

ONLY NEEDS WATER

Boise and Payette Valleys in Idaho Is Very Rich.

ART NOW UNDER CULTIVATION

Proposed Government Irrigation Project Will Make the Arable Acres Four-Fold.

Boise, Idaho, Sept. 28.—October 14 board of consulting engineers of the reclamation service will meet here to determine whether construction should be ordered upon what is known as the Boise-Payette project. It is confidently expected construction will be ordered, as all the preliminaries have been completed and it is known the work will be done.

As one of the most complicated reclamation projects under consideration it is of great importance because of the large amount of land it is proposed to reclaim, because of the fact that the supply of water for lands which have not a sufficient amount of rainfall for their crops is so small, and because of the value of the lands when supplied with water, and because of the marked effect it will have upon the economy of this section of the state. It is complicated, not so much because of engineering problems, though these are interesting, but because of the private interests that are woven through the project in new and old parts of the valley.

In the Boise and Payette valleys there are about 100,000 acres of land under the proposed government project, which will be about 400,000 acres producing crops. These valleys are now regarded as among the most fertile and productive in the West. They support a large population and yield enormous crops of all farm products, together with large quantities of stock raising.

FIRE OF BRICK BUILDINGS IN

Spokane, Wash., Sept. 28.—A disastrous fire broke out in the heart of the wholesale and retail section of the city at 2:35 o'clock this morning, when completely destroyed three brick buildings. The loss will probably amount to \$250,000.

The cause of the fire is unknown. It broke out in the Cadbury building, which was filled with soap and candy, and spread with great rapidity to the weeks buildings on the east. Later the Booth-McClintock building, on the west corner of the block, caught fire. The four-story brick building on the east corner, occupied by the Spokane Drug company, was saved by a fire alarm.

All of the buildings on the east corner suffered losses in the fire, which destroyed half a block of buildings and their contents have announced their intention of rebuilding at once. The new buildings will be larger and more complete structures. Hundreds of people had personal property stored in the Pacific building, and the loss of this property is estimated variously at \$100,000 to \$200,000.

Washington, Sept. 28.—Secretary Hitchcock, in an interview, said: "After the land fraud cases in Oregon have been wound up, United States attorney Heney, who has been conducting them, will come to Washington and will be in charge of the cases in which Hyde, Dimond and others have been indicted. Later in there will be a trial of the case in which the government has secured millions of acres of land and millions more of dollars."

Stevens Showing Results. Panama, Sept. 28.—The Panama Canal zone, chief engineer of the Panama Canal zone, today announced the results of the work. The correspondence of the association from today United States, where the work has been pushed forward since the arrival of Mr. Stevens. Mr. Stevens informed the correspondence that the new 1,000-foot dock at La Boca would be finished by October 30.

Mail Service of the Yukon. Washington, Sept. 28.—Arrangements similar to those in operation last year have again been made to give the Postoffice department of the United States and Canada for the distribution of mail to the Yukon territory. The contract provides for a tri-weekly distribution during the season.

STORM WAS FURIOUS.

Typhoon in Philippines Much Worse Than First Reported. Manila, Oct. 2.—The intensity of last week's typhoon continues slowly to filter from the interior, but specific details are as yet hard to obtain, owing to the fact that telegraphic service has been paralyzed and it will be many days before the actual facts are known. The damage done to the islands is estimated at \$100,000,000. The earlier reports of the loss of life have been under-estimated. The facts are known the full list of dead will run well into the hundreds. The destruction of thousands upon thousands of native huts has been followed by a great loss of what is known as the "huts of the survivors, and it will require prompt action on the part of the authorities to relieve those in distress. The damage done to the islands is estimated, but will run well into the hundreds of thousands of dollars. This is a tremendous blow, inasmuch as the islands have been the main source of agricultural workers have been in a position to do their utmost with their hands and feet, and the results of the typhoon will be felt for many months.

WRIGHT WILL RESIGN.

Taft Reports Unfavorably on His Governor of the Philippines. San Francisco, Oct. 2.—The opinion has been expressed by prominent members of the senate that the governor of the Philippines, James F. Smith, who is on the Supreme bench of the Philippines, will likely soon resign. The good reason for their belief is that Lake E. Wright, of Memphis, Tenn., the present governor, will be recommended by President Roosevelt to be governor of the Philippines. The recommendation of Secretary of War Woodrow Wilson is expected to be made in the near future. The governor of the Philippines is expected to be in the United States in the near future. The recommendation of Secretary of War Woodrow Wilson is expected to be made in the near future. The governor of the Philippines is expected to be in the United States in the near future.

Fair on Portland Day. Portland, Oct. 2.—Portland day, with its 85,133 attendance, brought in the city's hour of greatest triumph. It was the crowning day in the success of the Lewis and Clark exposition, and the city was proud of the success of the exposition.

John A. Dowie Paralyzed. Chicago, Oct. 2.—John Alexander Dowie, the Christian Catholic, who was struck by a train in the city of Chicago, today announced that he was paralyzed. He had been in the city of Chicago for some time, and his condition was expected to be permanent.

Constantinople, Oct. 2.—The arrival at Hodeida Yemen, of the British ship, promises to lead to a speedy settlement of the British claims in connection with the British dhows in the Red sea. The command of the British ship is expected to be in the near future.

Snow Storm in Nevada. Tonopah, Nev., Oct. 2.—A heavy snow storm, which swept over Southern Nevada, today caused a great deal of damage. The snow was expected to be in the near future.

Boycott Still Active. Washington, Oct. 2.—United States Consul General Day, at Canton, Ohio, has sent a telegram to the State department regarding the Chinese boycott against American goods. He says the situation is bad and that the feeling against foreigners is continuing. He expresses the opinion that the boycott ought to be a natural death, but it seems to be lingering.

BRIGHT'S DISEASE

DRIFTING TOWARDS

Many people who are neglecting symptoms of kidney trouble, hoping it will wear away, are drifting towards Bright's Disease, which is kidney trouble in one of its worst forms.

FOLEY'S KIDNEY CURE

Regularities, strengthens the urinary organs and builds up the worn-out tissues so they will perform their functions properly. Healthy kidneys strain out poisons from the blood as it passes through them. Diseased kidneys do not, and noxious waste matter is carried by the circulation to every part of the body, causing dizziness, backache, stomach trouble, sluggish liver, irregular heart action, etc. I have never had a return of any of these symptoms during the four years that have elapsed, and I am evidently cured to stay, and I heartily recommend Foley's Kidney Cure to any one suffering from kidney or bladder trouble."

How to Find Out. You can easily determine if your kidneys are out of order by setting aside for 24 hours a bottle of the urine passed upon arising. If upon examination it is cloudy or milky or has a brick-dust sediment or small particles float about in it, your kidneys are diseased, and FOLEY'S KIDNEY CURE should be taken at once.

G. B. Burhans Testifies After Four Years. G. B. Burhans of Carlisle Center, N. Y., writes: "About four years ago I wrote you stating that I had been actively cured of a severe kidney trouble by taking less than two bottles of Foley's Kidney Cure. It entirely stopped the brick-dust sediment and pain and symptoms of kidney disease disappeared. I am glad to say that I have never had a return of any of those symptoms during the four years that have elapsed, and I am evidently cured to stay, and I heartily recommend Foley's Kidney Cure to any one suffering from kidney or bladder trouble."
