TUBERCULOSIS NOTES.

The Fight Against Consumption All Around the World.

London has three open-air schools for tuberculous children. Similar institutions have been established in the United States in Providence, Boston, New York, Pittsburg, Chicago, Hartford, Conn., Brookline, Mass., and Rochester, N. Y.

A significant phase of the campaign against tuberculosis in Sweden is the establishment, by various industrial concerns, of sanatoria for tuberculous workmen from their own factories. The Vulcan Match Company, the Ljusne-Voxne Timber Company, the Sandviken Hardware Company, the Eriksson Telephone Company and the Stora Kopparberg Company are among those who maintain such institutions, each accommodating from fifteen to thirty patients. At these sanatoria the workmen are received free, and their families may be admitted for a small charge.

A bill will be brought before the new British Parliament, calling for steps to be taken to prevent the high mortality from tuberculosis in Ireland. The bill will demand the compulsory notification and registration of tuberculous cases, the establishment of special institutions for consumptive patients, the instruction of the public about this disease, and improved control over the meat and milk supplies.

The death rate per 10,000 from tuberculosis in Victoria, Australia, has fallen from 14.58 in 1890 to 9.58 in 1907, and in Melbourne and suburbs from 20 in 1890 to 11.6 in 1907. The fall is attributed to the aggressive campaign against this disease, including the registration of tuberculous cases, the erection of institutions for treatment and the general improvement of sanitary and working conditions.

The Newfoundland Society for the Prevention of Tuberculosis is carrying on a vigorous and necessary campaign this fall in the island. The death rate from the disease in Newfoundland is very large. About one in every five of the total population dies of it, and, what is worse, in the last six years the death rate, which is stationary or decreasing elsewhere, has increased about 50 per cent. This is due largely to the native horror of fresh air in the house.

Iceland has a Society for the Prevention of Tuberculosis and is building a \$75,000 sanatorium to accommodate 50 or 60 patients.

An All-Russian Anti-Tuberculosis Association has been formed, with headquarters at Moscow.

Societies for the promotion of public health measures and particularly for the erection of tuberculous sanatoria have been formed in Bosnia and Herzegovina.

According to the statement of a Greek pastor of Lowell, Mass., sixty per cent of the large Greek population living in that city are afflicted with tuberculosis.

Federal meat inspectors have shown that two per cent of the 56,000,000 hogs in this country a year ago, and valued then at \$339,000,000, are affected with tuberculosis.

How Tuberculosis Spreads.

Just for instance: A young man who had been clerking for years in the basement of a huge department-store developed a cough! And he was tired, so tired that his sister suggested

he take a vacation in mid-winter. She was a dressmaker, making good money, and she thought he needed a little rest.

So he got leave of absence and changed from the unventilated basement of the store to the overheated and equally unventilated flat. To be sure, he took an occasional walk, but most of the time he sat in the back parlor reading, and when this occupation palled, he went into the work-room and chatted with the women sewing on pretty frocks for a score of customers. And wherever he went, he expectorated. There was a spittoon, a dry spittoon, in every room!

But he got no better, the cough-syrups did not cure and finally he went to see a doctor. The doctor sent a sample of this young man's sputum to the laboratory conducted by the board of health and had it examined. When the young man called again, he was told that he had consumption. The board of health was notified of the fact by the physician in charge of the case. The young man was sent to a sanatorium for incipient cases, the house was fumigated and the dressmaker—mainstay of the family though she was—heard some plain truths about shipping out frocks from this germ-laden home and employing a dozen workers in one room, without proper ventilation. That one case of tuberculosis could infect the families of the dozen sewers and the two dozen customers. It could spread out its death-dealing tentacles and touch at least one hundred and fifty unsuspecting persons.—From Woman's Home Companion for March.

Communication from the School Board.

TO DR. H. A. LITTLEFIELD, MR. JOHN LARKIN, AND OTHERS:

Your petition received on February 26th has been duly considered by the school board. The delay in taking action upon same has been occasioned by the delay in securing legal advice upon the section of the law upon which your petition is based.

We are in receipt of a written opinion from the Attorney-General of the state, from which the following quotation is taken:

"I am of the opinion that this (law) does not intend to clothe one-third of the voters of a district with power to keep calling elections on the same subject, one after another, and thus prevent the construction of a school house. Where a vote has been had, the meeting called in the usual way, proper notices posted, and everything done to give all

the legal voters of the district notice of the meeting and a site selected, I am of the opinion the directors have the authority to proceed and construct the school house upon that site."

After receiving such an opinion from the Attorney-General, we do not believe that we have the right to call such a meeting as is called for in your petition.

Very respectfully yours,
E. T. WRIGHT, Chairman
J. L. VANBLARICOM
J. C. HODSON,
Board of Directors.

Dated at Newberg, Oregon, this 9th day of March, 1910.

Albany High School to Play Here.

It is hoped that all will avail themselves of the opportunity of seeing the basketball game to be played in the P. C. gymnasium Saturday evening, March 12, at 8:30. The Albany High School will play the Newberg High School a return game after having defeated them on their own floor.

The teams are quite evenly matched and the game will be exceedingly interesting, the Albany bunch claiming to have the best team work of any High School in the state.

A preliminary game will be played between the second teams of Pacific College and the local High School. All come.

New High School Building.

A large number of plans for a high school building have been submitted to the school board by different architects, and from this number the plans furnished by E. E. McClaran, of Portland, have been selected and accepted.

The building is to be 76x130 feet and provision is made for thirteen teachers and 550 students. It is to have an auditorium that will seat 335 students at desks, while with opera chairs 500 or more could be seated.

The gymnasium will be in the basement and will be 40x67 feet, with seating capacity for 300 visitors. There is also to be a swimming tank in the basement, 20x22 feet and three shower baths.

The specifications call for pressed brick, the colors to be red and white.

Further details of the building will be given later.

Portland Notes.

Forest supervisors of Oregon, Washington and Alaska will meet in Portland March 21-26. The programme includes many subjects of great importance in the administration of forest affairs and the gathering will have much to do in shaping policies to be followed in future.

L. F. Kneipp, Assistant Forester, will attend the conference as the representative of the Washington office, it being impossible for Forester H. S. Graves, who succeeded Gifford Pinchot as the head of the bureau, to come.

The supervisors will discuss methods to be followed in meeting common problems and successful experiments in meeting difficulties will be told for the benefit of all. In the interchange of experiences and new ideas the supervisors hope to profit largely at the coming session.

Hogs broke all former records in the Portland market late last week, when the remarkable price of \$11 a hundred pounds, live weight, was paid by local packers for the best Eastern Oregon porkers.

This price was not only the highest ever paid here in the memory of packers but leads the whole United States for the last half century at least. For about one week Portland has had the distinction of leading the whole United States in being the highest priced hog market. When hogs went to \$10.10 and \$10.25 last week, it was thought the limit had been reached but the jump to \$11 shows the scant supply of high class porkers in this market and strong demand.
