### DUNDEE

Mrs. Geo. Waggoner and son, Master Richard, were Portland visitors last week.

Theodore W. Spencer, of Thatcher, Washington, and James O. Spencer, of Portland, are visiting the old home at Otterbrook.

Mrs. Comstock has been visiting friends in Dundee the past week.

Rev. Moore, the District Supt. of the Methodist church, conducted services in Dundee Sunday evening.

Mrs. A. G. Sager and children, of Portland, who have been guests of Mr. and Mrs. Hagey returned to their home on Monday.

Mrs. Glancy, of Boring, has been visiting at the Fisher home.

Mrs. Thun and Miss Anna Thun are spending a week or two in Willamina.

Miss Stella Warner is spending her vacation at Newport.

Mr. and Mrs. Harold Prince left on Monday for a few days at Newport.

The interior of the lower Prince drier is undergoing repairs, the construction of the tunnels being changed from the car system to rolling trays.

A. A. Parrett added to the attractiveness of his store building by building an upper balcony and painting the building.

On Friday evening five members of the Chehalis silver medal contest team came to Dundee. The church was beautifully

decorated for the occasion and a large audience enjoyed the excellent program. Miss Elsie Tangen won the medal.

Mr. and Mrs. Wheeler, of Newberg, are visiting her son, Edward, in Dundee.

Mrs. Van Volkenberg's daughter-in-law and children who have spent some weeks in Dundee, have returned to their home in Portland.

Mr. and Mrs. Chalmers have returned from a week's outing at Tillamook.

Samuel Parrett and family spent Sunday with relatives in Dundee.

Mrs. Imus is expected home this week from the Hot Springs where she has been for her health.

Little Avis Eddens, who has been dangerously ill with peritonitis, is improving slowly.

Mrs. K. D. Hatch has gone to Portland for treatment for her throat which has been troubling her for sometime.

Mr. and Mrs. E. S. Greer are visiting relatives and friends in Portland.

### It Made One.

Vera (eight years old)—What does transatlantic mean, mother?

Mother—Across the Atlantic, of course, but you mustn't bother me.

Vera—Does "trans" always mean across?

Mother—I suppose it does. Now, if you don't stop bothering me with your questions I shall send you right to bed.

Vera (after a few moments' silence)—Then does transparent mean a cross parent?

### BURIAL RITES IN CHINA.

The More the Banners the Greater the Honors to the Dead.

The many curious customs of the Chinese have been a constant source of wonder and amusement to the American tourist in China. By far the oddest but most impressive of their ceremonies is the burial rites for their dead. The Chinese hold their dead in high esteem and shower honors upon their memories by burning incense and candles daily. They also honor their relatives who have died many years before.

As soon as a Chinaman dies his relatives embalm him. Dressed in his richest garments, he is placed in a teakwood coffin, solid and air tight, and the coffin is closed and sealed. It is then placed in front of the family altar. This altar is hung with richly embroidered draperies and decorated with flowers, vases and josses. The period of mourning begins at once, especially among the women of the deceased's household. They start a daily lamentation over their loss and are joined in their occupation of wailing by relatives and friends.

The male members of the family are busy digging the grave, while the women folk, assisted by the professional mourners, do the wailing.

The grave is half under and half above the ground and is inclosed by a crescent shaped wall about two feet high. Another thing to be prepared for the dead is a miniature house, which is provided with miniature furniture. This idea is to provide the deceased with all the comforts of a home in the regions where he is going. An image of the deceased, together with drinkables and eatables and money, is placed on the coffin the day of the funeral.

The image is not buried, but is burned in the presence of the mourners, who during the process shriek and make the most frightful noises. This is to drive out the evil spirit with which the dead man is supposed to be possessed. When the funeral services are over the mourning banners are taken home and used as ornaments on the bare whitewashed walls of the rooms.

The more the banners the greater the honor paid to the dead. The miniature house precedes the mourners to the grave. Then follows the elaborate hearse, draped with rich dark blue velvet, with silver fringes, borne by the natives. The mourners, too, are supposed to assist in carrying it, which they do by holding on to the white cords attached to the hearse. Refreshments are served at the burial ground, and at the end of the services the friends and relatives partake of the food to show their appreciation.—New York Herald.

### The Bishop's Code Message.

When Sir Herbert Samuel in his capacity as postmaster general advocated a higher rate for telegraphic code messages he told the story of a bishop who telegraphed to a friend, "Third Epistle John, thirteen, fourteen." The story has since then appeared in so many places in so many guises that its origin has become questionable. One paper, referring to the many "twists" which have been given to the tale, wonders "where Sir Herbert found it." The code words mean: "I have many things to write, but I will not with ink and pen write unto thee. But I trust I shall shortly see thee and we shall speak face to face. Peace be unto thee. Our friends salute thee. Greet the friends by name."

### A Lucky Fall.

"Ya-as," drawled the Yankee, "I once knoo a man, sir, who fell off a window sill in a flat twenty stories high and never hurt himself beyond a few bruises."

"Nonsense!" exclaimed the Englishman.

"True!" asserted the other. "Up there he was, cleanin' the window, and he fell right off."

"Bosh!" said the Englishman. "How could that be?"

"Waal, sir," drawled the Yankee, "you see, he just happened luckily to fall inside!"—Exchange.

### Making Him Cheerful.

She was a woman who was methodical in her discipline.

"Now, Willie," she said, "you have disobeyed me, but I won't whip you now because we're going to have company for dinner, and I want you to look bright and cheerful and pleasant, but after they've gone I'm going to give you the worst whipping you ever had. Now hurry up and get dressed, for I want you to look nice and happy."

### Two and Two.

"Two and two make four," said the ready made philosopher.

"Sometimes," replied Colonel Stillwell of Kentucky. "And then again they merely make a pair of deuces."—Washington Star.

### UNITS OF POWER.

Comparison of Capacity of Man, Horse, Steam and Electricity.

My scientific friend and I were regarding with admiration one of the great engines and generators in the metropolitan power station.

"How many horsepower?" I asked, voicing the question that comes naturally to every one at sight of an engine.

"I should say 5,000," he replied, "but we can get a better idea of it from the capacity of the generator. Just glance at that brass plate near you on the frame of the dynamo."

"Eighteen hundred amperes; two thousand volts," I read, wondering what that had to do with horsepower.

"The capacity of a dynamo," continued my friend, almost reading my thoughts, "is given by the product of the amperes and the volts and is measured in terms of a unit called a watt, or more generally in terms of a unit a thousand times larger, or the kilowatt. The capacity of the machine is 3,600,000 watts, then, or 3,600 kilowatts. Or, as the kilowatt is one and one-third times as large as the horsepower, this would make some 4,800 horsepower. Since the engine that drives it is generally a little larger than absolutely necessary, its horsepower in this case will probably run between 5,000 and 6,000."

"What is a horsepower, anyway?" I asked. "I have used the term often enough, but have never known just what it meant."

"This unit of power," he obligingly went on to explain, "is, as its name indicates, about the power that can be steadily furnished by a good sized horse. More exactly, it is defined as a rate of doing work equal to 33,000 foot pounds a minute or 550 a second. A foot pound is the work done in lifting a pound one foot high, so a horsepower engine could, for example, lift one pound 550 feet high in one second, or fifty-five pounds ten feet high."

"What would be the power of a man, then?" I asked.

"It is difficult to say. For steady work it might not average much more than a tenth of a horsepower, but, strange as it may seem, for short spurts a man can do more than a horsepower. Thus, a 150 pound man can run upstairs for a few seconds at a rate of four feet vertically a second, or even more, and this would mean 600 foot pounds a second, or well over a horsepower. If he was able at the same time to make use of his arms he could probably increase this by half."

"But this must not be interpreted," he went on to say, "as meaning that a man is as strong as a horse, for, just as a man can exceed his normal power for short spurts, so a horse could generate several horsepower for a few minutes at a time. So it is probable that an excited runaway team is nearly if not quite the equal in power to a fair sized automobile with its twenty odd rated horsepower."—L. I. Rose in Chicago Record-Herald.

### She's Sorry She Didn't.

"Do you remember," she asked, "that you said once that unless I promised to be yours the sun would cease to shine?"

"I don't remember now, but I suppose I may have said something of the kind."

"And have you forgotten that you assured me that unless I permitted you to claim me as your own the moon would fall from her place in the heavens?"

"Oh, well, what if I did say so? Why do you want to bring that up now?"

"I merely wished to assure you that I'm sorry I didn't shut my eyes and let her fall."—Chicago Record-Herald.

### The Better Way.

"If you marry a poor man you must expect to know how to prepare the dinner and attend to all the little details of household economy."

"Yes," replied the worldly young woman, "but instead of getting married mightn't it be better to register at an employment agency?"—Washington Star.

### Had the Habit.

"Did you read about that American magnate who was shipwrecked in the south Pacific and spent two years among savages?"

"No. What happened to him?"

"When he was rescued he had accumulated 3,000,000 clam shells."—Pittsburg Post.

### A Wrong Impression.

Fair Critic—Oh, Mr. Smear, those ostriches over there are simply perfect! You should never paint anything else but birds.

Artist (sadly)—Those are not ostriches, madam. They are angels.—London Opinion.

## Sweeping made easy

# The Electric Carpet Sweeper

Weight 10 lbs., runs on wheels. No dust.

Takes dirt out of your carpet.

YAMHILL ELECTRIC CO.

We can supply you with

# Tomato Crates and Cherry Boxes

The Chas. K. Spaulding Log. Co.

## Sick Room Necessities

I can supply at lowest prices Hot Water Bottles, Fountain Syringes and Bulb Syringes, bed Pans, Ice Caps, Air Cushions, Fever Thermometers, Medicine Tubes, Surgical Dressings, and all other sick room requisites. My prescription work is given the most careful attention and nothing but the best of drugs and chemicals are used.

A full and complete line of School books and School Supplies and Lowney's Candles, Perfumes and Toilet Waters. Send, or telephone, or write, or come—the price will be the same anyway—always the same.

Lynn B. Ferguson Prescription Druggist

## Surprise Yourself

By making your cows net you more profit. They will do it if you use a Cream Separator, and why not a "SHARLES TUBULAR" if its the simplest and easiest running machine you can buy? And there's no doubt about it. It gets the cream, turns easy, oils itself and is easy to wash, in short its a "money-getter" right from the start, because the price is right. N. C. Christenson is the local agent and invites your inspection.

N. C. CHRISTENSON

## C. B. CUMMINGS THE HOUSE FURNISHER

We have in stock a complete line of Furniture, Paint, Wall Paper, Picture Moulding, Glass, Heaters and Ranges. We are always pleased to show our goods.

C. B. Cummings, Newberg, Or.
