Chas. K. Spaulding recently received the news of the death of a cousin of his whose home was in San Francisco. The deceased was making a trip in an auto down in the region of Yuma, Arizona, where he had mining interests when he was overcome with the intense heat. George H. Himes, of the Oregon Historical Society, who was in town last Friday interviewing Hon. J. C. Nelson on the early history of Chehalem Valley, made a very pleasant visit at this office. He recently returned from a trip into the Coast mountains southeast of Astoria some twenty miles where he secured a splendid picture of a yellow fir tree, a monarch of the forest which measures twelve and a half feet in diameter and the first 125 feet of the body is clear of limbs. Since he first saw the tree six years ago considerable of the heavy thick bark has been cut away which makes the diameter a foot or more less than it was at that time. The age of the tree Mr. Himes estimates to be 2500 or 3000 years. The larch string is always out to Mr. Himes at this office for he is a veritable encyclopedia on early Oregon history and a splendid conversationalist.

The following item comes from Fort Rock, Lake county, under date of August 4: Last Monday night at one o'clock Mrs. J. T. Rhoton was awakened from her peaceful slumbers by a commotion in the yard between the dog and what was supposed to be a coyote. On getting up to investigate she grabbed up the gun (which is always conveniently near) and went to the window, which happened to be open, and saw the intruder standing near the house. She took a quick glance down the gun barrel and fired and laid the animal low. Upon examination it was found to be an unusually large lynx, measuring nearly four feet in length.

The Oregon Agriculturist says: "A number of claims have been published lately in different counties in Oregon as to the location of the largest cherry tree in the state. None of the trees which have so far this year been mentioned equals either in size or in average value of crops the well known old Royal Ann tree near Newberg. There is a large cherry tree near Olympia, Washington, which is reported to be about the same size as the Newberg tree, and those two are probably the largest cherry trees in the Pacific Northwest. There is, or was a few years ago, a very large Black Republican cherry tree at Vancouver, Washington. In one year, about 17 years ago, its marketed crop amounted to over 2600 pounds, and brought its owner about \$135.
