A Letter From Dr. Korn.

DAYTON, O., Sept. 18, 1900. EDITOR GRAPHIC, Newberg, Ore.

DEAR SIR:— I have made arrangements to meet with Mr. Cohen at New York, around the 1st of October, and all interested parties, for the final decision to commence active work for the Newberg factory. I am not a promoter, but an authority called upon to decide whether your locality is adapted for the cultivation of sugar beets, and whether a beet sugar factory will pay in the Willamette Valley. My opinion in reference thereto has been a decided one for years past, and I favor the same in its highest terms.

Mr. Cohen's financial connections in the East and abroad have been found to be tangible, and for the portion of money lacking, I have taken the responsibility upon my own shoulder, and shall see that we will successfully arrange for the commencement of said factory.

You can let the public know that their co-operation is wanted to establish one of the largest industries in the world. It will be a God's blessing to your community and farmers, and all the antagonistic and selfish ideas of people, who took the stand as an authority, will be crumbled. Such opinions should be left entirely to such parties only who have spent a life time for the industry. I pride myself to state that as early as '92 I have made such investigations, and had it not been for our financial depression, Oregon would have had at that time a factory. Willamette's soil is well adapted for the sugar beet, and if under proper management, will prove what I vouched for years ago. Hoping this will suffice for the present, until I will see you personally to give you an article for your readers.

Yours very truly, Dr. Karl G. Korn.
