Pacific College Notes.

President Kelsey spoke of "The Saner Method of celebrating the Fourth of July" which is being advocated in many of the cities of the United States, Wednesday morning of last week.

Rev. Herbert T. Cash, who is known by many of the students, gave a very good chapel talk Thursday of last week.

Riley Kaufman interested the students in an explanation of the requirements and privileges of employment in the civil service system of the United States last Friday morning.

Roy Fitch spent Saturday in the Portland library.

Homer Parrott is again in school after several weeks absence on account of sickness.

Bernice Benson and Dorothy Newall spent Sunday with Elma and Hazel Paulsen at Chehalem Center.

English H class completes the study of "Merchant of Venice" this week and will take up goldsmith's "The Deserted Village." English III having finished "Paradise Lost" will study "House of Seven Gables" the remaining two weeks.

The Literary program last Friday evening took an ethical turn. The following questions were discussed, "Ethics of student government," "Ethics of eternal punishment," "Ethics of amusement and of co-education." A good attendance was present.

Prof. Reagan continued his talks on methods of study and ways of becoming efficient.

John Gower decorated the campus very artistically recently by setting out flowers which were donated by himself and the faculty.

Gumption on the Farm.

The only man not deeply concerned in good roads in your county is the tramp who goes that way but once.

A good many folks will have cold fingers before they are through husking corn this fall. Don't let that somebody be you.

Keep a lot of bag strings hanging in the granary; and, many times, some in the barn come handy. A broken harness-snap is a good thing to hang them on.

The folks who do the most dawdling in the fine autumn weather are often the most surprised when the cold, wet season catches them with their outdoor work half done.

A horse will do more, and do it ten times more willingly, for the man who has a kindly ring in his voice and who says, "Get up!" as if he were going along, too.

Some farmers are surprised the first time their wives sell enough eggs and butter to furnish the table and the wardrobe, and after that they are surprised if she doesn't keep it up.

Save the beautiful things in nature. Don't cut down a shapely pine or poplar just to see if the axe is sharp; and when grubbing out fields, set the fine, straight hardwood shrubs in some forest tract for future use.

All rubbish about the place that would harbor insects and other pests should be cleaned up and burned. If it has not already been done, hotbeds and cold-frames should be cleaned up and soil prepared for bedding.

There are life insurance, fire insurance, storm insurance and stock insurance, all of them good enough so far as they go, but none of them quite equal to the industry that insures against unhappiness and want in old age.

THE conservative banker, in making loans, must know to a certainty that his applicants or sureties are responsible and worthy of credit. Likewise, the prudent depositor will know the character and standing of the bank with which he is to deal. Therefore, before inviting your confidence and soliciting your patronage, we wish to call your attention to the personnel of our Officers, Board of Directors, and Stockholders:

A Day of Blood.

In his frail skinboat it is a difficult and dangerous task for the Eskimo to go out to sea forty to sixty miles and intercept the walrus, as he passes on his migration into the Arctic.

One carcass will fill his boat, for it weighs from 1,000 to 3,000 pounds. He hunts the walrus when they are lying asleep on the ice-floes, in herds from ten to several hundred. Death must be instantaneous, else with a few rolls or the peculiar lumbering, humping movement (seen of the seal when ashore), he makes the few feet to the water and then is lost, for he has not sufficient blubber and air to float. He has much natural curiosity, and if not scared by shots will come up close to your boat or the ice-floe on which you are sitting, spouting, snorting and rolling his eyes; with his gleaming tusks and bristled snout he has an uncanny, goblin-monster-like appearance. A herd of fifty or sixty of them will come up en masse, raise high out of the water to stare at you, then snort, spurt and disappear again, only to come on the same spot and repeat the maneuver indefinitely. Taking advantage of this, the Eskimos hide behind ice hummocks and throw a harpoon into one, then snub the tough rawhide line around an ice cake. He must perforce come up to blow and he is then killed with the rifle. The thick skin and the mass of blubber and meat beneath render him almost invulnerable.—Captain F. E. Kleinschmidt, in the June Pacific Monthly.
