Much to the delight of the small boy a company of the regulars from Vancouver, Washington, passed through town Friday morning on the way back after a summer march and encampment up the valley. It was of the artillery division and had eight or ten pieces.

Dr. and Mrs. Parker of Portland came up on the train Tuesday evening, the doctor to see Dr. H. J. Littlefield. The doctor and his wife were closely associated with the Littlefield family down in Arizona, the former having fully regained his health and strength down south.

It is generally understood that Dr. Littlefield is critically ill. Though he lies in a comatose state he seems to suffer a good deal of pain. Three or four Portland physicians have been up to see him but they have not been able to determine to their own satisfaction the exact nature of his illness.

E. C. Apperson of McMinnville, chairman of the pamphlet committee, which has in hand the arrangement of the matter to be included in the pamphlet advertising Yamhill, requests that any one having photographs of farm scenes, products and novelties, which they think would make good advertising features, to send the same to him at once.

It isn't near everybody that is privileged to take an outing at the sea side these summer days but most anybody can get away for a day's picnic now and then and the surrounding hills and their canyons offer some delightful "resorts" for such brief outings. One of the best of such retreats is found in the top of the Red hills west of town adjoining the Keyes place—comprising as it does, after a ride leading through "lovers' lane," a fine, grassy canyon as clean as a park, and a gurgling stream of mountain water fed by ice cold springs. If the pleasure seeker needs any assistance in acquainting himself with these surroundings or locating the best spring of water he will find it in F. T. Keyes, the hospitable patriarch of the Red hills who takes delight in making himself useful to visitors. A day thus spent "near to nature's heart" is far from wasted.

A back load of McMinnville citizens, made up of Prof. L. R. Alderman, Orville Hodson, J. G. Eckman, Elsie Wright, Dr. Leroy Lewis and M. B. Hendrick drove down to Newberg Friday morning to secure co-operation from the citizens in this part of the county toward getting out a pamphlet thoroughly advertising the resources of Yamhill county, said pamphlet to be put in the hands of the Harriman railroad people for systematic distribution in the East. A meeting of the business men here was held and the subject presented. The business men seemed disposed to take up the matter and render what assistance is in their power. The one hundred dollars which was left unexpended by the Fourth of July celebration committees will probably be turned over to the McMinnville people, together with some personal subscriptions amounting in all to an amount somewhere between one hundred and fifty and two hundred dollars. From a merely local standpoint the same amount of money could probably be expended with more results, but from a broader standpoint the investment will doubtless prove a good one in aiding to get Yamhill before the world.

The job of fire patrol generally lasts until the fore part of October, when the fall rains set in.

H. B. Gearin, who is the principal promoter of the proposed free ferry across the river at the foot of River street, was in town the first of the week, and says that after canvassing the matter at Salem, he finds much sentiment in favor of the enterprise in that vicinity and feels confident that the Marion county court will allow five hundred dollars annually toward maintaining the ferry if the Yamhill court will do likewise. A petition has been signed by the citizens of this vicinity urging our county court to act favorably in the matter. The free ferry is a much needed public enterprise, other than from a local standpoint, and it is not believed that the court will be so short-sighted as to turn it down.

Pres. H. E. McGrew, and Henry and Jim Mills arrived home safe and sound Friday evening from their trip to Mt. Hood feeling well paid for their time and labor expended. Under leadership of their veteran guide, O. C. Youcum, brother-in-law of the Robertson boys of this place, they left camp for the ascent a little before 4 o'clock in the morning and after a hard climb reached crater rock where they rested and ate dinner. Henry Mills remained here while the rest of the party continued the ascent, reaching the summit a little after two o'clock, where they were the first persons this year to register. The view was magnificent, Mr. Youcum declaring that he had never seen a better day for sight seeing.

The Chinese cook, Joe, of the steamer Leona, is a genius. He has constructed a model of a warship during spare moments, which is made of tin, and is 35 inches in length. It is propelled by dry batteries placed in the hold, and sails the water as proudly as her larger sisters. He gave an exhibition of it Wednesday evening at the wharf to a number of spectators. Joe is quite young, and has made several of these models, some of which have been sold and exhibited in Portland. He is a good cook, and the crew says he is not only a genius but also a gentleman. He has named his ship the Shanghai.—Reporter.

The monotony of the regular ride over the rural mail route was varied for Carrier Martin Monday by a lively train of fire works set off by the old mare. Calva said he was jogging along the road on the home stretch near the head of the valley when without premonition he suddenly found himself sitting in the road with dashboard, seat, and other appurtenances lighting about him and in adjacent fields, while the nag tore off down the road. He caught the treacherous beast, and not having a basket at hand in which to gather up the fragments, rode in horseback, empty handed, but none the worse off except for the loss of an old cart.

Danbar, a graduate of Oberlin, and superintendent of schools in Rock Springs and by Miss Everly, one of the teachers in the schools both being very sociable and highly cultured young people. They are making a tour of the Coast, and left here the middle of the week for Southern California. Prof. Danbar speaks in very high terms of Fred's services in the high school and says he is one of the most popular men they have ever had, which tribute is substantiated by the fact that he was unanimously re-elected as principal for next year. Rock Springs is a bustling and thrifty mining city of about five thousand inhabitants, being considered about the best town in the state.

Mr. A. L. Bergren, who returned a few days ago from a visit to Walla Walla, Washington, says that the liberal planting of shade trees has made that city a different looking place than when he last visited it. He says all the principal streets, both business and residence, are lined with beautiful shade trees which give the town an elegance in appearance which money cannot buy. As far as the country is concerned Mr. Bergren likes this much better, but to him our towns here look fat after becoming accustomed to the arboreal streets of Walla Walla. In his estimation a little enterprise in this direction is needed by our citizens toward making our little city more attractive to home-seekers.

E. M. Bridwell and J. O. Palmer went to Albany Tuesday for the purpose of inspecting the creamery at that place. These gentlemen have been quietly working out a plan for establishing a creamery at this place, and have canvassed the surrounding country and secured over 200 cows. It is the intention of the promoters to have the creamery established in a short time, and the plan determined upon is the same as at Albany, where the farmers have separators and the creamery company gathers the cream only, leaving the milk on the farm for feeding. These gentlemen are to be highly commended for their enterprise and the city and surrounding country is to be congratulated in having a creamery established here.—Register.

E. C. Ward arrived home the first of the week from his trip to Southern Oregon, where he found the fruit crop excellent. The condition of the prune crop out south is reversed from that here, there being a full crop of Italians but a light one of French. On a two and a half cent basis he contracted for over seven hundred tons of prunes, mostly in Douglas county. Mr. Ward is one of the heaviest individual shippers in the state.

"Let us spray" said H. H. Winslow the other day to George Manning, and the two accordingly got out the pump and solution and began work in the former's orchard. They, along satisfactorily until the old boss, thinking that the same results could be reached with greater celerity, concluded to do a little spraying on his own account. He made a flying start, tumbled young Manning out heels over head at the rear, and bolted around the orchard in record breaking time, easily distancing Mr. Winslow who aspired to do a little spraying himself in pursuit, the spraying solution being applied indiscriminately on all sides. The territory was covered with di-patch, but by the time it was all done over again the ambitious beast had occasion to reflect that "haste makes waste."
