In Tutuila and the Other American Islands the Natives Are Peaceable and Happy.

Apia, Samoa, May 13, via San Francisco, June 4.-Since the German flag was hoisted in Samoa, affairs have been in an unsettled state. The Ma-taafa faction until after Easter remained in or around Apia, claiming that although they had given the kingship to the commissioners in July last, they had not by any means given up their rights to govern the islands under the guarantee given to them by the Berlin treaty, which assured the autonomy of the Samoan group and the right of the natives to elect their own king. Mataafa claimed that the treaty powers had no right to hand over the government of the islands to any single power, and that such a course was not assented to by his people.

Dr. Solf, the newly appointed governor of German Samoa, had thus at the very outset of his career a difficult and trying position to face. After several interviews, in which the matters were discussed from the different points of view, the natives agreed to return to their homes and there await further news after the arrival of dispatches from the German government. It is generally understood the governor conceded the right of the majority of the natives to be the party who should be consulted later in the formation of the native administration and be entitled appointments thereunder. The Mataafa party claims that "the spoils

belong to the victors." In Tutuila the American representative, in the person of Commander Tilley, of the United States steamer Aberenda, has had a much more agreeable and pleasant experience than Dr. Solf. There the natives hailed with enthusiasm the hoisting of "Old Glory" At Manua, the island lying east of Tutuila, the chiefs have requested Commander Tilley to visit the islands in person and there hoist the flag. This he consent-ed to do, and the date fixed for the function was May 17, but at the time of writing there is no news from that

Customs regulations have been promulgated by the commander. The only port of entry in Tutuila is Pango-Pango. The duties are the same as export duty on copra has been abolished. Lands are not to be alienated by the natives, although lands may be leased for a period not exceeding 40 vears with the approval of the commander. The natives will be governed in districts. There are three districts, each under a chief. Under the chiefs are the judges and village magistrates, and an appeal lies from all to the commandant. The importation of arms and ammunition is strictly prohibited.

POLITICS IN SENATE.

Senators Hanna, Hale and Tillman Lee in the Debate.

Washington, June 4.—The senatorial debate today was caustic and as warm as the weather outdoors. At times the exchanges between senators bordered on personalities. Much of the discussion was of a political nature, although in themselves the questions involved were not essentially political. Soon after the senate convened, a memorial was presented from the people of California asking that the government provide some relief for the starving people of India. Hale, with this as a text, severely arraigned Great Britain for expending hundreds of millions of dollars in crushing liberty and freedom in South Africa, instead of caring for the helpless and dying people of England's chief colony. Aldrich charged Hale with making political speeches on irrelevant matters, and a little later, when Hale reported a further disagreement on the naval appropriation bill, an exciting discussion arose over the armor-plate question. A sharp political twist was given to the debate by a speech which Hanna delivered in favor ot leaving the whole matter in the hands of the senate conferees, and of conferring discretionary powers upon the secretary of the navy in accordance with the house proposition. He became involved in a controversy with Tillman and Allen over the government's ability to manufacture armor satisfactorily, in which the sparks flew to the intense interest of the auditors. Teller, Allen and Pettigrew replied to Hanna, all speaking in a political vein-The bill finally was returned to conference. Seventy-nine private pension bills were passed, and also the military at the close of the year the strength in academy bill carried amendments making General Miles and all future commanders of the army lieutenant-generals, and General Corbin a majorgeneral. Consideration of the last of the appropriation bills, the general deficiency bill, was begun, but was not completed.

Grievances in Detail. San Francisco, June 2 .- Referring to quarantining of Chinatown, the attorneys for the Chinese Six Companies

have made the following statement: "We shall do nothing precipitantly in the way of litigation, and therefore plication to the courts at this time for any order to modify or hinder the operations of the board of health.

"A cause of considerable uneasiness among the inhabitants of Chinatown is the lack of quarantine regulations thus far observed within the quarantined district. The general quarantine order keeps 20,000 people within a pre-scribed district, and that a comparatively samll district. In this district it is not claimed that there are or ever have been more than nine or ten cases. The contention made by the people who are subject to the quarantine is that if it is necessary to quarantine this num-erously populated district, it is the duty of the board of health to go further and quarantine or isolate the houses and persons who are said to be in-

"We shall also request the board of health to proceed vigorously with the sanitation of the quarantined district. The question of expense is a secondary matter. If genuine bubonic plague exists there, the city should stop at nothinmg to stamp it out. A million dollars would be a mere trifle to expend in doing this work quickly and well." position that the municipal government

of San Francisco is bound to furnish necessaries for the support of the quarantined Chinese. The federal authorities refused to issue clean bills of health to the steam ers City of Peking and Australia, which have sailed for the Orient and Honolulu. They will have to undergo

Fifty quarts of nitro-gleyerine had been lowered in 370-foot well. The "go devil" was dropped as usual, but failed to set the shot off. A 'squib' was made with glycerine in a tube connected by a fuse. This was dropped and in striking the can at the bottom the main shot exploded and sent great quantities of water, oil and the unexploded squib into the air. The squib fell on the derrick floor unnoticed.
