### SOME TIMELY SUGGESTIONS

The Ladies of the Civic Improvement Club are spending time and money in the effort to make Newberg a clean, healthy, city, a place of beauty and attractive to the home seeker. We realize that but little can be done without the united effort of parents and children. We believe the most of our people are interested and that a suggestion is all that is necessary. Many are taking an interest in beautiful lawns, terraces, and in the planting of roses and shrubbery. All this should be carefully protected. Children only know as they are taught. Parents should instruct their children to avoid running across terraces and vacant lots, and let teamsters avoid driving across sidewalks, church property or other private property. It costs some one a good deal to repair the damages, as well as very much marring the beauty of our city.

Care should be taken against mutilating or destroying street shade trees. They are for the comfort of the public. If house wives would keep a barrel or box in the rear, in which to drop empty cans, broken dishes and other cart away articles, it would not only work but greatly improve back yard appearances. Old boxes can be made into stove wood and used to an advantage. Last summer rope swings were placed in the park for the pleasure of the children, but they were soon destroyed. This ought not to be. The throwing of waste paper along the streets gives a very untidy appearance to strangers coming in. We hope a suggestion may be sufficient.

On behalf of committee.

### THE DEADLY COLD BED

If trustworthy statistics could be had of the number of persons who die every day or become permanently diseased, from sleeping in damp or cold beds, they would probably be astonishing and appalling. It is a peril that constantly besets traveling men, and if they are wise they will invariably insist on having their beds aired and dried, even at the risk of causing much trouble to their landlords. But, it is a peril that resides also in the home, and the cold "spare room" has slain its thousands of helpless guests, and will go on with its slaughter till people learn wisdom. Not only the guest, but the family often suffer the penalty of sleeping in cold beds and chilling their bodies at a time when they need all their bodily heat, by getting between cold sheets. Even in warm summer weather a cold, damp bed will get in its deadly work. It is a needless peril, and the neglect to provide dry rooms and beds has in it the elements of murder and suicide.—Ex.
