The question to be debated between Albany and Newberg, reads, "Resolved, that the United States should subsidize her merchant marine." Newberg presented the question, and Albany chose the negative of the proposition, which seems very satisfactory to the boys here.

Miss Mabel Stafford, traveling Pacific Coast secretary of the College Y. W. C. A., arrived here the latter part of last week and remained over Sunday in the interests of the local association. The young ladies are enthusiastic in her praise as a magnetic and efficient worker.

The second basket ball team of Pacific College took a wisdom tooth cutting expedition up to the county seat last Friday, running up against a McMinnville college team, about half of which were first team players. As it was they lost the game by the narrow margin of 16-13. The first team here is longing for another game with the McMinnville boys.

While eating his dinner Wednesday Worth Sims left Wilson's delivery outfit hitched in front of the house. Some idle hands itching for mischief turned loose a dog near by with a cord tied to its tail, with the result that the horse broke loose and ran away, bringing up suddenly in the big ditch at A. O. Miller's corner, with the wagon upside down and pretty badly broken up. No one has offered to help pay damages.

Prof. Kirk, as principal of the public school intends to fulfill his various duties toward his constituents, but feels there is a limit somewhere. One day last week he was called by a gentle knock to the door of his school room and found a young man who asked him if he could "marry people," and if so, he wished to engage his services at once. This rather stunned the beardless professor who managed to explain that as yet, he had not succeeded in marrying any one and that his services would not quite make the matrimonial compact of others legal. The young man went away sorrowful and contented himself with the good offices of an every-day minister.

Wednesday evening about 6:30 o'clock there was quite an excitement in Sheridan, caused by Frank Stewart, one of the managers of the Sheridan Livery Stable, and Roy Townsend driving a team into the Yamhill river a couple of blocks above the county bridge. Mr. Stewart's team had been out on a drive, and when they were returned to the stable they were very muddy and Mr. Stewart drove them down to the river for the purpose of washing them off. They drove into the river and found that it had raised more than they thought, the water coming up into the buggy bed, and attempted to turn and get out, but in turning they ran onto a snag and turned the buggy over. Mr. Stewart managed to get out but Roy Townsend could not swim so held onto the buggy until assistance came. When the buggy turned over the tongue broke and one of the horses fell and was drowned. A crowd of people soon arrived and the horse was pulled out on the bank and was buried yesterday.—Sheridan Sun.

The noon freight ran over and killed a valuable cow on Tuesday belonging to John Diddgood. Appraisers were appointed and the beast appraised at forty dollars. It was rather hard on the bovine but it is suggested that it is refreshing to know that the noon (?) train occasionally has up steam enough to run down a cow.

It was a fine exhibition of basket ball that was given last Saturday afternoon in the game between Dallas and Newberg. The teams were evenly enough matched to keep all spectators keyed up to a high tension and a few spectacular exhibitions of team work were presented. The visitors were a little more accurate in throwing at the basket, but the superior team work of the home team won the game for Newberg with the score of 24 to 20. The Dallas College boys are a gentlemanly lot of fellows, the kind with which college relationships are always profitable.

As referred to in these columns some time ago, Editor Hofer of the Capital Journal, the well known strawberry enthusiast, and E. C. Judson, industrial agent of the Southern Pacific, have signified their desire to come to Newberg and hold a meeting with the small fruit growers of this vicinity. They have named March 1, as the date of the meeting and all horticulturists should prepare to attend. If Mr. Hofer sees great possibilities for the development of the small fruit industry at this place, and has interest enough to come down and encourage the growers, they ought to display at least gratitude enough to work up a good attendance.

The Southern Pacific Company is arranging to tear down the large hotel and depot building at Dundee and build a more modest structure and one more adapted to the company's needs. The present building is a historic landmark in this part of the county, having been erected some twenty years ago by "Dundee Reed," in whose mind's eye Dundee was to become a grand junction and the hub of this section of country.

Lumber is already on the ground for the erection of the new building. By the way, while the S. P. Co. is in the humor of improvement "O" was in the humor of the gift 'tie tie' to see Newberg's needs in this particular. Our little chicken coop of a depot is sadly out of proportion to its needs.

We have received word that our machine and outfit was shipped on the 13. The delay was caused by rush of business with manufacturers. The O. R. & N. and S. P. R. R. people have promised to make a rush job in bringing stuff out. There are two cars, including boiler, engine, machin casing etc. The total cost including freight is about \$4500, f. o. b. Newberg. Up in Whatcom, Washington, a few days ago they struck oil. From Whatcom, south through Washington and Oregon to the California line, there are now drilling and preparing to drill at least twelve companies. On the map of Oregon and Washington you can trace the numerous companies from Whatcom south in a direct line. There is no connection whatever between these companies; each has been promoted and work inaugurated independent of the other, but the prospect, the incentive for action, and the probability of success are in each case laid on the same foundation; based on theory if you like, but a theory that has the support of the best geological knowledge. Geologists have always contended that the oil belt was continuous through California, Oregon and Washington. Until this strike at Whatcom, no oil was ever found north of California. This find at Whatcom makes our work a practical enterprise. Theory is knocked into a cocked hat; it is certainly practical and not theoretical at Whatcom. While we have had perfect confidence that development work would prove the existence of oil, we think and believe that the discovery of oil at Whatcom clinches the matter. It endorses our claim and wipes out that old question of distance. We now have oil north and south of us; we are betwixt and between, as it were, and if the court knows herself, and we think she does, we will strike oil. Every dollar you put into the stock of this company will go to direct work of development. It will never cost more than you willingly subscribe; there is no liability beyond the amount you purchase and pay for. We need your help now and respectfully solicit same.

on a week ago was a grand success. The program was splendid and the proceeds amounted to nearly \$43, which will go to buy books for the school library.
