have been relieved of female troubles by Mrs. Pinkham's advice and medicine.

The letters of a few are printed regularly in this paper.

If any one doubts the efficiency and so-called confidential character of Mrs. Pinkham's methods, write for a book she has recently published which contains letters from the mayor of Lynn, the postmaster, and others of her city who have made careful investigation, and who verify all of Mrs. Pinkham's statements and claims.

The Pinkham claims are sweeping. Investigate them.

THIRTY YEARS OF CURES

As to Divorce. "Mamma," said little Ethel, "Mrs. Gayley's husband isn't dead, is he?" "No, dear." "Then what's she going to be married for?" "Never mind, dear. You can't understand such things."

Horses that are not at work daily get but very little green food. They would highly relish anything of a succulent nature especially during the warm season. The dry food of winter and summer is not so conducive to digestion as when varied with green food of some kind.

Shade trees are neglected from the time they are put into the ground until they are large. Insects and diseases attack them, but as they bear no crops and are supposed to produce no profit they are left to the ravages of their enemies. The shade tree will be missed when it is gone however and its place cannot easily be filled. Spray the shade tree and save them as they add hundreds of dollars value to the farm.

One point in growing turnips is to plant the seed on ground that has been well cleared of weeds. If the young plants can escape the weeds until the leaves are well out, half the danger of loss is then over. No plant is harder than the turnip and the plants only require a good start to ensure a crop.

The daughter of a tobacco merchant, from simply smoking in a chamber where a large quantity of tobacco had been rasped, died soon after, in convulsions.

## CANCER

Suffers from this horrible malady nearly always inherit it—most cases from the parents, but may be from some remote ancestor, for Cancer often runs through several generations. This deadly poison may lay dormant in the blood for years, or until you reach middle life when the first little sore or ulcer makes its appearance—or a swollen gland in the breast, or some other part of the body, gives the first warning.

To cure Cancer thoroughly and permanently all the poisonous virus must be eliminated from the blood—every vestige of it driven out. This S. S. S. does, and is the only medicine that can reach deep-seated, obstinate blood troubles like this. When all the poison has been forced out of the system the Cancer heals, and the disease never returns.

Cancer begins often in a small way, as the following letter from Mrs. Shiver shows:

A small simple case on my jaw about six weeks before the ear on the left side of my face. It gave me no pain or inconvenience, and I should have forgotten about it had it not begun to swell. It would bleed a little, then scab over, but would not heal. This continued for some time, when my jaw began to swell, becoming very painful. The Cancer began to eat and spread, until it was as large as a half dollar when I was told to get a bottle of S. S. S. and determine to give it a fair trial. The end it was remarkable what a wonderful effect it had from the very beginning; the sore began to heal and after taking a few bottles disappeared entirely. This was about three years ago; there are still no signs of the Cancer, and my general health is as good as ever. I am the greatest of all blood purifiers, and the only one guaranteed purely vegetable. Send for our free book on Cancer, containing valuable and interesting information about this disease, and write our physicians about your case. We make no charge for medical advice.

# NEWS OF THE MINES.

EXTENSIVE ORE BODY. QUARTZ IN ALASKA.

Wallace, Idaho, August 27.—The Flynn group of claims are to be worked at once. The Flynn group consists of 22 claims, located in 1887 by the Flynn brothers. The claims are all on the big lead, which is clearly defined from the Helena-Frisco mine on the Canyon creek side to the Morning mine, and have a continuous lead of over two miles in length. Fourteen of the claims have been patented for several years and the other eight are to be patented this fall, and after the survey has been made Montana parties of unlimited capital will take the entire property on a bond and at once commence systematic development upon it.

In the minds of mining men there has never existed much doubt as to the Flynn group. It could hardly be possible that a break would occur in the mineral lead on which the claims are located, and at either end of which such bonanza ore bodies as the Helena-Frisco and the Morning mines have opened. The Flynn group has two miles of this same lead, between these two big producers, and surely covers one of the greatest and most extensive ore bodies in the Northwest.

A lot of work has been done on the property in the year since the claims have been located, but being a deep mine proposition, the owners have been unable to develop it into a producer. Last year a tunnel was run to tap the lead below the monster iron capping of the summit. This iron knoll is an elevation of fully 5,000 feet and covers an area almost as large as Wallace. Altogether over 6,000 feet of tunnel has been run on the various claims, and the mineralization has been good in all of it. None of this tunnel worked was sufficiently extensive, however, to explore the ore ledges. On the Iron-Silver claim the lead was tapped with a tunnel of 404 feet. The face of the tunnel was quite freely mineralized for a greater part of the distance. From the point where the tunnel cut the lead a drift of 110 feet was run, all showing considerable ore. The ledge is about 30 feet wide, and the walls are in place and solid.

A tunnel from the Canyon creek side in the vicinity of the Frisco would cut the lead on the Flynn group at a depth of nearly 3,000 feet, and it has long been contended by practical mining men that this is the most advantageous point from which to open up the property.

LOOKING FOR IDAHO COAL. Would be a Big Thing for the Railroads and for Lewiston.

The discovery of immense coal deposits near Lewiston Idaho, will it be believed, have great influence in the future railroad construction in that section. The deposits are located about 13 miles from the mouth of the Grand Ronde river, and if the results of development meet the elaborate indications, they promise to exert a material influence on the railroad situation in the Snake river country, says the Lewiston Tribune. The O. R. & N. Co., it is said, is anxiously investigating coal prospects in the basins of the Columbia and Snake rivers with the hope of providing and adequate supply of coal for its system and if such is the case the discovery of a good quality in sufficient quantity on the Grand Ronde would be a most welcome development to that road.

OREGON COAL FIELDS. The Geological Survey Publishes a Late Report on Them.

Washington, August 27.—The coal fields of Oregon are thus summarized by the latest report of the geological survey: The coal fields of Oregon, so far as yet known, all lie west of the Cascade range and north of Rogue river. Most of them are among the mountains generally known in Oregon as the Coast range, but others occur at the western foot of the Cascade range. Four fields will be noticed—the upper Nehalem coal field, in Columbia county; the lower Nehalem coal fields, in Clatsop county; the Yaguna coal fields, in Lincoln county and the Coos Bay coal fields, in Coos county. Traces of coal have been found in many other parts of the state. The greatest hindrance to the development of the Oregon coal fields is the lack of transportation.

Work Progressing on the Kimberley. The tunnel on the Kimberley, in the Kamloops, B. C., district, is in 327 feet. Last week a vein was struck on the top of the tunnel, at a pitch of 45 degrees. Bunches of very good ore have been encountered, of chalcoprites and black oxides. The present vein matter is very much decomposed, but so far considerably exceeds in value anything hitherto taken from the tunnel. This finishes the contract for the 100 feet of driving. Work is still in progress, and will be prosecuted steadily.

Road to Blue River Mines. Crews of men and teams have gone from Brownsville, Oregon, to build the wagon road from that place to the Blue River mines. Relays of men will be at work until the road is completed to the mountains.

Copper in Union County. The copper fields in the eastern part of Union county, Oregon, are likely to become valuable property. Property being worked by the North American Mining Company shows ore bearing gray copper in good quantities. Reports say that a great body of copper ore exists in this section.

Thirty Thousand a Month. The Greenback mine, in Josephine county, Oregon, pays its owners \$30,000 a month in dividends.

Good Idaho Mine Being Developed. The Klondike mine, in the Pierce City district, Idaho is being developed by tunnels, and about 20,000 tons of ore have been blocked out. It will assay about \$8 per ton. Fifteen men are working on the new site for the mill which will be put up at once. This mine is owned by the Oro Fino Mining Company.

Coal and Petroleum. Several Astoria men have formed a syndicate to develop coal lands near that place. Petroleum is also expected to develop on this property.

Permanent Gold Veins. Mining experts said in the Portland Telegram, August 22, that they believed the gold veins in Eastern Oregon are permanent and of good depth.

## Free Ice Fountains.

The Woman's Auxiliary of the Church Temperance society, in New York, supports 12 free ice water fountains in the tenement house districts. They are in operation from May 1 to October 1, and many letters have been received telling of the constant stream of children with pitchers, draymen and others who have enjoyed them. The great increase this season in the price of ice makes it prohibitory for the poor, and therefore the fountains will prove even more of a blessing than heretofore. It costs \$200 to erect one of these fountains, and the society desires to extend the system.

From War to Peace. Two cannon from the Civil War are to be melted and cast into a statue representing peace. What a contrast—as great in a way as the change Hostetter's Stomach Bitters will bring about in the health of any who use it. It cures constipation, dyspepsia or weak kidneys. Try it.

The curious fact is noted by M. Maurin, in the Journal de Physique, that globe show this to be greater on islands than on continents.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Life is not one grand sweet song at Cape Nome. A Wichita man writing home from there says: "Here lies the rolling sea. Towering above the sea are the ice mountains, and towering above them is the price of grub."

Eggs have kept up well in prices this year and considering the fact that fowls are almost self supporting in summer, eggs are almost clear profit compared with their cost. It is probable that when poultry receives as much attention as other stock more fowls will be regarded as invaluable adjuncts to farming especially as eggs sell for cash and are produced every month of the year.

## A Wise Printer.

An exchange tells of a printer, who when his fellow workmen went out to drink beer during the working hours, put in the bank the exact amount he would have spent if he had gone to drink. He thus kept his resolution for five years. He then examined his bank account and found he had on deposit \$521.86. In the five years he had not lost a day from ill health. Three out of five of his fellow workmen had become drunkards, were worthless and were discharged.

DEAFNESS CANNOT BE CURED. By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are cured by this method, and the hearing is restored to its normal condition. Send for our circular, which will give you full particulars. We will give One Hundred Dollars for any case of deafness (caused by catarrh) that can be cured by Hall's Catarrh Cure. Send for circular, which will give you full particulars. Sold by Druggists. F. J. CHENEY & CO., Toledo, O. Hall's Family Pills are the best.

## Guard Your Health

Look Out for the Weak Points. That feeling of debility, depression and want of energy; that sleeplessness; that poor appetite; that pain after eating, should be promptly attended to. Hood's Sarsaparilla will give relief and will prevent the nervous prostration, chronic dyspepsia and other serious diseases that would follow a persistent neglect of these symptoms. It is the safeguard of health as well as the surest remedy for disease.

Hood's Sarsaparilla. Is America's Greatest Medicine. Hood's Pills cure all liver ills. 25 cents. Shippers in Germany. There are 39 shippers in Germany, employing altogether nearly 50,000 men, and together they constructed last year 528 vessels of all kinds for the navy, the merchant marine and for river traffic of the larger description. Of these yards five are used for the construction of naval vessels, having an aggregate capacity for the simultaneous construction of over 40 of the largest ships, 28 torpedo destroyers and 30 torpedo boats.
