

THE BIG CANNERY.

Building to Be One Hundred by Three Hundred Twenty-one Feet. Work Already Begun.

If anyone feels at all skeptical about the building of the big cannery that has been promised for Newberg, let them take a little time off and visit the site of the plant on the railroad in the north part of town, and they will be convinced that the Weber-Bussell people were not talking through their hats when they made the proposition to build a cannery in Newberg. It is evident that they are not dealing in hot air, if they do hail from the Puget Sound country, where it is supposed to be somewhat breezy at times.

Even before our people had completed their part of the contract regarding the site, they had a man clearing off the grounds and lumber and gravel for the concrete piers were also being placed on the grounds. A few days ago H. H. Hougey, a representative of the canning company came from Seattle and with a force of four other men, has been busy setting the stakes and getting things in readiness for active operations.

The architect's plans call for a building 100x321 feet aside from the engine house which will be 40x40 feet, separated from the main building and built of corrugated iron. In order to rush things for the installing of machinery at the earliest possible date, just half the building will be erected first, making it 50x321 feet. Their machinist is now busy at Sumner, Washington, installing some new machinery and they hope to have the building ready to receive the machinery here by the time he gets through at Sumner. A large force of men, some fifteen to twenty if they can be found, will be set to work and the big structure will be made to assume proportions as fast as saws and hammers can make it go.

This all looks good on paper, and the sound of the workmen already on the grounds makes good music for those who have been fondly hoping for the landing of a cannery of large proportions in Newberg.

Last week a practical canneryman was here, examining soils and studying conditions, with a view of being able to make suggestions to our people regarding the most profitable fruits and vegetables to grow for the cannery. The Weber-Bussell people are here with the goods, and it remains for the people of the valley to get in and hustle and prepare to furnish the stuff to make business for the cannery. It will be money in the pockets of the producers to do it.

An Experience.

The undersigned had a good opportunity yesterday to find out whether there is any virtue in bee stings to cure the rheumatism, as many have suggested such a prescription. Amongst those that have recommended it to me is Thomas Newlin, who several years ago, said he had never had any occasion to resort to such means though if he had he had faith enough in it to take stock in it and give it a trial. I have had considerable experience in trying bee stings in a small measure for several years without realizing any benefit as to rheumatism, yet if there is any benefit in quantity I surely had it yesterday in taking honey from bees in Mrs. Satchwell's dwelling house, that located there in the spring of 1906, and which had done good business

in the time. They built between the rustic and plaster and had gone in between the two upper floors and built, so I had to reach in with one arm to the shoulder, then resorted to a mowing scythe and cut out the length of it, then use a long handled hoe and dig it out in chunks, and scrape it out, thoroughly mixed with comb honey and bees, securing, I think, good one hundred pounds of honey. I am not able to speak of the result of stings, only an enlargement of the right arm and hand and don't wish to repeat the dose. Brother Finley assisted in using the bee smoker and with only one sting for his portion I think.

MILTON NEWLIN.

Leaks and Their Results if Mended.

The drink leak; "three beers a day for a year will buy 1 barrel of flour, 50 pounds sugar, 20 pounds corn starch, 10 pounds macaroni, 10 quarts beans, 4 twelve pound hams, 1 bushel sweet potatoes, 3 bushels Irish potatoes, 10 pounds coffee, 10 pounds raisins, 10 pounds rice, 20 pounds crackers, 100 bars soap, 3 twelve pound turkeys, 5 quarts cranberries, 10 bunches celery, 10 pounds prunes, 4 dozen oranges, 10 pounds mixed nuts—4 big barrels heaped up. In the bottom of the last barrel, a purse with two pockets. In one a five dollar gold piece and in the other a ten dollar bill.

The cigar leak; a young man, when advised by a friend to smoke occasionally, allowed himself the price of one 5 cent cigar a day to put into books. He saved \$18.25 a year or \$109.50 for six years and his library was from one cigar a day, besides he was better off in health and mental vigor.

A merchant in New York smoked six cigars a day at six and one half cents a day. He decided to stop the habit and see what it would amount to. In thirty-nine years he was emancipated and the money saved was \$29,102.03 by compound interest. He bought a home in the country where his children longed to go, with this cigar money.

Take the children to the country; Take them to the pure air; Where the fields are starred with beauty And the world is fresh and fair.

The cheap cigar is made of burdock, lampblack, saw dust, colt's-foot, plantation leaves, fullers earth, lime, salt, alum and a little tobacco. How cigarettes are made; the paper covers are made from filthy scrapings of ragpickers. These are turned into a dingy pulp and then bleached with a lime and other harmful substances. A thousand cigarettes can be wrapped with this paper at a cost of two cents. Arsenal preparations are used in bleaching which produce oil of creosote which injures the mouth, throat and lungs, helps along consumption and helps to bring about the sunken cheeks, dull appearance of the slave of the cigarette.

Yours Respectfully,
MARY E. C. SCOTT,
County Press Supt. W. C. T. U.

A Realism.

"At last we are alone." It was the man who spoke. The woman trembled and lifted her eyes to his face. They were beautiful eyes, but they were tremulous eyes, eyes which look out from a heart which is irresolute, fearful. The echoes brought back in their invisible arms the sound and let it ripple out again until it struck the walls once more, and fell into the vast void of silence. A bat disturbed by the unusual

activity, darted from a corner and blindly dashed in eccentric convulsions about the dusty building.

Great ropes of cobwebs hung down from the ceiling, and across the corner of the room dead flies swung lightly in the hammocks the spiders had fastened there.

The dust rose in listless clouds from the shock of the heavy footfall, and sank again, overcome by its own inertia.

Even the air was resting. The spirit of the desolation of desolation seemed to preclude the place.

The woman looked furtively around upon her surroundings and shivered.

The man laughed harshly.

"Alone, I said," he growled.

"Yes," she murmured.

A faint light struggled in through the great windows in front, thick with dust.

"Where are we?" she whispered, and shivered as the bat dashed into her hair.

"Listen," he replied hoarsely, "we are in a store which does not advertise."—Ex.

Chehalem Center.

W. C. T. U. meets with Mrs. S. W. Newhouse next Wednesday at 2.30 o'clock.

The missionary ice cream social Saturday evening was a success financially as well as socially.

F. A. Hayes and family are off for the seaside Wednesday.

Mrs. Nash and Mrs. Colton, of Newberg, were out visiting their daughters, Mrs. Worden and Mrs. Walton.

Mrs. H. C. Paulsen returned home from a short visit in Portland bringing her mother, Mrs. Mulheron out in the country for a visit.

On Wednesday of last week Mrs. Helen Harford attended the wedding of her sister, Miss Patience Dickenson, in Portland.

West Chehalem.

The thresher managed by Frank Nelson & Co. started on Friday morning of last week and report a good yield of grain so far as threshed.

Crops of all kinds are good in this vicinity.

Fruit is plentiful but wormy, showing a need of better care of orchards.

C. F. Jensen and wife and John Varguson and wife started early Sunday morning last for the coast where they expect to enjoy camp life and sea air for ten days or two weeks.

The cook wagon belonging to the Nelson Co's. thresher broke down on Monday, so they were not able to get it to the machine so the ladies engaged to do the cooking treated the men to an old fashioned picnic dinner in the field on the Jack Noble farm, where the machine was threshing out the golden wheat at the time.

In a letter received by Mrs. Davis from her daughter, Mrs. A. H. Pape, from Sonoma county, California, where they have an apple orchard well laden with apples, they too see the need of spraying orchards there to do away with pests as well as in Oregon. Stating that they have scale, worms and blight to contend with but that fruit is in demand at good prices.

The J. T. Carter family are having quite a siege of whooping cough.

We are told that Fred Kinney and family are coming back to the valley to make their home here. We welcome you back among us, knowing it is a good place to live. Then we need your little tots to help our school as the older ones drop out and leave the seats bare and lonely.

Logs for Paper Mills.

A large log drive, containing 12,000,000 feet of lumber, is enroute to Oregon City from near Eugene. At the present time the raft is drifting down the Willamette between Corvallis and Albany and will arrive in the upper river at Oregon City on or about September 20. This huge raft with a complement of thirty men and eight horses was cut and constructed by the Spaulding Logging Company and the logs will be used by the Crown-Columbia Paper Company and the Willamette Pulp and Paper Company in the manufacture of paper at the West Side mills. The Spaulding company has sawmills at Salem and Newberg. It handles red and yellow fir and hemlock principally and the paper mills here have been large buyers from the Spaulding company for years.—Oregon City Daily Star.

Notes.

Greed prevents real gain. The innocent are gay. Airing our aches will never heal them.

No man ever did his duty standing on his dignity.

Character is the only absolutely indispensable capital. Soul culture is a matter of spiritual companionship.

He who has no faith in goodness has no experience of it.

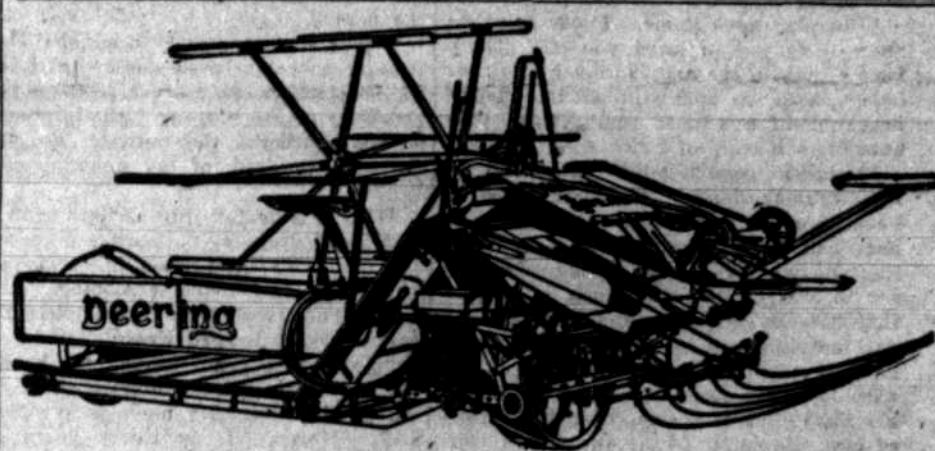

Between the Two of You

You ought to be able to save enough yearly to provide for the future of yourselves and family. The husband from his earnings—the wife from her expense allowance. The best time to start is right now. Get the habit of saving—it's a good one! We can show you how to make your money make more money, and keep on making it for you. Resolve to begin saving today and start a bank account with us.
