Gumption on the Farm.

You can't overwork the harrow.

Be sure your wife will find you out.

That weed right in the hill is your worst enemy.

Don't let the weeds get a start—kill 'em while they are a-borning. Easiest way.

Too often the extravagant who start out in the parlor-car come back in the freight.

When you hoe corn, thin it out to not more than three good stalks to the hill. Nature doesn't like to be crowded.

It isn't the mark of a good teamster to get in off the road late at night, nor to leave the horses uncurried for two or three days.

It is less work to hoe twice, soon after the crops come up than it is to hoe once after the weeds get high, and it does much more good.

Borrowing tools, and sending them dull or rusty, doesn't make the other fellow grin. Better save up and buy your own.

Again we say: Test the seed-corn before planting, for there's much poor seed in the country this year. And, also, treat the seed potatoes to prevent scab.

Don't cultivate the potatoes when out in bloom, or coming out, unless you want a lot of stunted little tubers. Cultivate them before they get that big, and hoe them clean of weeds.
