In token of the appreciation felt by local prohibitionists of Prof. Kelsey's work here a purse of money was made up and presented to him.

A well to do gentleman named Baldwin, of Marshall, Minnesota, who visited here with Joseph Hall along in the winter, writes back that after a thorough tour of the West and Pacific Coast from Northern Washington to Southern California, he found no place that suited him so well as Newberg and that before long he intends to move here with his family. He has asked Mr. Hall to look out for a good place for him near town. All Newberg asks is a fair consideration of her many advantages on the part of Eastern people, and her share of immigration is secured.

Semon Madison made quite a sensation in town Monday evening by streaking it up the street on a two wheeled machine, without apparent effort. It was a case of "no push, no pull, all same goes like etc." as the pig tail celestial put it in regard to the electric car. The machine which is a Merkel motorcycle, manufactured at Milwaukee, Wisconsin, is really a bicycle, propelled by gasoline. It weighs about ninety pounds, has speed limits of five and twenty-five miles an hour, and is put on the market at a cost of one hundred and seventy-five dollars. Semon has taken the agency for the machine and will endeavor to introduce it into this territory.

The Yamhill county prohibition convention will be held at the county court house next Tuesday. As every good prohibitionist who is able to attend is considered a delegate, there is no cry of slated primaries, from which heart burning disappointments arise, and a regular love feast is the result. Should there be any dearth of candidates for the county offices, Newberg could make up a pretty good ticket alone.

How would the following do? State Senator, J. C. Lucas; representatives, N. L. Wiley, E. S. Craven; judge, W. M. Manning; sheriff, Howard Williams; school superintendent, Maude Willis; recorder, G. W. Mitchell; clerk, S. A. Mills; treasurer, M. Votaw.

Aspirants for political nominations at the hands of coming county conventions are expected to be on hand to mingle with the people, and it is desired that if possible a sufficient number of citizens be present to go on record among the candidates. It is expected to make the celebration a county affair and an invitation is extended to everybody to be present to see just what the company is doing and is preparing to do.

At the Multnomah prohibition convention held in Portland last Saturday, Rev. A. M. Bray was honored with the nomination for sheriff. Aaron has always proved faithful to the trusts imposed upon him, and while his friends have never thought of him in the role of sheriff, he will no doubt acquit himself with credit if elected to the position to which he aspires.

The touch of spring weather has quickened the pulse of the base ball fiends, and the local fans have been getting in action. Some have accepted positions on different teams for the coming season. Van Leavitt will probably play either with LaGrande or Oregon City, Charlie Parrott will play with the Monograms of Portland, while Bud Mills has allied himself with the Diamond W nine of Hillsboro.

It is reported that the idea of home telephone companies is rapidly seizing the people in other parts of the county. Dayton has organized a strong company, a representative of which was in Newberg the middle of the week, making arrangements to run their line on down in this direction and switch with Newberg. One of the college boys here who is spending his first year away from home at school essayed to get gay in playing an April fool joke on the old folks by writing home that he was going to be married. He was soon hustled up town by long distance telephone call, and politely informed with parental firmness that he wasn't going to do any thing of the kind. The boys consider that the joke is mostly on the biddable young man.

The best kind of an advertisement for any town or locality is to set out resolutely and enthusiastically to develop new industries. Joseph Hall received a letter a few days ago from a stranger in Kentucky, stating that an emigration of several families was soon to take place from his neighborhood; that he had noticed in a newspaper that Newberg was taking up the strawberry industry, and that if this place proved to be the town such enterprise indicated, they would probably decide upon Newberg as a place of location. The correspondent also said they desired to come to a temperance town which they understood Newberg to be. Rather a strange desire to be expressed by a Kentuckian.

Since Mr. Watson, the oil expert, visited our property we have passed out of the wild cat class referred to in our last week's ad, and moved up a peg, if not in, the sure thing class. Of course we are pleased to have any man claiming expert knowledge pronounce us as sure winners in our development for oil. Some people are skeptical of expert claims but nevertheless experts have cut a material figure in past discoveries of oil. To one who is putting money or time into development work, it is quite gratifying to have expert indorsement. Geological experts say we should find oil. Mr. Watson, who is the originator of an apparatus for which he claims the power to locate oil, a machine thoroughly tested in known oil fields, not only bears out the geological claim but is willing to back his machine's test with coin. All of this should prove of interest to the people of Yamhill county and the public in general. It's unfair for people to hold back their support who are able to realize that a good development of oil or coal will prove a valuable industry, the benefits of which no man can escape. We receive less support from those who will reap the greatest benefits. The company's intentions can not be questioned. Our possession of drilling outfit now located on drilling ground, with engagement of drilling crew, settles for all time doubts as to our ability to start the work. Now is the time to come to the front with your subscription. We have been progressive in our part of the business. The management have assumed obligations far greater than we have requested of any stockholder of record or prospective. All we ask is your co-operation to the extent of a few dollars, and if you, the business man and the land owner would come to the front with only such amount as horse sense would figure out you could afford to give to know that coal or oil existed, we would be financed and you would feel better.
