Reece Craven departed on his visit to the scenes of his boyhood in Indiana Tuesday morning. He will probably not return before "paw-paw" time.
Mr. and Mrs. Orland Heacock and Mrs. Olive Bolton and daughters who are down from La Grande on a visit, went to Newport Wednesday.

A River street resident says that while some people say it does not pay to fool with a garden in town, she finds that with her table well supplied with nice fresh fruits and vegetables from their own garden there is a satisfaction in it that don't come from such eatables that must be bought from withered stock.

Frank Wood is sending some fine samples of Yamhill county grains and grasses for exhibition in the Oregon building at the A. Y. P. and he will get his share of the medals, too. When Frank gets wound up and in a way to expatiate on the wonderful resources of Oregon he is a veritable spell binder, and the Oregon Commission will do well to give him a berth as lecturer in the moving picture show room when he shows up at the fair.

NO DRAGGING OF BUNDLES
ON THE
NEW CENTURY BINDER
It Does Clean Work

A binder that does not cleanly separate the bundles from the untied grain costs a lot of your temper and time. Time is money during harvest. To avoid this loss use the New Century. The above cut tells the story. From the moment the needle appears above the grain until it returns beneath the deck, no grain is fed down by the packers. They serve to keep the grain from pressing against the needle. The revolving discharge arms do not come into contact with the untied grain. For good clean work use the New Century. If you will only let us show you the New Century and thoroughly explain it we'll be satisfied with the result for it will be another sale for us—one more satisfied customer.
