D. W. Cummins, formerly a Newberg real estate agent, writes from Missouri that the call of the West appeals to him and he thinks he will journey this way again soon. The latch string is always out to the repentant.

The Canadian government issues fractional currency, but Uncle Sam discontinued its use so long ago that it is quite a curiosity to the younger generation.

The big block of white marble that has been in view from the street at Senn's marble yard on First street is to be chiseled into the form of a little four-year-old pet, the only daughter of well-to-do Portland parents. Mr. Senn, who has the reputation of being the best sculptor on the Coast, is modeling the little mischief in clay, and is having a time of it he says, as she is too full of life to be quiet a half minute at a time. THE WORLD'S BEST HOLSTEIN

To Creamelle Vale, a Holstein cow, owned at Dutchland Farm, Brockton, Massachusetts, now belongs the distinction of being the world's greatest milk producer. She has just completed a year's test, the result of which by official announcement shows the bounteous yield of 14,500 quarts or 29,563 pounds of milk. Creamelle Vale has far outstripped all competitors. Her record exceeds that of her nearest rival, also a Holstein, by 750 quarts. Her best day's work was 54 quarts and her largest yield for one month totaled 1554 quarts.

To enable the famous Holstein to do her best and to win a world's championship, no pains were spared in providing for her good health and comfort.

Specially constructed stalls furnished in summer with electric fans, kept her cool and restful. No flies were allowed to annoy her, and a faithful attendant looked after her daily needs.

Creamelle Vale is eight years old. Money cannot buy her, but her sons and daughters are sought at the highest prices, one promising scion having brought the substantial sum of \$10,000.

HELP THE CHILDREN TO HELP THEMSELVES

In every town and city there are many vacant lots growing up to weeds that might just as well be producing garden and flowers, thus adding beauty and utility to the city instead of being an eyesore. Many of these lots are owned by non-residents and others who would be glad to donate the use of them to the children. Almost every town or community has its Parent-Teachers' Circle, civic board and perhaps other organizations, and they and the school board should get together and from their membership appoint a committee, whose duty it shall be to secure the use of them for the children and arrange to have them plowed and fenced, when necessary. In appointing these committees do not overlook the ladies, for in our experience, we have found them adept at such work. It would also be their duty to plan and manage the local contests, provide prizes for same and to select exhibits to be forwarded to the State Fair, and to show the children how to pack, mark, enter and ship them. The teacher is not always qualified to do this work, and has about all he can do beside. Then when school closes and perhaps the teacher leaves the town, the children need help and encouragement which this committee can give.

In every town and city are many children who have little or nothing to do outside of school hours. No healthy child can be idle, and without some direction of his activities and some provision of a proper avenue through which to vent them, they are apt to be wasted. It is not so much the fault of these children if they get into mischief and form habits of idleness, and possibly viciousness, as it is the fault of parents, guardians and others for not providing interesting and profitable employment for them. To aid in providing this employment and making it attractive and profitable is the object of the industrial contest movement inaugurated last year. To make this a perfect success it must have the co-operation of parents, teachers, school boards and all public spirited citizens, and we know of no better way in which to help than as above suggested. Try it. Let the teacher or president of the Parent-Teachers' Circle call a meeting at once, effect an organization and report to the office of Superintendent of Public Instruction, Salem, Oregon, in order that he can put

you on his mailing list for bulletins, etc., and assist you in every way possible.

(Signed) N.C. Maris.

THEY CAN VOTE

F. S. Cottle has settled one question that has been discussed here by writing to Attorney-General Crawford. Mr. Crawford says that a foreign-born woman whose husband is an American citizen (either native or naturalized) can vote without taking out naturalization papers, if she is 21 years old.—Carlton Sentinel.
