Eruptions

Dry, moist, scaly tetter, all forms of eczema or salt rheum, pimples and other cutaneous eruptions proceed from humors, either inherited, or acquired through defective digestion and assimilation.

To treat these eruptions with drying medicines is dangerous.

The thing to do is to take

Hood's Sarsaparilla and Pills

Which thoroughlycleanse the blood, expelling all humors and building up the whole system. They cure.

Hood's Sarsaparilla permanently cured J. G. Hines, Franks, Ill., of eczema, from which he had suffered some time; and Miss Alvina Wolter, Box 212, Algona, Wis., of pimples on her face and back and chafed skin on her body, by which she had been greatly troubled. There are more testimonials in favor of Hoods than can be published.

Hood's Sarsaparilla promises to cure and keeps the promise.

A Woman's Complexion.

In the spring, when the young man's fancy is lightly turning to thoughts of love, the young lady of fashion is spending her spare time over her complexion, for the winter months of close stifled rooms, late hours and the long round of dissipation demanded by society begin to tell strongly on the bloom of the feminine cheek and a thorough treatment must be given to tone up the system and bring back the freshness before summer arrives.

The first thing is to look well after the diet and see that it is wholesome and varied, and sufficient in quantity to keep up the strength.

Some skins in the spring of the year are subject to disfiguring eruptions and the most approved means of getting rid of this trouble is to take Vogeler's Curative Compound, which purifies, cools and cleanses the blood from all impurities, and removes every trace of skin eruptions. Beware of any and all external face and skin remedies, such as lotions, powders, soaps etc., many of which are absolutely dangerous, from the fact that they contain powerful chemicals, which have been known to mark and otherwise disfigure the face for life. Vogeler's Curative Compound is made wholly from purely vegetable ingredients, from the formula of one of London's most noted living physicians, and has no equal for beautifying the complexion, because it purifies and cleanses the blood and makes pure rich red blood. It also tones up the system, gives an appetite, ensures sweet and peaceful sleep, invigorates and strengthens the entire nervous organization. It makes people well.

MR. DOOLEY ON READING.

He Points Out a Popular Misapprehension.

Readin', me fri'nd, is talked about be all readin' people as though it was th' on'y thing that makes a man betther thin his neighbors. But th' truth is that readin' is th' nex' thing this side iv goin' to bed f'r restin' th' mind. With mos' people it takes th' place iv wurruk. A man doesn't think whin he 's readin', or if he has to, th' book is no fun. Did ye iver have something to do that ye ought to do, but didn't want to, an' while ye was wishin' ye was dead, did ye happen to pick up a newspaper? Ye know what occurred. Ye didn't jus' skim through th' spoortin' intillygince an' th' crime news. Whin ye got through with thim, ye read th' other quarther iv th' pa-per. Ye read about people ye niver heerd iv, an' happenin's ye didn't undherstand—th' fashion notes, th' theatrical gossip, th' s'ciety news fr'm Peoria, th' quotations on oats, th' curb market, th' real-estate transfers, th' marredge licenses, th' death notices, th' want ads., th' dhry-goods bargains, an' even th' iditoryals. Thin ye r-read thim over again with a faint idee ye'd read thim befure. Thin ye yawned, studied th' design iv th' carpet, an' settled down to wurruk. Was ye exercisin' ye-er joynt intelleck while ye was readin'? No more thin if ye 'd been whistlin' or writin' ye-er name on a pa-aper. If anny wan else but me come along they might say: "What a mind Hinnissy has! He's always readin'." But I w'u'd kick th' book or paaper out iv ye-er hand, an' grab ye be th' collar, an' cry, "Up, Hinnissy, an' to wurruk!" f'r I'd know ye were loafin'. Believe me, Hinnissy, readin' is not thinkin'. It seems like it, an' whin it comes out in talk sometimes, it sounds like it. It's a kind iv nearthought that looks ginooyne to th' thoughtless, but ye can't get annything on it. Manny a man I've knowed has so doped himsilf with books that he'd stumble over a carpet-tack.—Century.

SERVANT PROBLEM IN LONDON.

Men Being Imported to Take the Place of Women Domestics.

Of late London has despaired of solving the "servant girl problem," and has set about importing men to take the places of women in housework. They are bringing them across the channel by the shipload, and the servant girl is rapidly disappearing from the London household.

They call these male servants "generals," and there is no part of housework that they cannot do, from pressing my lord's trousers to combing my lady's hair. These "generals" get wages ranging from $50 to $300 a year. They are civil, clean and neat, and are accustomed to long hours.

This fresh field of labor especially appeals to the young man of continental Europe, as it gives him a chance to escape from army conscription. So far these men have proved themselves especially adapted for domestic work. The experience of the different nationalities is interesting. Germans have been found the best. They generally speak two languages, sometimes three, and make excellent house servants. Germany and France supply most of the demand. Italians and Swiss come next in numbers and qualities, but for good, rough, all-around work the people who take the lead are the Egyptians. For these people there is a growing demand, and the descendants of the Pharaohs are wrestling the pots and pans in many an English kitchen to the mutual satisfaction of employer and employed.

Although the wages of a male "general" in London run from $50 to $300 a year, the average pay is $70 a year for one who is not a cook and $120 a year for one who is.

HIGHER PAY FOR CLERGY.

A Comparison Between American and English Compensations.

When the new Episcopal palace of the diocese of New York is raised upon Cathedral Heights a fund will probably be provided whose income will be used to supplement the salary of the bishop. He now receives $12,500 a year. An endowment of slightly more than $30,000, of which a considerable portion is already raised, will yield the same income, making a total of $25,000.

From the most important Episcopalian diocese in America Bishop Potter draws but one-fourth of the pay of the bishop in London. The archbishop of York also receives $50,000 a year, while the English primate has $75,000, which maintains no inconsiderable state in Canterbury, a "city" little larger than a village. Even in this country there are many wealthy parishes whose ministers receive as high pay or higher than that of the bishop of the metropolitan diocese.

It's an old story that the salary of the average clergyman—the man in the ranks—is still miserably low, especially in the country. A prosperous congregation ministered to in constant anxiety by a cultured man whose life is one long struggle with poverty is hardly a spectacle to inspire either pride or piety. "The laborer is worthy of his hire," and he should receive it.—New York World.

Diameter of Jupiter.

The diameter of Jupiter, according to Professor T. J. J. See's new determination, is 88,203 miles; that of Mars 4,155 miles, and that of Mercury 2,637 miles.

If you should have occasion to scream for help, could you make yourself heard any considerable distance? The writer of this had a nightmare recently, and dreamed that he was being robbed. He screamed for help, and a boy sleeping in the next room did not hear him.

Our Working Girls.

Life to the most favored is not always full of sunshine, but to the average American girl or woman who is obliged to work for her living, and, perhaps to help others at home, life is often a heavy drag in consequence of illness.

Women who work, especially those who are constantly on their feet, are peculiarly liable to the development of organic troubles, and should particularly heed the first manifestations, such as backache, pains in the lower limbs and lower part of the stomach, irregular and painful monthly periods.

faintness, weakness, loss of appetite and sleep.

The young lady whose portrait we publish herewith had all these symptoms, and in addition leucorrhoea, and was cured by Lydia E. Pinkham's Vegetable Compound. First, she wrote a letter to Mrs. Pinkham's laboratory at Lynn, Mass., describing her trouble, received in reply accurate instructions what to do to get well, and now wishes her name used to convince others that they may be cured as she was.

The same helping hand, free of charge or obligation, is extended, to every ailing woman in America. If you are sick you are foolish not to get this valuable advice, it costs you nothing, and she is sure to help you. Don't wait until it is too late — write to-day.

A gentleman met recently a Harvard graduate of last June. "How goes it, Harry?" said he. "Oh, things are booming," replied the young man, cheerfully. "I don't get any pay yet, but I'm probably the best oiler of machinery in New England."—Boston Christian Register.

ECZEMA'S ITCH IS TORTURE.

Eczema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes nor other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

BAD FORM OF TETTER.

"For three years I had Tetter on my hands, which caused them to swell to twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Four doctors said the Tetter had progressed too far to be cured, and they could do nothing for me. I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble."—MRS. L. B. JACKSON, 1414 McGee St., Kansas City, Mo.

S. S. S. neutralizes this acid poison, cools the blood and restores it to a healthy, natural state, and the rough, unhealthy skin becomes soft, smooth and clear.

SSS cures Tetter, Erysipelas, Psoriasis, Salt Rheum and all skin diseases due to a poisoned condition of the blood. Send for our book and write us about your case. Our physicians have made these diseases a life study, and can help you by their advice; we make no charge for this service. All correspondence is conducted in strictest confidence.

SURGERY IN THE SOUDAN.

Insufficient Appliances at Hand Did Not Prevent Operations.

Good surgeons are often men of great ingenuity, and there are numerous cases on record of important and wholly satisfactory results accomplished with rude appliances. A writer who was with the British army in the Soudan, gives, in a New York paper, this illustration of a clever adaptation of means to a desired end:

After the Battle of Omdurman we brought back to Abadieh 121 wounded officers and men. Of this number there were twenty-one cases of which an accurate diagnosis could not be made by ordinary surgical means.

By the help of the Roentgen rays, however, we found the bullet or proved its absence in twenty out of these twenty-one cases, the remaining case being so ill with a severe wound in the lung that it was not considered justifiable to examine him at the time.

Of course we had no steam engine to generate electricity for us, and the desert heat had dissolved our specially prepared candles into their constituents.

Necessity, however, is the mother of invention, and we had recourse to a unique method. The pulley of a small dynamo was connected by means of a leather strap with the rear wheel of a tandem bicycle. Having carefully adjusted the circuit with the storage battery, and also with the voltmeter and ammeter, a warrant officer took his position on the seat of the bicycle and commenced pedaling. When fifteen volts and fourteen amperes were registered, the switch close to the handle of the bicycle was opened and the charging of the battery begun.

As the resistance became greater a sensation as of riding up-hill was experienced by the man on the seat, and the services of an additional orderly were requisitioned for the front seat of the tandem.

As this bicycle practice was generally indulged in in a temperature of 110 degrees in the shade, the orderlies were not sorry when, at the end of a half-hour, the switch was turned off and the machine brought to a standstill.
