

Facts For Sick Women

First—the medicine that holds the record for the largest number of absolute cures of female illness is Lydia E. Pinkham's Vegetable Compound.

Second—Mrs. Pinkham can show by her letter files in Lynn that a million women have been restored to health by her medicine and advice.

Third—All letters to Mrs. Pinkham are received, opened, read and answered by women only. This fact is certified to by the mayor and postmaster of Lynn and others of Mrs. Pinkham's own city. Write for free book containing these certifiates.

Every ailing woman is invited to write to Mrs. Pinkham and get her advice free of charge.

Queer Hitching Posts.

Icelanders have a peculiar plan to prevent their horses from straying. Supposing two people were riding together, and wished to stop somewhere to make a call. On dismounting, they would tie each horse's head to the other's tail. In this state the horses could neither move backward nor forward; at the most, they could go round in a circle.—N. Y. Sun.

Improved Train Equipment.

The O. R. & N. and Oregon Short Line have added a buffet, smoking and library car to their Portland-Chicago through train, and a dining car service has been inaugurated. The train is equipped with the latest chair cars, day coaches and luxurious first-class and ordinary sleepers. Direct connection made at Granger with Union Pacific, and at Ogden with Rio Grande line, from all points in Oregon, Washington and Idaho to all Eastern cities. For information, rates, etc., call on O. R. & N. agent, or address W. H. Hurlburt, General Passenger Agent, Portland.

The fruit grower who expects to have fair crops of fruit must begin with the use of insecticides early. He must not delay too late into the spring, as the first spraying is sometimes the most important of all. Paris green will not destroy the enemies that live on sap nor will kerosene injure those that feed upon the leaves. In using remedies, therefore, it must be done with an object in view and with a knowledge of the habits of the parasite or insect to be destroyed.

An Excellent Combination.

The pleasant method and beneficial effects of the well known remedy, SYRUP OF FIGS, manufactured by the CALIFORNIA FIG SYRUP CO., illustrate the value of obtaining the liquid laxative principles of plants known to be medicinal in their nature and presenting them in the form most refreshing to the taste and acceptable to the system. It is the one perfect strengthening laxative, cleansing the system effectually, dispelling colds, headaches and fevers gently yet promptly and enabling one to overcome habitual constipation permanently. Its perfect freedom from every objectionable quality and substance, and its acting on the kidneys, liver and bowels, without weakening or irritating them, make it the ideal laxative.

In the process of manufacturing figs are used, as they are pleasant to the taste, but the medicinal qualities of the remedy are obtained from senna and other aromatic plants, by a method known to the CALIFORNIA FIG SYRUP CO. only. In order to get its beneficial effects and to avoid imitations, please remember the full name of the Company printed on the front of every package.

CENSUS OF CROPS.

The Next Enumeration Will Be Taken in June, 1900, of the Products of 1899.

The first really valuable census of agriculture in the United States was taken in 1850, of the crops of 1849. The next enumeration of agriculture will be taken in June, 1900, of the products of 1899.

Instead of recording several farms on one schedule in the Twelfth census, as heretofore, each farm will be accorded a separate blank, the entries on which will not be known to any save sworn officers of the department. No names will be published in connection with information secured from the people.

Tax assessors, collectors, and equalizers cannot serve as enumerators, or have access to the census returns, or to the information therein contained.

There are more than 5,000,000 farms, plantations, ranches, stock ranges, and market gardens in the United States, and all of which, for census purposes, will be designated as "farms."

A "farm" is all the land cultivated or held for agricultural purposes under one management, whether in a single body or separate parcels.

The enumerator will ask for the size and value of each farm, the value of buildings, and the aggregate value of all machinery, implements, vehicles, harnesses, etc., used thereon; and the amount of land owned and leased, respectively, by said occupant.

He will also ask for acreage and value of each crop, and the acreage of improved, unimproved and irrigated lands.

The designation "each crop" includes all grains, cotton, corn, rice, sugar cane, sugar beets, sorghum, hay, clover, wild grasses, gathered forage, flax, hemp, hops, peanuts, tobacco, seeds, nuts, tropical fruits, small fruits, orchard fruits, nursery and greenhouse stock, broom corn, Irish potatoes, sweet potatoes and yams, all vegetables, including the product of all family, truck, and market gardens, etc.; also new or unusual crops, when found.

The enumerator will ask for the number and value of the live stock on the farm June 1, 1900, which will be reported under a number of heads, such as horses, colts, mules, asses, cows, heifers, steers, calves, bulls, ewes, rams, lambs, swine, goats, chickens (including guinea fowl), turkeys, geese, ducks, bees, etc.

He will also ask for the quantity and value of milk, cream, butter, cheese, raisins, prunes, molasses, syrup, sugar, eggs, honey, wool, wine, cider, vinegar, dried and evaporated fruits, forest products, poultry and meat products, and generally, all articles made at home, or for the home, from farm materials in 1899.

If a person who moves from a farm between the end of the crop year 1899 and June 1, 1900, will leave a written record of the products and crops of that farm for 1899 where it will reach the appropriate enumerator, the statistics for his operations for that year will not be lost, and he will be required to give the enumerator of the district in which he lives on June 1, 1900, the acreage, value, buildings, machinery, implements, and live stock of the farm he then occupies.

If every farmer will begin at once to prepare a careful record of all the facts which the enumerator will be instructed to record in June, 1900, he will save time for himself and the officer, and insure more accurate returns to the government.

The twentieth century will begin on January 1, 1901. Therefore, the pending census will afford to future generations a measure of the strength and condition of the United States at the threshold of the new hundred year cycle. For that reason everyone should take an active interest in making it as nearly perfect as possible. If each farmer will make his own report perfect, the aggregated report for every community, and for the nation, will be perfect.

The gambling ordinance of the city of Pendleton was amended at the last meeting of the city council so as to prohibit the operating of nickel-in-the-slot machines.

STRENGTH OF STAPLES.

Leading Feature of the Trade Situation This Week.

Bradstreet's says: The strength of staples, and particularly those of agricultural origin, is the leading feature this week, at least. In general trade, weather conditions have not favored a wide distribution, but, compared with a year ago, are still quite favorable. Enlarged speculation is reflected in increased bank clearings, and comparisons with last year are again encouraging, while gains over years previous to 1895 are very marked. In strength of demand, and size of advance, cottons are still easily first. Although the crop movement has noticeably enlarged so active has been the demand for foreign spinners that fully 35 cents advance is shown.

The strength of the raw sugar position has been further increased this week by bullish reports from European beet markets, and the expectation that receipts of cane sugars are apt to be light in the future.

Fine grades of wool are quiet, but there is still an urgent demand for medium grades, and quarter-bloods sell better, considerable imported wools having changed hands in Eastern markets.

A further gain in blast furnace capacity is noted. Current production is now little below 16,000,000 tons yearly, and some increase of stocks is shown.

Wheat (including flour) shipments for the week aggregate 2,902,357 bushels, against 2,724,937 bushels last week, 5,580,500 bushels in the corresponding week of 1899.

Business failures in the United States for the week number 231, as compared with 171 last week, 193 in this week a year ago, 278 in 1898, 301 in 1897, and 381 in 1896.

Queer Medical Test of Death.

A recent report of experiment at the Academy of Medicine in Paris gives astonishing testimony of the virtue of rhythmic twitching of the tongue as a means of restoring life in cases of drowning or asphyxiation. Within the past few months there have been at this hospital 40 such cases of resuscitation by this one means. Some of the statements made by M. Laborde, of the Academy of Medicine, in connection with this report are of exceptional interest. In one case a drowned man was resuscitated only after three hours spent in unintermittent twitching of his tongue. Which is certainly a reminder to physicians that this remedy is one that requires patience.—N. Y. Journal.

Barnacles on Ocean Cables.

The recent investigations for cable laying in the Pacific Ocean have revealed the fact, that if not upon rock bottom, they become encrusted with seaweeds, heavy enough to break them. This is like dyspepsia, which grows until it breaks down the health. Hostetter's Stomach Bitters will cure it, as well as indigestion, liver and kidney troubles.

It is just as necessary for a farmer to "get a reputation" as for a merchant to get to the top with a certain line of goods. When the farmer makes a specialty of butter, eggs or any other article, he should seek to introduce the goods himself. It may not be encouraging at first, but his products will in time become known.

A Comparison.

In the village of Sand, Surrey, is a sick benefit society, which is divided into two sections, one for teetotalers and the other for moderate drinkers, and the last balance-sheet was a typical one. It showed that the teetotalers had received no sick pay during the preceding 12 months, and that the subscriptions of each were returned to the extent of £1 4s. 9d., whilst only 18s. was available for each of the moderate drinkers, whose sick pay had received £15 1s. 8d. in section pay.

It takes time for manure to show full effect in the soil, and but little benefit may be noticed the first year, but gradually the materials will decompose and return to the soil the original elements derived therefrom. Some farmers are occasionally disappointed with the use of manure, but the benefits from manure the first year depend largely upon its condition when applied to the soil.
