THURSDAY, AUGUST 5, 1909.

An out of town man is our authority for the statement that work will begin on the electric line to Newberg in a very few days. Our friend should remember however that "all signs fail in dry weather" and this has been an arid season in the valley of the Willamette.

The Sherwood correspondent of the Hillsboro Independent says Jack Hess is very much interested in a mineral spring he has located on his farm, a statement which will be taken with some degree of doubt by those who know the distaste Jack has for anything as mild as mineral water.

If anyone has any doubts about English walnuts making a good growth and bearing well in Oregon, it is a good time now to visit the Thomas Prince walnut groves at Dundee for convincing proof. His trees are loaded with walnuts of good size, and the only discouraging feature to be discovered is some evidence of blight, the same that has been puzzling the California growers for years.

Academy near Gaston.

Prof. J. P. Powell has the Osler theory smashed to atoms. He is in his seventy-eighth year and yet is as active as a boy. His garden is always the best in the hills—plenty of it too, as the neighbors can testify from his generous samples. The Professor is also establishing a reputation as an expert trapper. So far this season his record is, one weasel, one polecat, two skunks, three gophers, sixty-six ground squirrels, and one felis domestica. Fortunately for the latter she has eight more lives; but Mr. Powell will probably catch her eight more times, and count her every time. If every farmer would do as much as the Professor toward the extinction of the ground squirrel the Red Hills would soon be rid of this pest. Boys send in your season's record and beat his if you can.

Chehalem Center.

Plymouth Binder Twine

SAVES TIME AND GRAIN

Twine is a small item, but good twine saves a lot of expense in harvest time. Every time your machine is stopped the delay costs you money. Time in harvest season is always valuable, and sometimes extremely precious on account of the condition of weather or grain. Be sure you use the best twine—PLYMOUTH TWINE. Then you will be safe from the annoyances, delays, expenses, which ordinary twine causes. Plymouth Twine works perfectly in every machine. More of it is made and used every year than any other kind, because it is known to be the best and has been for years. Binds more sheaves with less expense, no knots, no breaks, and is guaranteed full length and extra strength. Get Plymouth Twine from the local dealer. Look for the wheat-sheaf tag.
