Some of the frame work for the covering for the new reservoir fell Tuesday morning, letting three workmen drop a distance of twenty feet into ten feet of cold spring water. With falling timbers and men it made a pretty bad mixup, but they all crawled out without any serious bruises. It was fortunate for the men that there was plenty of water to drop into, rather than on the hard concrete bottom. Thomas Herd, who has the contract says the accident would not have occurred, had his instructions been followed.

A very necessary drill in playing match games of ball is to learn to take defeat gracefully. The High School team played at Amity a short time ago and although the boys felt that they were given rather the worst of it by the umpire, they accepted their defeat without a murmur. At the close of the game a local minister, who saw the game, commended the boys and told them they conducted themselves better than any other visiting team had done during the season, and of course the boys have a warm spot in their hearts for the minister.

**NO DRAGGING OF BUNDLES ON THE NEW CENTURY BINDER It Does Clean Work**

A binder that does not cleanly separate the bundles from the untied grain costs a lot of your temper and time. Time is money during harvest. To avoid this loss use the New Century. The above cut tells the story. From the moment the needle appears above the grain until it returns beneath the deck, no grain is fed down by the packers. They serve to keep the grain from pressing against the needle. The revolving discharge arms do not come into contact with the untied grain. For good clean work use the New Century. If you will only let us show you the New Century and thoroughly explain it we'll be satisfied with the result for it will be another sale for us—one more satisfied customer.
