M. Motschenbacher returned from Klamath Falls the first of the week for his family. He retains the home here and says they may return in the fall. Prices he says are high at the Falls and living expenses are one-third higher than here, but the country is booming since the advent of the railroad.

The Friends church and Sabbath School will have a picnic July 3, on the college campus. All members and attenders of both church and Sabbath School are cordially invited to be present and bring baskets laden with the good things of the season. Picnic supper at 5:30.

**Committee.**

J. J. Woods returned from Vancouver Tuesday evening where he attended court as a witness over a deal in dried peaches. While he was there the famous witness tree standing on the bank of the Columbia, which is said to mark the spot where Lewis and Clark landed, toppled over as a result of the water washing the soil away from the roots. When he left he said there was little remaining of the tree, as it was practically all carried away by souvenir hunters.

John Gilbert, who is improving his home north of town, consisting of nine acres, has prepared to avoid drinking surface water from a well, by having a well bored to a depth of more than 150 feet. A good vein of water was struck at this depth, the water rising to within sixteen feet of the top. He has cased it up some forty feet down, which will keep out all surface water and he has the problem solved. Later he contemplates drawing on the supply for irrigating purposes.

Tyra Hutchens, who holds a position as mailing clerk in the Portland postoffice, has been spending a short vacation at the home of his parents, Mr. and Mrs. I. H. Hutchens east of town. He says the office is badly in need of additional help in order to expedite the business, and more men will be put on the first of July.

Principal W. W. Wiley has been in attendance at the meeting of the Oregon State Teachers Association at Albany, during the week, this being the ninth annual convention of that body. Wm. Kincaid says the cherries that won the cup at the Salem cherry fair last year for M. O. Lownsdale came from the Springbrook neighborhood. They have received much encouragement from dealers, and they have had advertising circulars printed with a view of pushing the sale of the article under the name of the Anylite Manufacturing Co.

Conflicting reports come in regarding crop prospects. W. W. Nickel from above McMinnville, who passed through town one day last week, said he had not seen as poor an outlook in his community in twenty years, while Amos Nelson states that around North Yamhill and Carlton grain is looking well, and he thinks an average crop will be harvested. Some localities have had fairly good showers while others have been passed by, and this may be the cause of the difference in crop conditions.

Duncan, who left here on the following morning to become the bride of Grant Honeywell. The young people were married in Portland before their departure for Minneapolis. A number of the young friends of the bride and groom to be, gathered at the station Wednesday morning, to showers them with rice and hearty congratulations.

**NO DRAGGING OF BUNDLES ON THE NEW CENTURY BINDER**

It Does Clean Work

A binder that does not cleanly separate the bundles from the untied grain costs a lot of your temper and time. Time is money during harvest. To avoid this loss use the New Century. The above cut tells the story. From the moment the needle appears above the grain until it returns beneath the deck, no grain is fed down by the packers. They serve to keep the grain from pressing against the needle. The revolving discharge arms do not come into contact with the untied grain. For good clean work use the New Century. If you will only let us show you the New Century and thoroughly explain it we'll be satisfied with the result for it will be another sale for us—one more satisfied customer.
