POISONS WE EAT DAILY.

Common Salt in Large Quantities is as Deadly as Arsenic.

When the doctor told me he was prescribing prussic acid for the pain in my stomach I said I would rather keep the pain than take such a poison.

"You need not have the slightest fear," he assured me. "Why, you eat poisons every day. When the Chinese want to commit suicide one of their favorite plans is to take half a cup of salt."

"Common salt?"

"Yes. In large quantities common salt is a violent irritant. It sets up severe inflammation of the stomach and kills as surely as arsenic."

"Salt peter, that colors bacon and corned beef an attractive red, is a powerful poison. One ounce has killed a person in three hours. Many people have been poisoned by this salt."

"You must know that your Christmas pudding and the icing of your wedding cake are incomplete unless flavored with bitter almonds. I am not sure how many bitter almonds it takes to kill a man, but they contain a good deal of this prussic acid that you object to."

"Oxalic acid, with which foolish people so often commit suicide, is the salt which gives rhubarb and sorrel their pleasant flavor. It is a violently irritant and dreadfully painful poison."

"Need I tell you that caffeine, the exhilarating principle of coffee and tea, is a poison?"

"In nearly all our condiments we eat poison. The oils of nutmeg, cloves, black pepper, cinnamon, peppermint, caraway, horseradish, thyme, etc., are all poisonous in large doses. Black pepper contains a fiery, volatile oil, capable of burning a hole in your stomach if it were not moved on, while its piperine is a sure poison. Cayenne pepper, or capsicum, is still more irri-
