The breaking out of the lacing of the big belt made trouble at the electric light plant Thursday night which came near being serious. Jay Mitchell, who is night operator, noticed the danger and jumped to shut off the power. Before the plant slowed down however the big belt came apart and hit the floor with a terrific whack missing Jay so barely as to make his hair assume the perpendicular. The belt wrapped itself about the big pulley, completely crushing it before things came to a standstill. The racket was so great as to awaken some of the neighbors and to call night watchman J. J. Woods post haste to the scene of trouble from the west end of town.

Lumber is on the ground and work has been commenced on Newberg's improved depot. It seems to be the intention of the company to put new cloth in the old garment—but probably there is not enough of the old piece of goods to affect the new pattern.

The big pile of sawdust at the sawmill has been burning since spring and the wind veered Sunday afternoon in a way to drive the fire toward the mill. The whistle was blown calling on all hands for help, and the fire was easily controlled.

H. F. Allen, who was called here recently by the illness of his father, is well located as manager of a big mercantile concern at Twin Falls, Idaho, the center of a new district for which he thinks there is a great future. The town has sprung up and made a rapid growth in the past two years, and H. F.'s company is now building a new \$20,000 brick store building.

As far as expression has been heard citizens seem to be highly pleased with the appearance of the new public school building, work upon which is being pushed rapidly. The building is in fact an improvement over the drawings in appearance, and it is an assured fact that Newberg will have the largest and finest structure in this section of the Willamette Valley.

The ringing of a strange bell on the Newberg railroad Monday morning caught the attention of those on the street who looked and saw a strange engine on the track, pulling a string of cars through town. It is the new purchase of the Newberg Pressed Brick & Terra Cotta Company, secured of the S. P. people who have been using it on one of their small branch lines out south.

At their regular meeting Tuesday night the Hook and Ladder boys reviewed their record with pride as defenders of the city against the ravages of the fire fiend, and suggested revoking the charter of the Hose Company for being derelict to duty in omitting to hold its regular meetings. After referring to Treasurer Sykes as to the condition of the exchequer however, a more satisfactory means of celebrating was suggested and on motion the company adjourned to Wilson's refreshment parlors where ice cream, water melon and other delicacies tended to wipe out the memory of dangers seen and unseen braved in behalf of the city. Those enjoying their own generous hospitality were Clarence Butt, F. H. Caldwell, Hugh Nelson, M. O. Pickett, W. C. Woodward, Si Hamnett, L. H. Shirley, Arthur Bashaw, A. C. Seeley, Roy Heater, D. D. Coulson, John Stratton and N. J. Sykes.

because

The Rushford is built for sturdy use, of the right stuff and in the right way—the wagon for the hardheaded farmer who rightly wants full value for every dollar. It's a wagon that stands the racket—has more real strength and wear than you ever saw for the same money; and yet a Rushford Wagon is neither over-heavy nor clumsy.

Forty years have gone to the making of the Rushford Wagon's reputation—you'll see why that counts if you'll look over ours. Want to show YOU a Rushford—come in and look—today.
