific, in company with Mr. Britt, and will probably make an investment before he returns home. He thinks this is a magnificent country.

The population of Newberg made a decided gain the first of the week when six families named Perkins, Tobey, Emerson, Graff, Johnson and Hawley, respectively, and numbering thirty-two people arrived from Minnesota. They are scattered out among the Emmersons the Bigelows and other Minnesota friends here for the present but they are here with a view of locating and will invest in property if they find what they want at satisfactory prices. They are all farmers and are reported to be in fair circumstances. They will find that it rains more here during the winter season than they have been accustomed to seeing in Minnesota but if they will not be too hasty in forming opinions they will like it all right.

Smokers of cigarettes seem to forget that the odor from these vile things is very offensive to ladies as well as to a great many men. A little consideration from this class of individuals when they are in public places would be very much appreciated by a long suffering public. The scent from the clothing worn by a cigarette fiend is bad enough at all times without giving a double dose direct from the fountain.

It will not be a surprise to any who are at all familiar with the good qualities of Chamberlain's Cough Remedy, to know that people everywhere take pleasure in relating their experience in the use of that splendid medicine and in telling of the benefit they have received from it, of bad colds it has cured, of threatened attacks of pneumonia it has averted and of the children it has saved from attacks of croup and whooping cough. It is a good time now to make a survey of our streets and note the contrast between those where shade trees have been planted, as they shed their harvest of golden colored leaves, and streets where tree planting has been neglected. For years the Graphic has encouraged the planting of shade trees along the streets of Newberg and many fine trees may be seen about town, but there is a great deal of missionary work yet to be done along this line. Remember that this is a good season of the year for tree planting and don't put it off another year.

Wm. Manning has a letter in his possession which he prizes very highly. It is one which he mailed at the Newberg postoffice last August, addressed to his son who is a soldier in the Philippines. In the Japan Sea the vessel was wrecked and the letter went to the bottom of the sea along with two hundred sacks of fish all the same as M'Ginty. It was fished out and sent to its destination in pretty good shape and it is now back with the writer, being held for his son, after having traveled some twenty thousand miles besides having some of the experiences of the old man Jonah. It still bears the Newberg postmark plainly, a fact which the department at Washington ought to know, as "legible postmarking" is being insisted on from that office.

The ordinary Halloween pranks are laughed at and made the most of in a good-natured way by most people but there are often a few youngsters in the neighborhood who lose their heads, go to extremes and don't know where to draw the line between innocent fun and doing things that are a reproach to civilization. The lowest down, mean trick the Graphic has heard of this time was played on J. H. Bowerman, a man who has been afflicted with paralysis for several months and is now only able to hobble about with the aid of a stick. His wagon was taken apart, the pieces scattered over the place and other damage done, such as would annoy a well man. If the fellows who perpetrated this savagery on a man who is tottering on the verge of the grave are not heartily ashamed of their actions before this they are built on a very low scale to say the least.

After Shortness.

N. C. Maris, the well known Short-horn expert, started East Tuesday morning for the purpose of adding prize winning to the champion herd of Oscar Minor. He is instructed to travel the United States over and purchase regardless of expense a carload. While Mr. Minor feels from the result of his circuit and prize-winning this year that he is in the lead, he is determined to exert himself to remain there. It is by no means a spirit of jealousy that prompts this effort on Mr. Minor's part, but an honest endeavor to better the grade of Eastern Oregon cattle. Mr. Maris' first destination is Kansas City, and from there will visit Missouri, Illinois, Ohio and Indiana.—Heppner Gazette.
