

March April May

There is a best time for doing everything—that is, a time when a thing can be done to the best advantage, most easily and most effectively. Now is the best time for purifying your blood. Why? Because your system is now trying to purify it—you know this by the pimples and other eruptions that have come on your face and body.

Hood's Sarsaparilla and Pills

Are the medicines to take—they do the work thoroughly and agreeably and never fail to do it.

Hood's are the medicines you have always heard recommended. "I cannot recommend Hood's Sarsaparilla too highly as a spring medicine. When you take it in the spring, it purifies the blood through the summer."—Mrs. S. H. Neal, McCray, Pa.

Hood's Sarsaparilla promises to cure and keeps the promise.

In a Lighter Mood. She: "No man has ever kissed me." He: "I wouldn't boast of my unpopularity, if I were you."—Philadelphia Record.

FITS Permanently Cured. No fit or person ever after tried the use of Dr. Hood's Great Nerve Sander. Sold on F. B. King, Philadelphia, Pa.

No Doubt About It. "Bridget, what did you say to Miss Smith when she called?" "I told her you were out on this time for sure ma'am."—Harper's Bazar.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

Snap-Shot Opinion. Ned—Clara says you are a perfect gentleman. Fred—Why, she doesn't know me. Ned—That's what I told her.

CATARH CAN BE CURED

With local applications, as they cannot reach the seat of the disease. Catarrh is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hood's Catarrh Cure is taken internally, and acts directly on the blood and mucous surfaces. Hood's Catarrh Cure is not a cathartic, and is not prescribed by one of the best physicians in this country for years, and its regular prescription. It is composed of the best known ingredients, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces the wonderful results in curing catarrh. Send for testimonials, free.

F. J. HENNEY & CO., Props., Toledo, O. Sold by druggists, grocers, and dealers.

A Southern Poet. "Here, Marie! Send up a peck or two of corn dodgers an' a hunk o' meat to Joseph."

"Kase he's locked himself in his room, an' is expressin' of himself in poetry."

Piso's Cure is the best medicine we ever used for all affections of the throat and lungs.—Wm. O. Emsley, Vanuren, Ind., Feb. 10, 1900.

A Reprobate. "Aren't you ashamed to go away and leave your wife in tears?" asked the near relative.

"Oh, I don't know," answered the brutal man, "that's the way she has a good time when she goes to the theater."—Washington Star.

Why suffer yourself, or let others, when relief may be had at once by using—Hamilton's Wizard Oil.

Defined. "Taw, here's something in the paper about a 'junker.' What is a junker?"

"A junker, my boy, is an excursion at public expense to which you are not invited."—Chicago Tribune.

OREGON BLOOD PURIFIER

TESTED AND TRUE. GUARANTEED NOW! In the Time to USE IT.

Too Indigestible. "Hear Bromley is dead!" "No; what was the trouble?"

"Splinter of wood in his stomach." "How in the world did that happen?" "Eating club sandwiches."—New York Times.

BAD BLOOD, BAD COMPLEXION.

The skin is the seat of an almost endless variety of diseases. They are known by various names, but are all due to the same cause, acid and other poisons in the blood that irritate and interfere with the proper action of the skin.

To have a smooth, soft skin, free from all eruptions, the blood must be kept pure and healthy. The many preparations of arsenic and potash and the large number of face powders and lotions generally used in this class of diseases cover up for a short time, but cannot remove permanently the ugly blotches and the red, disagreeing pimples.

Eternal vigilance is the price of a beautiful complexion

when such remedies are relied on. Mr. H. Y. Shobe, 2742 Lucas Avenue, St. Louis, Mo., says: "My daughter was afflicted for years with a disgusting eruption on her face which resisted all treatment. She was taken to two celebrated health springs, but received no benefit. Many medicines were prescribed, but without result, until we decided to try S. S. S., and by the time the first bottle was finished the eruption began to disappear. A dozen bottles cured her completely and left her skin perfectly smooth. She is now seventeen years old, and not a sign of the embarrassing disease has ever returned."

S. S. S. is a positive, unflinching cure for the worst forms of skin troubles. It is the greatest of all blood purifiers, and the only one guaranteed purely vegetable.

Bad blood makes bad complexion. SSS purifies and invigorates the old and makes new, rich blood that nourishes the body and keeps the skin active and healthy and in proper condition to perform its part towards carrying off the impurities from the body.

If you have Eczema, Tetter, Acne, Salt Rheum, Psoriasis, or your skin is rough and pimply, send for our book on Blood and Skin Diseases and write our physicians about your case. No charge whatever for this service.

SWIFT SPECIFIC COMPANY, ALTAGA, WLA.

Science AND INVENTION

The bacillus of the grip is the smallest disease germ yet discovered.

The amount of blood in the human body is one-thirteenth of the body weight.

It has often been claimed that the presence of nickel in dust is a sufficient criterion to distinguish it as of cosmic rather than terrestrial origin.

It has lately been shown that nickel is found in soot, and hence that nickeliferous dust may be terrestrial. Gallium, also, is found in all aluminous minerals, in many flue dusts, in many iron ores, in soot and in atmospheric dust.

The cultivated oasis of Dakhla in the Libyan desert has a copious water supply, derived entirely from an underground bed of sand stone which is never visible. The water rises to the surface through wells, averaging about 400 feet in depth.

Many of these wells were made in ancient times, during the Roman occupation. They fertilize broad areas of cultivated lands, interspersed with palm groves. The success of this system of irrigation in Dakhla is interesting in connection with the project for supplying moisture to some of our Western plains which are similarly underlain by hidden supplies of water.

The continually increasing demand for India rubber, and the great interest manifested in all efforts to prevent the waste of the trees from which rubber is derived, have led our consuls in countries where these trees grow to collect many valuable facts concerning them.

Consul Goldschmidt at La Guaira recently transmitted to Washington some highly interesting statements about the rubber, or caoutchouc, trees, of the upper Orinoco by Dr. Lucien Morisse, who has made extensive personal investigations in that region.

Dr. Morisse makes the somewhat surprising statement that the prohibition of the Venezuelan Government against the felling of the trees is altogether unnecessary, because "it relates to an immense forest measuring upward of 74,000,000 acres, where caoutchouc exists in abundance, and which it would require millions and millions of hands to exploit, whereas it only contains three or four thousand Indians, not more than the tenth part of whom are engaged in the work."

Some interesting details have lately been published concerning the use of ozone in purifying water. Ozone is oxygen in a highly active condition and it occurs in small quantities in the air of the sea and of the mountains.

Near Berlin an establishment has been erected for the purpose of experimenting on the effects of ozone in ridding water of the microbes it contains. Ozonized air containing from 2 to 3 grams per cubic meter (a cubic meter equals 220.09 gallons and a gram is about 15 grains) is passed upward into a tower which is filled with flints and in its passage meets the water coming down and thus acts upon it.

It has been shown that as regards water from the Spree, the number of microbes was decreased from 600,000 per cubic centimeter (.061 cubic inch) to 10, which is practically nil. The total cost is set down at 35 cents per 1,000 cubic feet. Ozone has long been known as "nature's disinfectant," and its application to the purification of water becomes, therefore, a matter of great interest.

If the cost can be reduced this mode of purification may have a chance of widespread adoption.

JUST AS GOOD.

Backwoods Merchant Who Always Had What a Customer Wanted.

Abel Judkins kept the corner store in Centerville, and it was his boast that no man who patronized him need lack for anything he wanted, provided he had the wherewithal to pay.

Occasionally some unreasonable person would ask for a commodity not included in Abel's list; but if he did so, he was either provided with something which Mr. Judkins assured him was better than the article he had desired, or served exactly the same purpose, or he was made to feel that it was, for some dark and mysterious reason, no longer "carried" by any progressive and self-respecting shop.

When a carping summer resident, whose pair of ancient bellows, bought at an auction sale, had collapsed beyond repair, expressed surprise that no bellows were to be had of Mr. Judkins, the Centerville storekeeper turned upon him with a lofty smile.

"Folks here, ma'am," he said, coldly, "don't hold with getting so took up with old ideas, or being so narrow, as some of those that summer with us from below. The advances of civilization are prized here in this town, the air-tights with drafts are more thought of than old chimney fireplaces that require constant feeding and have to be blown on to keep 'em a-going."

He glanced at the summer resident, but could discern no special signs of weakening or humblity in her face. With a briskness which always marked his mercantile proceedings, he changed in a twinkling from the advocate of progress to the upholder of primitive methods.

"But folks will be folks, ma'am," he said, indulgently, "and if you like an open glow I don't know what's to hinder. And better than any bellows that ever were made, ma'am, is an oil-stalk. I can fit you out complete with three stout ones at this present, and when you've blown them out of usefulness, all you've got to do is to come to Abel Judkins and get some more."

CHANGE SECURED AT HOME. Value of New Surroundings for an Invalid Shown.

The doctor looked at his young patient with rather a dissatisfied air. "Why do you not get well?" he asked her, somewhat impatiently. "Your fever left you long ago, and you have no organic trouble, and yet you stay just in the same state day after day. You will hurt my reputation if you keep on in this way," he added, jokingly; but on leaving the room he spoke more seriously.

"She must be roused in some way," he said to her mother and the trained nurse who was in attendance.

The Change of Life

Is the most important period in a woman's existence. Owing to modern methods of living, not one woman in a thousand approaches this perfectly natural change without experiencing a train of very annoying and sometimes painful symptoms.

Those dreadful hot flashes, sending blood surging to the head until it seems ready to burst, and the faint feeling that follows, sometimes with chills, as if the heart were going to stop for good, are symptoms of a dangerous nervous trouble.

Things are Different in Boston.

Says the Boston Globe: "In taking her out sleigh riding, young man, be careful of that vaccinated arm."

That advice may do for Boston young men, but out here a sensible youth would rather forego the minor pleasure of the ride than be handicapped in that provoking manner.—Cleveland Plain Dealer.

Sister Ships. Mrs. Crimshaw—I see by this wireless telegraph, while at sea, one ship can communicate with another. Mr. Crimshaw—One ship can talk back to another?

"Yes." "Well, that's an additional reason why they should be called sister ships."

Put His Feet On It. "Did—did your wife ever bake a chocolate cake?" asked Nupied, cautiously.

"Loads of 'em," replied Oldwed, proudly. "Why?"

"Well, my wife baked her first one yesterday and placed it out on the porch to cool. I came along and thought the dent thing was a haddock."

—Ohio State Journal.

BISHOP SCOTT ACADEMY

Portland, Oregon. Founded 1874. A Home School for Boys. Military and Manual Training. Write for Illustrated Catalogue. ARTHUR C. NEWELL, Principal.

DON'T WEAR OUT THE CLOTHES

Rubbing them to pieces; use my Wash- ing Tablets. No rubbing required. Send 50 cents for sample package and full directions. W. O. POWELL, Box 606, Portland, Oregon.

WE WILL GIVE YOU

2 Hyacinth Bulbs FREE Or 6 Tulips. Together with our Complete Catalog for 1902, if you will send us a mail order, no matter how small. Write us, and make your selections from our Catalog. Springtime is here, and it is time for planting.

THE BEST POMMEL SLICKER IN THE WORLD

DEARS THIS TRADE MARK TOWER'S FISH BRAND. THOUGH OFTEN IMITATED AS A SADDLE COAT IT HAS NO EQUAL.
