

HON. W. H. KELBAUGH
OF WEST VIRGINIA
PRAISES PE-RU-NA

Hon. W. H. Kelbaugh.

A Cold at Any Time of the Year, Especially in Hot Weather, is Very Depressing to the System. Pe-Ru-na is an Ennequated Tonic for Such Cases, Read What People Say About It.

Hon. W. H. Kelbaugh, Ex-Member W. Va. Legislature, 204 9th street, N. E., Washington, D. C., writes: "You can use my name and word at all times for Pe-Ru-na as a medicine and tonic unqualified. I have tried it for a stubborn cold and badly run down system. I tried all sorts of other medicines and paid several expensive doctor bills. Pe-Ru-na cured me, strengthened me more than ever, and saved me money."

Mrs. Clara Litterer, Seaford, Ind., says: "Last fall I took a severe cold. I took Pe-Ru-na, began to improve and kept on so until I was able to do my work."

If the Mississippi valley were as densely populated as Massachusetts, it would have 350,000,000 inhabitants.

Mothers will find Mrs. Winslow's Soothing Syrup the best remedy to use for their children during the teething period.

"Come, come, old boy, brace up! You know that faint heart ne'er won fair lady." "But she's a brunette."—Cleveland Plain Dealer.

Cataract Cannot be Cured
with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Cataract is a blood or constitutional disease, and in order to cure it you must take internal remedies. Hall's Cataract Cure is taken internally, and acts directly on the blood and mucous surfaces. Hall's Cataract Cure is not a quick medicine. It was prescribed by one of the best physicians in this country for years, and is a regular prescription. It is composed of the best ingredients, combined with the best blood purifiers, acting directly on the mucous surfaces. The perfect combination of the two ingredients is what produces such wonderful results in curing Cataract. Send for testimonials free. F. J. CHENEY & CO., Props., Toledo, O. Sold by druggists, price 75c. Hall's Family Pills are the best.

Obedient Instructions.

OLD Favorites

The Bivouac of the Dead.
The muffled drum's and roll has beat
The soldier's last tattoo;
No more on life's parade shall meet
That brave and fallen few.
On fame's eternal camping ground
Their silent tents are spread,
And Glory guards, with solemn round,
The bivouac of the dead.

No rumor of the foe's advance
Now swells upon the wind;
No troubled thoughts at midnight haunt
Of loved ones left behind;
No vision of the morrow's strife
The warrior's dream alarms;
No braying horn nor screaming file
At dawn shall call to arms.

Their shivered swords are red with rust,
Their plumed heads are bowed;
Their haughty banner, trailed in dust,
Is now their martial shroud.
And plenteous funeral tears have washed
The red stains from each brow,
And the proud forms, by battle gashed,
Are free from anguish now.

The neighing troops, the flashing blade,
The bugle's stirring blast,
The charge, the dreadful cannonade,
The din and shout, are past;
No war's wild note nor glory's peal
Shall thrill with fierce delight
Those breasts that never more may feel
The rapture of the fight.

Like the fierce northern hurricane
That sweeps his great plateau,
Flushed with the triumph yet to gain,
Came down the serried foe.
Who heard the thunder of the fray
Break o'er the field beneath,
Knew well the watchword of that day
Was "Victory or Death."

Long had the doubtful conflict raged
O'er all that stricken plain,
For never fiercer fight had waged
The vengeful blood of Spain;
And still the storm of battle blew,
Still swelled the gory tide;
Not long, our stout old chieftain knew,
Such odds his strength could bide.

'Twas in that hour his stern command
Called to a martyr's grave
The flower of his beloved land,
The nation's flag to save.
By rivers of their fathers' gore
His first-born laurels grow,
And well he deemed the sons would pour
Their lives for glory, too.

Full many a mother's breath has swept
O'er Angostura's plain,
And long the pitying sky has wept
Above its mouldered slain.
The raven's scream, or eagle's flight,
Or shepherd's pensive lay,
A lone awakes each sullen height
That frowned o'er that dread day.

Sons of the Dark and Bloody Ground,
You must not slumber there,
Where stranger steps and tongues re-
sound.
Along the heedless air,
Your own proud land's heroic soil
Shall be your fitter grave;
She claims from war his richest spoil—
The ashes of her brave.

Thus 'neath their parent turf they rest,
Far from the gory field,
Borne to a Spartan mother's breast
On many a bloody shield;
The sunshine of their native sky
Smiles sadly on them here,
And kindred eyes and hearts watch by
The heroes' sepulchre.

Rest on, embalmed and sainted dead!
Dear as the blood ye gave;
No impious footstep here shall tread
The herbage of your grave;
Nor shall your glory be forgot
While Fame her record keeps,
O Honor points the hallowed spot
Where Valor proudly sleeps.

You marble minstrel's voiceless stone
In deathless song shall tell,
When many a vanished age hath flown,
The story how ye fell;
Nor wreck, nor change, nor winter's blight,
Nor Time's remorseless doom,
Shall dim one ray of glory's light
That glids your deathless tomb.
—Theodore O'Hara.

LOSING BRAZIL TRADE.

Lack of Merchant Marine Puts United States Far in Rear.

Brazil is a country of varied and wonderful resources and, with the introduction of proper machinery and up-to-date methods, its development would be extended so that within a few years it would produce enormously and take rank among the leading commercial countries in the world, says the New York Tribune. Its export trade is advancing now at a very rapid rate, especially that in rubber, which amounts to millions of dollars annually.

The introduction of the bicycle, the automobile and other rubber-tired vehicles has given the rubber production an impetus which has caused it to forge to the front as the leading export of the country.

The coffee trade is also being extended rapidly, having a healthy growth to its credit. The United States purchases one-half the coffee exported from Brazil, which, during the fiscal year ended with June 30, 1904, amounted in value to \$46,922,974.

Of the three leading nations which sold their products to Brazil in 1904 Great Britain ranks first, with \$34,976,260 to its credit, or 28 per cent of the total amount of her imports. Germany comes second, with \$15,975,118, or 12 per cent, and the United States third, with \$14,081,970, or 11 per cent. The great disparity of the amount of goods sold by Great Britain and the United States to Brazil presents a problem for the manufacturers and exporters

of this country which must be solved if their trade with that and other South American countries is to be extended.

Of Britain's imports in 1904 the leading articles were the manufactures of cotton, which amounted to \$18,744,912; manufactures of iron and steel, \$16,197,644; breadstuffs, \$13,800,731; wine, \$7,685,625; provisions, \$7,207,480, and coal, \$6,183,638. Of all these, with the possible exception of wine, the United States is a manufacturer, or agricultural producer, and it seems absurd that Brazil should be obliged to seek them in Europe instead of from her North American neighbor.

Of the exports from Brazil during the same period coffee and rubber comprised the principal articles. For the six months ended June 30, 1904 and 1905, the value of coffee exported amounted to \$31,113,915 and \$33,449,641, and the value of the rubber to \$29,443,877 and \$39,610,439, respectively. This shows an increase in rubber exports of \$10,166,562 for the six months under review.

In recent years a large amount of foreign capital has been invested in Brazilian enterprises, especially in the city of Rio Janeiro. German capitalists have established steamship lines for coast service, and American and Canadian capitalists have acquired the car lines, gas works and telephone service at Rio Janeiro, the money invested being closely estimated at \$25,000,000.

This, however, is only the beginning of the invasion of Brazil by foreign enterprise. There is a determined movement now being made to revolutionize the trade conditions there. The United States is reaching out to grasp what it considers to be its fair share of the trade which has been controlled so long by Great Britain and Germany. The greatest obstacle in the way of its passage to the desired goal is the weakness of the merchant marine of this country. American exporters have not the facilities for transporting their goods to Brazil which are enjoyed by their rivals in Europe, and until this obstacle is removed the progress of American trade must necessarily be slow.

The record of the ports of Brazil for the year 1904 is a sad one for study by American exporters. During the year 17,407 sailing vessels and steamers entered the ports, with an aggregate tonnage of 11,879,563, being an increase of 1,339 in the number of vessels and \$11,285 in the tonnage, and of these the American flag is represented as among the 299 of "other countries" not specified because of the small number of their ships.

BEAUTIFUL AND CLEVER.

Baroness Rosen One of the Most Popular Women in Washington.

One of the most beautiful and clever women in Washington is Baroness Rosen, wife of the Russian ambassador.

She is the confident and adviser of her husband and nothing is done by the latter unless the baroness is first consulted. The latter is well acquainted with American ways, having been with her husband when he was consul general at New York and likewise at Washington when he was charge d'affaires there. It was in Washington that their only child, Miss Elizabeth, now a sprightly girl of 16, was born. Baroness Rosen is the daughter of Gen. Odintzoff, a famous Russian soldier and governor of Nijni Novgorod. She takes a prominent place in Washington society and has made many friends both for herself and her husband by her cleverness, tact and great beauty.

A Veteran.
A member of the bar of Baltimore relates how a witness in a trial suit in that city once "got back" at the lawyer who had been endeavoring to "rattle" the witness by a severe cross-examination.

At a certain point in the proceedings the witness suddenly interrupted the cross-examining lawyer by exclaiming: "Look here! You needn't think you kin rattle me by askin' all them questions."

"No?" was the sarcastic rejoinder.
"No, sirree!" came in emphatic tone from the refractory witness. "Your questions don't bother me at all. I've raised three sons and two grandsons, and I've been in training a good many years."—Harper's Weekly.

Overshot the Mark.

Mrs. Houston—I don't believe you ever want to work.

Wearily Willie—Oh, honest, lady, many's the time. But I'm such a strenuous fellow that every time I start ter go ter work I go clean past it.—Philadelphia Press.

Writing by Proxy.

Newman—The idea of saying that Penman doesn't write the books that are published over his name! Why, he keeps two secretaries busy!

Criticus—Yes, one writing and the other dictating.—Translated for Tales from Le Figaro.

Sadness of It.

Singleton—The only relations I have are distant.
Wedderly—Hub! You're in luck. All mine are near enough to visit me.
—Chicago News.

If a man make a change in business against his wife's wishes, and it proves a mistake, how he does catch it for the balance of his life!

Science AND Invention

Explosive rock has been reported from the north of the Tauern tunnel in Austria. The rock is in such compression that, without warning, slabs several yards in dimensions will be suddenly hurled from one wall to the other. Fatal accidents have resulted.

San Francisco's earthquake was felt and duly registered by the seismograph of the Zikawei observatory, near Shanghai, China. The perturbation was rather strong, and the commotions propagated through the earth's crust lasted a little over one hour and thirty-four minutes.

Pontypool, England, is anxious about the electric cable that runs through the town. The corporation surveyor asserts that several horses have taken fright owing to the electric current catching their shoes and throwing them on their haunches. A town councilor said the streets were "full of current," and that "the town might be blown up at any moment."

Acetylene is being used as an explosive in Germany, where it has proven disappointing as an illuminant. Each cartridge contains an ounce and three-fourths of calcium carbide, yielding about sixteen quarts of acetylene, and after wetting the carbide the confined mixture of generated gas and air is exploded by an electric spark. In blasting the rock is not thrown out, but is broken up into pieces small enough to be readily removed.

In liquefying helium, the last of the gases that have been thought to be permanent, Olszewski has reached a temperature of 271.3 degrees below zero Centigrade. This is a cold about 11 degrees greater than Dewar obtained three years ago in liquefying hydrogen, and is within about 2 degrees of the supposed absolute zero. The question has now been raised whether 273.7 degrees below the freezing point of water is really the absolute zero.

The continuous expansion of the steel industry, and the consequent call for improvement in the qualities of the metal, have led to many experiments that have produced, in some cases, surprising results. Every one knows the extraordinary effects of mingling a little nickel with steel. But the possibilities of steel alloys have apparently only just begun to be explored. One of the latest of the valuable results attained by the experimenters is due to an intermixture of a little vanadium. Steels containing from 2 to 12 per cent of nickel have both their tensile strength and their elastic limit increased by the addition of not more than 1 per cent of vanadium. This is especially true when the steel is tempered by heating to about 850 degrees Centigrade, and cooling in water at atmospheric pressure.

It is generally known that the colors of vegetation vary in intensity in a direct ratio to the amount of sunlight combined with coolness of temperature, within certain limits. Examples are the intense redness of apples grown in northern climates, and the deep colors of Alpine vegetation. But the soil, and other influences, also have an effect upon plant colors. Henry Kraemer has recently experimented upon the artificial control of the colors of plants through the introduction of chemicals into the soil they grow in. In very small quantities such chemicals are absorbed without apparent injury, but the effect upon the colors is slight. Yellow roses, for instance, appeared to become deeper in color under the influence of aluminum sulphate and potassium sulphate. With the use of these same chemicals the petals of the white carnation showed a tendency to develop red streaks, whereas when fed with ammonium sulphate, aluminum sulphate, iron citrate and citric acid, scarlet carnations tended to form white streaks.

THE YOUNGEST FARMER.

McLean County, Illinois, is noted for its agricultural predominance the world over, and it now claims to possess the most juvenile farmer on record. John Harpole Wiley is his name, and he is seven years of age. The lad handles a team of large horses with perfect ease and can also plow and use the mowing machine. In spite of his tender years and rugged life he is a sturdy lad and insists on putting in a full day's work.

Permission Granted.

The following incident is related of Nat Goodwin, the actor. Not long ago Goodwin was standing on the corner of Broadway and 34th street, where three car lines converge, when a seedy-looking individual, apparently from the country, approached him questioningly.

"I want to go to the Brooklyn Bridge," he said, looking in perplexity at the cars rushing in six different directions.
"Very well," said Goodwin, severely; "you can go this time, but never ask me again."—Harper's Weekly.

A bank isn't necessarily solid because it has a stone front.

Too Much of a Good Thing.
"Even assuming that humor is the salt of life, we don't want to eat salt with a spoon. But here in America everything seems to be sacrificed to humor. Your politics have to be made humorous. Your courts of justice have to amuse." Before a great time has gone by, you will be having funny sermons. We shall hear that Rev. Mr. So-and-so's Sunday morning sermon was a real screamer—that it was received with roars of laughter. Then the church service will be considered a bit too slow, and will have to be rewritten by some bright young humorist from a newspaper office. Your very murder cases will have to be made 'bright.' It is a foregone conclusion that domestic tragedies shall be sidesplitting. I really am not sure that in time America will not get a comical funeral service, with a low-comedy undertaker."—Jerome K. Jerome in the Cosmopolitan.

Even Persian Cats Furr.
Phoebe was the 4-year-old daughter of a missionary to Persia, born in that land of Oriental ease and hospitality; and her little mind was imbued with such ideas of mutual compliment and her little tongue so given to graces of speech that her New England grandmother had many a shock.

The morning after the little girl arrived at the grandmother's home the old lady was brushing out Phoebe's curls, gloating over her after the fashion of grandmothers.

"My little phoebe-bird!" she said over and over again.

"Why do you call me phoebe-bird?" asked the child at last.

"Here in America we have a bird that says 'Phoebe! phoebe!'" explained her grandmother.

The child smiled, and her mother, standing by, knew what was passing in Phoebe's mind. Not so the grandmother, who finished her task reluctantly at last, and then stooped down for a kiss.

"In Persia," said Phoebe, in her most caressing tone, "we have one old cat, who says 'Dranma! dramma!'"

My Hair is Scraggly

Do you like it? Then why be contented with it? Have to be? Oh, no! Just put on Ayer's Hair Vigor and have long, thick hair; soft, even hair; beautiful hair, without a single gray line in it. Have a little pride. Keep young just as long as you can.

"I am fifty-seven years old, and until recently my hair was very gray. But in a few weeks Ayer's Hair Vigor restored the natural color to my hair so now there is not a gray hair to be seen."—J. W. HANCOCK, Boulder Creek, Cal.

Made by J. C. Ayer Co., Lowell, Mass. Also manufactured at SARRAPATILLA, P.I.S. CHERRY PECTORAL.

Where He Excelled.
Church—What degree did your son get at college?
Gotham—S. S.
"Never heard of such a degree."
"Oh, yes you have. Short stop."—Yonkers Statesman.

You Can Get Allen's Foot-Ease FREE.
Write Allen S. Olmsted, Le Roy, N. Y., for a free sample of Allen's Foot-Ease. It cures sweating, hot swollen, aching feet. It makes new or tight shoes easy. A certain cure for corns, ingrowing nails and bunions. All druggists sell it. 25c. Don't accept any substitute.

Corroborative.
Caller—Don't you consider Prof. Jones by a man of much practical wisdom—not at all conceited or opinionated, you know, but full of accurate knowledge and plain common sense?
Mrs. Lapsing—Yes, indeed; I think he's one of the most saponacious men I ever met.

CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, Imitations and "Just-as-good" are but Experiments, and endanger the health of Children—Experience against Experiment.

What is CASTORIA
Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhoea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

The Kind You Have Always Bought Bears the Signature of

Chas. H. Fletcher
In Use For Over 30 Years.

THE CENTAUR COMPANY, 27 MURRAY STREET, NEW YORK CITY.

How to Exercise the Bowels

Your Intestines are lined inside with millions of little suckers, that draw the Nutrition out of food as it passes them.

But, if the food passes too slowly, it decays before it gets through. Then the little suckers draw Poisons from it instead of Nutrition.

This Poison makes a Gas that injures your system more than the food should have nourished it.

You see, the food is Nourishment or Poison, just according to how long it stays in transit.

The usual remedy for this delayed passage (called Constipation) is to take a big dose of Castor Oil.

This merely makes slippery the passage for unloading the current cargo. It does not help the Cause of delay a trifle.

It does slacken the Bowel-Muscles more than ever, and thus weakens them for their next task.

Another remedy is to take a strong Cathartic, like Salts, Calomel, Jalap, Phosphate of Sodium, Aperient Water, or any of these mixed.

What does the Cathartic do? It merely flushes-out the Bowels with a waste of Digestive Juice, set flowing into the Intestines through the tiny suckers.

But, the Digestive Juice we waste in doing this today is needed for tomorrow's natural Digestion. We cannot afford to lose it.
That's why Cascarets are the only safe medicine for the bowels.

IF FREE TO OUR FRIENDS!
We want to send to our friends a beautiful French-designed, GOLD-PLATED BONBON BOX, hard-enamelled in colors. It is a beauty for the dressing table. Ten cents in stamps is asked as a measure of good faith and to cover cost of Cascarets, with which this dainty trinket is loaded.
Send to-day, mentioning this paper. Address Sterling Remedy Company, Chicago or New York.
