The Oregon Fire Relief Association will be called upon to stand by its members who have lost property in the general destruction caused by fire in Clackamas and Multnomah counties. The members of the association should respond willingly and promptly to the call of an extra assessment which these heavy losses will more than likely necessitate. Prof. Kelsey announces that he has inaugurated a plan for solving the chicken nuisance problem and commends the same to a long persecuted public. For some time he has been farming his neighbor's poultry in his yard and flower gardens and finally the worn has turned—or rather the professor has, to be more exact. He has built a chicken pen into which he drives the offending interlopers, and feeds them well from a sack of wheat which he has purchased. Owners who call for missing property can have same by the payment of a toll of five cents a day. Also when the meat bill at the butcher shop runs a little high the chicken pen is drawn upon as a reserve, the solution of the problem thus becoming as toothsome as it is original. If this much mooted question proves to be thus solved, Prof. Kelsey's friends advise him to sail in on the trusts.
