

**NEWBERG GRAPHIC.**

E. H. WOODWARD, EDITOR & PUBLISHER.  
W. C. WOODWARD, ASSOCIATE EDITOR.  
Entered as second-class matter at the postoffice at Newberg, Oregon.

ISSUED EVERY FRIDAY MORNING.

FRIDAY, JANUARY 3, 1902.

It is announced that Marconi, the famous electrician is soon to wed. It seems that he has lost no time in making practical use of his system of wireless telegraphy.

The negro, Parker, who knocked down the assassin Czolgosz, immediately after the latter shot President McKinley, is to be rewarded for his bravery, by being appointed a messenger in the United States Senate. This is a just recognition, especially as the colored man has manifested a sense of dignity and propriety in refusing offers to make a show of himself over the country for mercenary considerations.

Country newspaper men are generally good subjects for imposition in various ways, but occasionally the worm turns. The Junction City Times this year get back at one of those gally Eastern medicine firms: "An Eastern firm wants us to advertise and take its medicine for pay. We will take it on condition and condition powders or anything we need, but we won't have its just to fill up the paper with advertising."

Senator Platt of New York, in vowing eternal vengeance upon William Allen White for the latter's character sketch of the former in McClure's magazine, is making an unnecessary show of himself, though anyone who has read the article can not wonder at his disquietude. White, who is editor of the Emporia, Kansas, Gazette, once enlightened the people on "What's the matter with Kansas" in an editorial that made him famous, and now by some of his relentless character sketches of some prominent politicians he is indicating what is the matter with some phases of American politics. A public man has to be a pretty decent sort of a fellow to enjoy reading about himself from the pen of the gifted Kansas editor.

In a symposium of short readable articles in Sunday's Oregonian, by representative men of Portland relative to the best interests of their city, one man makes the very practical suggestion that all streets be labeled and all houses carefully numbered, holding that at present it is extremely difficult for the oldest citizen to determine just where he's at, to say nothing of the stranger within the gates. This is advice most sensible. Especially does it appeal to us denizens of "the country" who sometimes make short pilgrimages to the metropolis, and who, for geographical instinct happens to be at fault, are in danger of not finding our way home.

Another suggestion which might not be altogether out of place would be that a few more "cops" might be sprinkled around the streets of Portland very advantageously. It has often been remarked by strangers that these blue-coated worthies are less in evidence in Portland than in any city of their acquaintance. This may be a tribute to the orderliness of our metropolis, but we take it that a policeman has other duties besides using his club in breaking heads. The poor man is really up against it in Portland who is advised to "tell his trouble to a policeman."

In the opinion of C. L. Smith, of Minnesota, an expert on dairying, there is a better opportunity for the development of the dairy industry upon the Pacific Slope than in any other part of the country. This opinion is valuable as that of a man who has made dairying a study and traveled extensively for the promotion of that industry. Dairying has been slow in development in the Pacific Northwest for the same reasons that have retarded the growth of other industries, but the impetus given to it during the past few years by widening markets, special instructions and increasing population has been great, and the tendency is still upward. Farmers of the Pacific Northwest have learned many practical and valuable lessons in recent years, one of which is that it does not pay to keep scrub cows and make butter in the old way. The far-famous churn has practically had its day. It did excellent service in its time; so also did the hand loom, the sickle and the flail. It has survived for many years the extinction of its early contemporaries in farm devices, but the long day of its usefulness has ended, and that of the creamery has well begun.—Oregonian.

Now that by energy and enterprise Newberg has made the grubby end to blossom as a garden, has substituted fruit trees and berries for oak grubs and fir stumps, in short has made a name for herself as a heavy fruit producing section—others seeing our good works manifest an encouraging attitude of assistance and co-operation toward further developing our resources. Among the many luscious fruits grown in this locality, the big red strawberry has attained a position of importance as a commercial product, and there is no reason why with diligent effort the importance of the industry may not become paramount with us. It evidently appears this way to outsiders, as it will be remembered that in his annual report horticultural commissioner W. K. Newell reported that he knew of no place more adapted to the development

of the strawberry industry than Newberg. Hon. E. Hofer of Salem, well known as a strawberry enthusiast, has also had his eye upon this place as a promising field for the culture of the popular berry, and has been giving some attention toward working up interest on the subject here. The Graphic is in receipt of a letter from him in which he says it is his intention to hold a meeting here especially to emphasize the strawberry industry which he says he believes can be made a big thing in this section, as much so as at Hood River. He also enclosed a letter from R. C. Judson, industrial agent of the O. R. & O. Co., who promised to come and help make a success of such a meeting here. Such a spirit of co-operation manifested, in the absence of personal interest, is decidedly commendable and the least the citizens and horticulturists here can do to show their appreciation is to make an effort in line with the work in which others are endeavoring to help us.

In these first days of the new year, before the New Year's resolutions have grown cold, it may not be out of place to broaden our perspective a little; to look around as well as in. The past year has been a prosperous one for Newberg. New industries have been opened up, new houses have been built, and the town has enjoyed a steady growth. But last year is a closed book. The question is, what's to be done this year to keep Newberg in the van? There are yet other enterprises which we need here and which it is believed we can get by means of co-operative energy. There are many people looking for just such a place as this for a home, who ought to be told about Newberg. These facts suggest the need of work to be done by somebody in the interests of our town and locality. Who is to do this work? Are you willing to do your share of it? There are generally a few energetic men in a community who are responsible for its development and advancement. It becomes too easy for the rest to get in the habit of leaving everything of public interest to those few, forgetting how much more could be accomplished with a general, unanimoous effort. It is in this way that those who really have an interest in the progress of their home town, gradually become careless and then indifferent. What's the matter with starting in the New Year with a revived in home loyalty? Suppose each citizen resolve to take a little more responsibility of local interests upon his own shoulders; to speak a good word for his town and neighborhood; to patronize home industries when possible; to give at least strong moral support, flavored with a little financial aid to new and progressive enterprises; to uphold the home institutions which have been instrumental in making Newberg what it is; in short, to go into the game of home enterprise and get into every play which helps to score for home advancement. Such a spirit as this has made Newberg what it is; enough more of it will make Newberg what we want it to be.

**A NEW CENTURY OF MARVELS.**  
Marconi's exploit in the opening year of the twentieth century gives reason for the assumption that the world has entered another cycle of marvels, says the Globe Democrat. On January 1, 1891, in the opening day of the opening year of the nineteenth century, another Italian, Piazzi, of Palermo, discovered a little planet, which for a short time, was involved in some mystery, but whose orbit was soon marked out. About 450 or 460 of these asteroids, or planetoids, have been traced out since that discovery of 100 years ago by one of Marconi's countrymen. Soon after the correct theory of the solar system was discovered through the work of Copernicus, Kepler, Galileo and Newton, astronomers began to predict that some planetary body, or bodies, would be found ultimately between the orbits of Mars and Jupiter. The discoveries of Piazzi and his successors, the most successful of whom have been Americans, are the answer to this assumption.

The nineteenth century's record in the field of science, which began to be scored in the first hours of the century's life, may be surpassed by that of the twentieth century, which is already making its mark in scientific achievement. When Morse's telegraph, which had been the subject of a good deal of ridicule before that time, to the comparatively few persons who took enough interest in the matter to give any attention to his expectations and predictions at all, sent the news from the Baltimore Democratic convention of 1844 to Washington about Polk's nomination, a new and wonder-making agent had been added to the resources of civilization. When, a little over a dozen years later, by the laying of Cyrus W. Field's cable under the Atlantic, Queen Victoria and President Buchanan sent instantaneous messages to each other, the imaginary exploit of Shakespeare's Puck, who could "put a girlie around the earth in forty minutes," sunk into insignificance before the real achievement in earth-gridding, which was brought into the domain of practical accomplishment, and which has been actually accomplished since then.

Here are only a few of the works of the period to which Alfred Russell Wallace long ago gave the name of the "wonderful century." In the case of Field, Morse and the other workers in their department there were years of failure before success came. Like Fulton, Stephenson and the rest of the men who blazed new paths for the world to travel, they reached victory after braving the discouragements of many defeats, stretching over long years of time. Marconi is continuing the work of Morse, Field and the others in the same sphere, but is giving it applications and manifestations of which they

did not dream. Nor is he alone in his investigations into the possibilities of wireless telegraphy. Others are experimenting in the same sphere, and have been, like him, doing it for years, though he seems to have progressed farther toward success than they, and he has been able to arrest a larger share of the world's attention. If it be practical to draft the ether into man's service as a medium of communication in every direction and to all lengths, without the intervention of wires—and the young Italian's experiments appear to have removed all doubt on this point—then Marconi will knock the present elaborate machinery of ocean and land telegraphs as obsolete as Copernicus did the vast scheme of epicycles of Ptolemy's astronomy, and a new era of marvels is about to swing open to the world.

**UNCLE SAM'S GREATEST SECRET.**

If there is any secret which Uncle Sam jealously guards it is the process of manufacturing the fibre paper upon which his money notes are printed. He pays a Massachusetts firm forty-three cents a pound for it, and this firm does its work under the surveillance of a government agent. The paper is manufactured of the finest rags, cleaned, boiled and mashed into pulp. As it is rolled into thin sheets silk threads are introduced into it by a secret process. These are the distinguishing marks making the imitation of the paper well-nigh impossible. The sheets of paper, already counted twice and placed in uniform packages at the paper mill, are stored in a treasury vault and issued to the Bureau of Engraving and Printing as wanted. Before leaving the Treasury they are counted three times more, and the receiving official at the bureau must receipt for them. Then the bundles are unwrapped and the sheets are counted twenty-eight times by a corps of women. This is to insure that each printer gets the recorded number—no more, no less. If one sheet of this precious paper be lost the entire force of men and women having access to the room where the misplacement occurred are kept in, like so many school-children, to find it. Each sheet is issued from the vault for the printing of a definite amount of money upon it. If the lost sheet were intended to ultimately represent four thousand dollars' worth of notes the group of employees to whom the responsibility of its misplacement has been traced must make good that amount if they cannot locate it within a reasonable time. The most expensive loss which has thus occurred was of a blank sheet issued for the printing of eighty dollars upon its face.—John Elfreth Watkins, Jr., in the January Ladies' Home Journal.

**Real Estate Transfers.**

Reported by the Yamhill Co. Abstract Co. at McMinnville, Oregon, for the week ending January 1, 1902.

**Thousands Sent Into Exile.**  
Every year a large number of poor sufferers whose lungs are sore and racked with coughs are urged to go to another climate. But this is costly and not always sure. Don't be an exile when Dr. King's New Discovery for Consumption will cure you at home. It's the most infallible medicine for Coughs, Colds, and all throat and lung diseases on earth. The first dose brings relief. Astonishing cures result from persistent use. Trial bottles free at C. F. Moore & Co. Price 50c and \$1. Every bottle guaranteed.

**Announcement.**  
I would like to announce to the people that I am opening a General Merchandise Store and I will sell goods at prices never heard of before in Newberg. We will carry Dry Goods, Clothing, Boots & Shoes, Gent's Furnishing goods, Groceries, Crockery, glass ware, China ware, Tinware, granite ware, woodenware and in fact everything carried in a first class store.  
The Opening Sale will be on

**Underwear**  
for Men, Ladies' and Children. We have 300 Dozen suits of Winter Underwear that we must close out, and we will sell them at your own price. Come and look them over and you will save money by buying your Underwear for future use. Watch our add in this paper next week.  
Yours for Low Prices,  
**J. S. Gross,**  
J. C. Sawyer Building, next to Chehalem Valley Bank.

**EHRET BROS.**  
Have a full line of Ladies and Gents Furnishing goods, boots and shoes, woolen dress goods in dress patterns; we also carry a line of Holiday goods consisting of  
CHOICE VASES CHINA CUPS  
SAUCERS GAMES  
TOYS TOILET ARTICLES  
Come Early and avoid the Holiday Rush. Hand painted China given free with cash purchase.  
**EHRET BROS.**

**Her Husband's Story**  
"My name is E. J. Sprong, and my address is 16 Bondman Block, Troy, N. Y. I want to tell how thankful I am that my wife's health has been restored to her. About a year ago she caught a dreadful cold, which settled in her bronchial tubes and lungs. She certainly had bronchitis, and I think consumption, too, and we despaired of her life. She had a tightness and soreness in the chest, and it was difficult for her to breathe. There were darting, sharp, dull and heavy pains, with constant coughing and expectorating. Each day she was worse than the day before. I was advised to get Acker's English Remedy, and did so, but my wife only shook her head and said: 'Another dollar thrown away.' She took the Remedy, however, and said the effect was magical. In less than an hour there was a remarkable change. She got better at once, and in a short time she was entirely well and strong again. The cure was permanent and there has been no relapse. I don't know what Acker's English Remedy is made of, but I am sure it contains something that fortifies the system against future attacks. My wife is in better general health now than ever, and you can't imagine how happy she is for her recovery. She tells everybody about Acker's English Remedy, and so do I, for I believe it to be our duty to the public to help every sufferer who has throat and lung troubles. My neighbors say it is a sure specific for croup, and has saved the lives of hundreds of little ones around in this vicinity alone."  
Sold at 25c, 50c, and \$1 a bottle, throughout the United States and Canada; and in England, at 2s, 4s, 6s, 8s, 10s, 12s, 14s, 16s, 18s, 20s, 22s, 24s, 26s, 28s, 30s, 32s, 34s, 36s, 38s, 40s, 42s, 44s, 46s, 48s, 50s. If you are not satisfied after buying, return the bottle to your druggist, and get your money back.  
We authorize the above guarantee. W. H. HOOKER & CO., Proprietors, New York.  
For sale by C. F. Moore & Co.

**For Sale.**  
Full blood Jersey bull 18 months old. C. S. CALKINS.

**Will Sell.**  
At private sale my household goods and some three or four cords of old-red wood. Call at my residence. L. D. BARR.

**For Sale on Contract.**  
Ten acres, one mile west of Newberg depot; eight acres in prunes for \$800, on five years time at 6 per cent interest, and one acre in town for \$300 on same terms. L. Root, McMinnville, Or.

**Notice of the Appointment of Administrator With Will Annexed.**
