There is a splendid opportunity for the business men of this city to secure a boat to ply the Yamhill river, and not permit the $70,000 locks to stand as a nullity of their efforts for the past dozen years. C. K. Spaulding now has two boats, the Eugene and the Grey Eagle, tied up at Newberg, which are available if we advance on him with a definite proposition. The Bonita did not abandon this route for lack of business, and no other boat, if its rates are right, will need to.—Reporter.

A mammoth pumpkin on exhibition in the window of the Newberg Land Co.'s office has been attracting a good deal of attention the last few days. It was grown by N. L. Wiley, and weighs one hundred and forty pounds. In circumference it measures five feet, one inch by seven feet nine inches. The lady proprietors of the rummage sale have been figuring how much more money they could have made by turning it into pumpkin pies and selling them out at ten cents apiece. It's a poor time of year when this vicinity can't display a beater in some line of agricultural or horticultural products.

Noah Lapp brought into this office on Tuesday clusters of fine ripe red raspberries, with the information that he had plenty more just like them at home. Ripe berries and cream as dessert for Christmas dinner is a luxury little dreamed of by our Eastern cousins.

Frank O'Neal who is with the Northern Pacific Co. in Portland, was in town on business the first of the week. He was one of the solicitors who raised the fund for the 1905 Exposition, and says he did not meet with a single refusal to subscribe toward the big fair. Quincy Lee Morrow, the temperance orator, according to his own testimony, spoke on Thursday night of last week at this place to the best audience he had addressed in the state. As to the success and ability of the speaker, opinions of course differ accordingly as they are given from different standpoints. We have placed order with the Star Drilling Machine Co. of Akron, Ohio, for a No. 8 machine, capacity 2500; the strongest, most reliable machine made. With this machine we have ordered everything to make same complete, including 1600 feet casing. Now we are up against the real thing; we are getting next, as it were. The executive of this company are accepting burdens that the stockholders do not share in pushing this enterprise. We say enterprise, and if it is not misnamed, then you are not on the square if you stay out. If developing this industry is going to benefit this community, that can open up such an industry without each and every resident therein receiving a benefit was never heard of, it's a selfish man that will not stand pat. We should all grind the same ax and sticking everlastingly at it will do the grinding. We, the executive, accept the task and burden of plugging away to secure results. Your part is simple. It's easy. It should be a pleasure. Profits are not only possible but probable. Big money is to be made in new industries before development. Our rich men did not make their money by the sweat of their brow. They went in on the ground floor before development, then when their good fortune is complete, the mob plunges in, but the other fellow has secured the cream. You can take your choice. We cannot force you in. We can only state the proposition, urge your consideration and bank on your good judgement to come in. If you are a skeptic, if you cannot believe, make your position sure; back up your judgement, put up a few dollars to assist in putting down the drill. Prove your ground. You certainly could stand a reversal of your judgement if we meet with success. What do you think about that anyway? We contend we are right! If you have the nerve to say we are not, the only chance to prove your position is to help our development. Seriously. we need you and trust your subscription will come. Send in money order or check, to the company or to Bank of Newberg.

Kelsey of this place, who was prominent in the deliberations of that body, received honorable and merited recognition for his zealous and able efforts in the cause of temperance by being tendered the nomination for the office of state superintendent of public instruction. His many friends here are glad to see his political star in the ascendancy, and feel that his party could have done even better by putting him at the head of the ticket for governor.

Horatio Nelson Hall is dead at the home of his son the Rev. Joseph Hall, having passed away Thursday morning at 8 o'clock. Grandfather Hall had been sick but a few weeks but grew weaker from the beginning of his illness until the end came peacefully but unexpectedly to his friends. He had reached the advanced age of 90 years, but had retained unusual vitality and was actively engaged with his ordinary routine of work up to a few days ago. He was a faithful and earnest member of the Friends church and always bore testimony for the highest and best in spiritual attainments. The funeral services will be held at the Friends church this afternoon at 1.30 o'clock, and will be conducted by Mrs. Jane Votaw. Interment will be made at Canyon Cemetery, immediately after services at the church.

The Palo Alto, California, Times has the following to say of Bert Hoover, a former student of the academy here, and who visited in Newberg a few weeks ago with his sister Mrs. Van Leavitt: "Herbert C. Hoover, who graduated with the pioneer class of Stanford, after working his way through the University, now draws an annual salary of $33,000, the highest sum ever paid to a man of his age. After leaving Stanford Mr. Hoover went to Coolgardie, Western Australia, where he had charge of rich mining properties for a London syndicate, for which he was paid $15,000 per annum. From there he went to China, where with his wife, formerly Miss Henry of Stanford, he was all through the Boxer outbreak, and where he obtained valuable coal property. Now he has sold his coal mines for $1,500,000 and has come back to America. He is in the employ of rich London companies, and has the enormous salary above quoted, and all that, too, at the age of 27 years."
