**Colonist Rates
to Oregon and the
Great Northwest**

The management of the Southern Pacific Co. (Lines in Oregon) takes great pleasure in announcing that the low rates from Eastern cities, which have done so much in past seasons to stimulate travel to and settlement in Oregon will prevail again this Spring DAILY from March 1 to April 15, inclusive.

People of Oregon

The railroads have done their part; now it's up to you. The colonist rate is the greatest of all home-builders. Do all you can to let Eastern people know about it, and encourage them to come here, where land is cheap and home-building easy and attractive.

Fares Can Be Prepaid at home if desired. Any agent of the road named is authorized to receive the required deposit and telegraph ticket to any point in the East.

Remember the Rates—From Chicago, \$33. from St. Louis, \$32. from Omaha and Kansas City \$25. This reduction is proportionate from all other cities.

Primitive Methods of Carrying Mail.

It is said that about 700 B. C. there was some organization for the carrying of letters in Israel. In order to ensure secrecy, which was a somewhat difficult matter, one method resorted to was to shave the head of a trusty messenger and then to impress the secret intelligence upon the skull. When the hair had grown sufficiently long for concealment the messenger proceeded to his destination, where, according to the barbarous arrangement, his head was again shaved and the object of the secret mission thus revealed. Ovid told of messages being inscribed upon a person's back. Cyrus was the first to organize a regular riding post. According to Xenophon, he tried how far a horse could go in a day without baiting, and at that distance appointed stages, and men whose business it was to have horses always in readiness. For State communications the Greeks maintained a regular service between Athens and Sparta, a distance of 150 miles, which a certain runner named Phidippides covered in two days. It was to the Emperor Augustus that the Romans owed the introduction of public couriers. The foundation of the postal system in England was laid by James I. London enjoyed the advantage of a penny post in the seventeenth century, and there were between 400 and 500 receiving houses to take in letters, where the messengers called in every hour, collected the posted letters and took them to the General Post Office in Lombard Street.

Like the West.

Dr. H. D. Bowers, a Wabash College graduate, formerly of near this city, and his wife, Dr. Alice Bowers, formerly of near Wingate, but later of this city, who left Indiana in the fall of 1904 for the west, have written to friends here that they are meeting with success. They settled at Newberg, Oregon, twenty-six miles south of Portland, in the Willamette valley, over five years ago. They have continuously practiced their profession, that of osteopathic physicians, from the first. Having been highly successful, their practice is still excellent. The Drs. Bowers have also entered the field of horticulture. They own an excellent and valuable fruit ranch, pronounced by old residents of Oregon to be about the best fruit ranch in the surrounding county. They send regards to their many friends here. The climate is excellent there they say.—Crawfordsville, Indiana, Journal.

If it's a Deere it's Right

Because its made right, by a force of skilled plow experts whose equal cannot be found in any other plow factory in the world. There are many different makes of plows, each claiming to be the best, yet the fact remains that three John Deere plows are in use to one of any other kind. The John Deere Factory, the largest in the world, turns out every year more plows than any five other factories combined.

Standard of the World For Over 60 Years

The Pioneer Plow Maker, John Deere, made his first steel plow by hand from the blade of a saw in 1837. The first slab of steel rolled in the United States was rolled for the John Deere plows by William Woods, of Pittsburg, in 1846. And ever since those early days Deere Plows have shown the way and maintained the lead in this great national industry. Is it any wonder that the farmers of the world express their verdict in the familiar phrase,—"If it's a Deere—it's Right."

We make over 1000 styles of plows, each as good as it can be made,—the best that brains and perfect equipment can produce. No matter what your needs may be, we can supply them from our line.
