performances, the first of which will begin promptly at two o'clock in the afternoon, and the second at eight in the evening.

Of course, there will be a parade, but it is not to be one of the ordinary spectacles associated with the familiar circus. Instead, this pageant, upon which many thousands of dollars have been expended in excess of the usual amount invested by an amusement enterprise of the size and importance of the Al G. Barnes organization, will include many features entirely new.

The Al G. Barnes is the only real wild animal circus in the world. There are other combinations that advertise trained animals as an adjunct to their exhibitions, but Barnes is the only one presenting a performance lasting two hours which is given entirely by 300 trained animals from the jungles and wildernesses of strange countries.

There are lions, tigers, bears, leopards, panthers, cheetas, monkeys and other more familiar animals that perform marvels in the way of horsemanship, leaping on and off the backs of fleet steeds as they travel at electrical speed around the three big rings; jumping through hoops of fire and otherwise imitating the human performer.

Again, there are elephants that reproduce scenes in a barber shop with such humorous effect that the audiences are kept in a constant roar of sincere laughter.

A particular feature of the Al G. Barnes Big Three Ring Wild Animal Circus is the steel arena. In this stronghold are inclosed at each performance the most untamable of beasts and their

human masters; for a beast may be untamable, but still yield, under human dominion, to training.

The only troupe of performing Royal Bengal tigers, the same representing an expenditure of \$20,000, that is known in the United States is offered by Al G. Barnes. There is one other, but that is a troupe owned and operated for the pleasure of the Maharajah of Ceylon. These fierce beasts do remarkable tricks in the steel arena, and their size and sinuous grace is such that many artists throughout the country have used them as models.
