IS PONCE DE LEON'S DREAM A REALITY.

So it Appears From Recent Investigations.

Hopeless Cases Cured at Mineral Springs Lead to Comment.

In the days of Spain's splendor, when returning Spanish galleons brought precious cargoes of gold and other minerals back to Madrid, wild legends of springs of eternal life were told in every European court.

Ponce de Leon, a Spanish gentleman of great riches, fitted out an expedition and went in search of the spring of life. The ludicrous and pathetic ending of this expedition is known to every schoolboy, but it is very often called to mind by some new discovery of wonderful healing springs somewhere in the wilds of Africa, India or Asia.

The recent and practical demonstration of mineral springs which make marvelous cures has again brought forth the story of Ponce de Leon's myth.

Paso Robles Hot Springs, California, are now the cause of universal wonderment because of the continued successful cures being made there.

But aside from any romantic feature of the springs, dealing with its Indian tradition or its occupancy by the Franciscan Monks, Paso Robles is today among medical men who know, the cause of much interest and scientific investigation.

Many are not aware of what a place Paso Robles really is. The town is by all means one of the most thorough health towns in the world. It is given over to the cure of the sick. Its citizens regard its waters almost in an infallible light.

The temperature, altitude, air and scenery make it an ideal retreat. Its cures of rheumatism, gout, stomach trouble, kidney and other organic diseases have been so remarkable that its citizens believe there is nothing its baths cannot conquer.

Invalids from all over the country come to Paso Robles. Here can be seen every strata of human life from the bank president in the sumptuous hotel to the sick man reposing in his tent on the meadows.

Paso Robles is distinctly a spot where weak women gain health rapidly, and an hour's conversation at the bath house will reveal tales of nervous women who have been cured.

One wonders, after being at Paso Robles (The Pass of the Oaks) whether Ponce de Leon really was without justification when he started in search of the wonderful "waters of youth."

A small book, neatly illustrated, has been recently published by the management telling the story of the Hot Springs in a most interesting manner and giving complete information. Send for it, either to Wm. McMurray, General Passenger Agent of the O. R. & N., Portland, Ore., or Dr. F. W. Sawyer, manager, Paso Robles, Cal.

Portland Notes.

An advertising campaign that will reach no less than 27,428,750 readers of newspapers throughout the country has been planned by the Portland Commercial Club and will be opened up in January and run for three months. The advertising will call attention to vacant lands of this state and the chances here for the newcomer. There is no question that this advertising will result in bringing many people to Oregon and the whole state, not any one section, will be benefited. The keynote of the advertising will be "Oregon is the place for you; 1910 the time; railroad development the reason."

Oregon banks show a remarkably healthy condition, according to the report of State Bank Examiner Steel. Assets and liabilities of the private and national banks of the state at the close of business on November 16 are compared with the same statistics on November 27, 1908, much to the disadvantage of the earlier date. An increase of 21 per cent in loans and discounts and individual deposits is shown for the current year. Individual deposits in banks have increased \$16,103,678 over last year, certainly a strong evidence of the prosperity of the state. A gain of more than \$21,000,000 in resources of the banks in a single year is a striking proof of the advance Oregon has made during the past twelve months.

Everyone in Portland seems to be planting roses and to a greater or less extent the same is probably true of other cities of the state where the rose attains perfection. Never before has there been such a prevalent idea of beautifying cities as now and the support lent the movement by the people in all walks of life shows that this feeling is genuine and widespread. Nurserymen estimate that Portland people will have planted 100,000 roses by the end of the 1909-1910 season. This includes the fall and spring planting. This stunt is believed to be unparalleled in the history of American cities.

The State Railroad Commission in its third annual report just issued shows 35 miles of the Deschutes Railroad has been graded and that it is expected to have 90 miles of the new line in operation by next July. James J. Hill, who was in Portland during the past week, gives assurance that the Oregon Trunk will be in operation by next fall so that the coming year will see two railway lines into the interior of the state.
