

A Hair Dressing

Nearly every one likes a fine hair-dressing. Something to make the hair more manageable; to keep it from being too rough, or from splitting at the ends. Something, too, that will feed the hair at the same time, a regular hair-food. Well-fed hair will be strong, and will remain where it belongs—on the head, not on the comb!

Didn't Write to Her.
Little Dorothy came hurrying home from school to tell in glowing terms about her new teacher, says the New York World.
"What's her name?"
"I don't know," said Dorothy.
"Why, then, how do you address her?"
"Why," answered Dorothy, "we do not write to her."—New Orleans Picayune.

The Practical View.
"What I want," sighed the enthusiastic young star, "is one of the delicate, dainty roles which take the soul into Arcady."
"That's all very well, traveling the gentle path of dalliance to Arcady," said the heavy villain, "but let me tell you it's lots more satisfactory in the long run to get the fat parts that lead to the pork barrel."—Baltimore American.

Hint.
We show the duke about New York. "This," we explain, "is Wall street." His grace yawns.
"Er—where is Brad street, dontye know?" he asks.
The ladies of the party are much agitated; it is the first hint our distinguished guest has let fall.—Puck.

Had No Kick Coming.
"I suppose," said the young widow, coyly, "that you have been unfortunate in your love affairs."
"On the contrary," rejoined the middle-aged bachelor, "I have been exceedingly fortunate. I never fell in love with a woman who would have me."

Simple Life.
Aunt Mary—The idea of you marrying young Wiggins! Why, he can't raise enough money to buy a square meal.
Pretty Niece—Oh, that doesn't matter; we are going to visit among our relations.

Queens Taller than Kings.

There is hardly a king in Christendom to-day whose wife does not over-top him by a head.
King Edward is quite six inches shorter than Queen Alexandra.
The Czar is overtopped a full head by the Czarina.
Kaiser Wilhelm is of the medium height, but the German Empress is tall, and that is why the proud Kaiser will never consent to be photographed beside his wife, unless she sits while he stands.

The King of Italy, short and squat, hardly comes up to the shoulders of the tall, athletic Queen Helena.
The King of Portugal, though father, is less tall than his Queen.
Even the Prince of Wales is shorter a good four inches than the Princess.
The young King of Spain is several inches shorter than his new bride.
The Queen of Denmark towers above her royal spouse.

Indianapolis Banking Facilities.

There are in Indianapolis, where the National Editorial association convenes in June, seven national banks with a total capital of \$5,000,000 and total deposits of \$33,400,000. The total surplus and undivided profits are \$2,725,000. In addition there are six trust companies with a total capital of \$2,475,000; the surplus and undivided profits, \$1,210,000, and total deposits, \$10,300,000. All the banks of Indianapolis are in excellent condition, earning fair dividends and entirely worthy of all confidence.

Friendship's Tribute.

"Didn't the wedding go off nicely?" exclaimed Miss Sweetin, enthusiastically.
"Yes," said Miss Tartun, "except that poor, dear Fan needn't have been quite so prompt in making her responses. She hadn't the slightest reason to fear that Jack would repent and back out when she had him actually at the altar."

A Farmer's Irrigation.

Under above caption in a recent issue of The Furrow, the following article appeared:
"There is at least one man in the rain belt region of the United States who has solved the drouth problem, and in overcoming his drouth nightmare he has somewhat unexpectedly discovered that every year brings a drouth, to a greater or less extent. 'I have put in, as you see,' he said to me, 'a simple plan of irrigating some of my land from a little stream running through the piece which I thought would give me erop insurance during dry years; but it has taught me that never a year goes by that there is not some period or periods of greater or less extent that a watering does not greatly increase the crop. I can observe accurately, because I write my irrigated crops growing practically alongside those which get only rainfall for their watering.'

"This farmer's discovery of the efficiency and ease of irrigating was in a measure accidental. A little stream which showed a capacity—in July—of about six cubic feet per second, or say, 2,500 gallons a minute, which is a much smaller stream than the figures would indicate to the unwary, runs with a slight fall through a piece of rich bottom land and at one point near its lower end had been dammed by the boys to form a bathing pool. Several years ago, while in the midst of a destructive drouth which was burning up the crops even on this usually moist bottom land, the farmer raised this dam by throwing in earth with the help of a plow and scoops, and crudely flooded several acres of cabbages, melons and some recently planted late corn. The result was so satisfactory and the idea of overcoming nature so fascinating, that the next year, after the spring high water season, a more substantial dam was put in at the head of the field which enabled the flooding of the entire bottom, with a little rough surveying to find the levels. The yield is stated to have been enormous, and while the farmer's tendency has been to over-irrigate, he is learning more than he ever knew before about the great productive capacity of land which has enough water at the right time, and also the great response which comes from heavily manured soil when well supplied with water. His dam is a cheap affair, built entirely by labor on the farm, and largely reconstructed each year. It has no storage capacity, the irrigation depending entirely upon the regular flow."

With the loss of no time or labor and at considerably less expense could this farmer have secured the same, and even better, results by the hydraulic ram. It works automatically after once being started, both nights and Sundays, too, just the same as interest and just as safely. It requires no attention whatever, and need not be rebuilt every year as does the dam. It does more than merely to furnish water for irrigating purposes. Pure water for the house and barn is also supplied. Every enterprising farmer should investigate this ram subject if it is only with the view of supplying water to the house to make it easier for his wife.

THE KING OF BLOOD PURIFIERS

No other remedy has given such perfect satisfaction as a blood purifier and tonic or is so reliable in the cure of blood diseases of every character as S. S. S. It is known as "The King of Blood Purifiers," and the secret of its success and its right to this title is because "IT CURES DISEASE." It is an honest medicine, made entirely of purifying, healing roots, herbs and barks, which are acknowledged to be specifics for diseases arising from an impure or poisoned condition of the blood and possessing tonic properties that act gently and admirably in the up-building of a run-down, weakened or disordered condition of the system.

One of the greatest points in favor of S. S. S. is that it is the only blood remedy on the market which does not contain a mineral ingredient of some kind to derange or damage the system. It is the one medicine that can be taken with absolute safety by the youngest child or the oldest member of the family, and persons who have allowed their systems to get in such condition that most medicines are repulsive to the stomach will find that S. S. S., while thorough, is gentle and pleasant in its action, and has none of the nauseating effects of the different mineral mixtures and concoctions offered as blood purifiers.

As every part of the body is dependent on the blood for nourishment and strength, it is necessary that this vital fluid be kept free from germs and poisons. So long as it remains uncontaminated we are fortified against disease, and health is assured; but any impurity, humor or poison acts injuriously on the system and affects the general health. Pustular eruptions, pimples, rashes and the different skin affections show that the blood is in a feverish and diseased condition as a result of too much acid or the presence of some irritating humor. Sores and Ulcers are the result of morbid, unhealthy matter in the blood, and Rheumatism, Catarrh, Scrofula, Contagious Blood Poison etc., are all deep-seated blood disorders that continue to grow worse as long as the poison remains.

But all blood diseases are not acquired; some persons are born with an hereditary taint in the blood and we see this great affliction manifested in many ways. The skin has a waxy, pallid appearance, the eyes are often weak, glands of the neck enlarged, and as the taint has been in the blood since birth the entire health is usually affected.

In all blood troubles S. S. S. has proved itself a perfect remedy and has well earned the title of "KING OF BLOOD PURIFIERS." It goes down into the circulation and removes all poisons, humors, waste or foreign matter, and makes this stream of life pure and health-sustaining. Nothing reaches inherited blood troubles like S. S. S.; it removes every particle of the taint, purifies and strengthens the weak, deteriorated blood, and supplies it with the healthful properties it needs and establishes the foundation for good health. As a tonic this great medicine has no equal, and it will be found especially bracing to weak, anaemic persons. Rheumatism, Catarrh, Sores and Ulcers, Skin Diseases, Scrofula, Contagious Blood Poison and all other blood troubles are cured permanently by S. S. S., and so thorough is the cleansing of the blood that no trace of the disease is left to break out in future years or to be transmitted to offspring. If you are in need of a blood purifier get "THE KING" of them all, S. S. S.—and god results are assured. Book on the blood and any medical advice desired furnished without charge to all who write.

Deafness Cannot Be Cured
by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflammation of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.
We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circulars, free.

Gentlemen—S. S. S. is used as a family medicine in our home. I myself have taken and always found it what it is claimed to be. It thoroughly cleanses the system of impurities, increases the appetite, improves the digestion, and builds up the general health. I have given it to my children with fine results. It promptly restores the appetite and clears the skin of all eruptions. It is a very fine blood tonic and has my hearty endorsement.
