### GREAT FARM OFFER

The Canadian Pacific Railway are offering to purchasers of wheat and mixed farming lands in Alberta and Saskatchewan a plan to secure a home and farm for themselves easier and cheaper than renting or homesteading.

All of the land is suitable for grain and mixed farming. It lies close to railways, towns, and good schools. There is good water and abundant rainfall. Markets are good and taxes very low. The soil is a rich black loam and is covered with a heavy growth of native grass. Crops are sure and there is no better stock or dairy country.

#### YOUR OPPORTUNITY

The Company offer these lands to actual settlers for \$11.00 to \$25.00 per acre on twenty years time, one-twentieth cash and nineteen equal annual payments with the interest at 6 percent. Purchasers can pay in full at any time.

To purchasers who make payment of one-twentieth on 160 acres or more and have sufficient stock and implements to crop a part of the land and make their home there, the Company will loan for the purpose of erecting house, barn, fences, putting down well and cropping the land the sum of two thousand dollars, or less on twenty years time at 6 percent, without any additional security. They will also under certain conditions advance \$1,000 for stock. The stock loan, however, is due in one year and bears 8 percent.

They will permit the purchaser to do the work of building, fencing, cropping and other work for himself, or so much of it as he can do, and thus secure in wages the greater part of the loan they have made him, or they will do the work themselves at the actual cost of material and labor.

#### HOW THE PLAN WORKS FOR YOU

You purchase 160 acres of land at \$18.00 per acre, a fair average price. 160 times \$18.00 equals \$2880, divided by one-twentieth equals \$144.00, your first payment. Within six months from date of purchase you agree to move on the land and the Company will then advance you the necessary money to make the improvements and allow you to do your own work for yourself if you wish. You can readily see that the Company's interest in your welfare is just beginning at this point. You must succeed in order for them to secure a fair return on the investment, but their faith in the future success of the country and settlers is such that they have appropriated hundreds of thousands of dollars to carry out this plan knowing that you will receive splendid returns in future years by increased tonnage.

#### SUCCESS IS YOUNG

Success under these conditions is certain. Western Canada, like all farming countries, have their good and bad years, but there has never been a year when hay and grass was not plentiful and when they could not raise plenty of feed and vegetables of all kinds. The prices of live stock, including poultry, and of dairy products are always high and will be for years, because of the large number of new people coming each year, and the diminishing of the large herds of cattle because of this settlement. The land is all new and fertile and produces entirely different results than farming old and worn out lands. There the farmer gets the real cream of the land for himself.

#### GROWTH OF THE COUNTRY

The growth of the country is the marvel of the American continent. Ten years ago there were few people living there, now Alberta alone has nearly half a million people, and they are a contented people. Great cities have sprung up like magic. Calgary and Edmonton are each over 60,000 people. Ten years ago they were less than ten thou-

s and combined. Many other towns and cities, from one to ten thousand, have come into existence. The natural resources of the country are great. Coal is one of its chief assets, natural gas, oil, copper, lumber, all kinds of clay products, brick, tile, cement, make for a rich and prosperous country.

Markets for all their products are being rapidly extended, and there is no place on the continent where the opening of the Panama canal means more. A farm here will make any man independent in ten years or less.

Think this over carefully, \$50 to \$75 an acre is not too much to value these farms in ten years. They will show good interest on those values right now if properly managed. Thousands of others are living there and prospering. Why not you?

This may be your last opportunity to get rich, new fertile lands at prices and terms that nearly any man can take. The dread of a new move and the fear of possible failure has kept many a man from grasping an opportunity that would have made him independent. Remember, gumption and grit gets

greenbacks. After April the 1st the Railway Company will send personally conducted excursions from Portland to Alberta. They furnish you with low rates and free conveyances to inspect the land without any obligation on your part. Write at once for any further information or particulars that you want.

W. G. Ide. I will be at Imperial Hotel Friday and Saturday, the 14th and 15th insts.
