RAPID EATING IS WRONG.

Reasons Why Even Soft Foods Should Be Well Masticated.

When we do not chew our food properly the evil consequences are many and often serious in their effect upon health and even life. In the first place, a person who does not chew his food sufficiently is sure to eat too much. That is especially true in the case of soft foods, which are sometimes literally shoveled into the stomach. Food that needs mastication will generally get a little, even from the worst sinner, although sometimes it gets only enough to make the act of swallowing possible.

Thorough mastication acts in two ways to diminish the amount of food you take. If a proper proportion of the time spent at the table is occupied by the work of mastication, the amount of food taken is naturally less. Furthermore, those who chew properly do not crave food as others do, for they digest what they swallow, and are free from the unnatural hunger that torments the rapid eater. Mr. Fletcher, the dietician, has proved that he can maintain a high degree of health and vigor on a much smaller amount of food than most people think they need.

Another real danger to the health of the rapid eater arises from the unbroken lumps of food that pass into the stomach. In some cases the digestive juice struggles with them in vain, and they cause much discomfort, and often serious disorders—perhaps even appendicitis.

Children should be taught to chew their food well, for the healthy condition of the mouth and teeth in after life depends upon their doing so. If the jaw does not grow properly there is not enough room for the teeth. Now, the growth of the jaw depends in large measure on the mastication it is called upon to do. The teeth themselves suffer also. They miss the active circulation of the blood, the stimulation of the gums, and the cleansing of the mouth by the salivary glands that follow upon the act of chewing.—Youth's Companion.

A Drink and a Fight.

The Albanians used to practice a form of dueling well nigh as fatal as that advocated by Sir Charles Napier. Sir Richard Burton, who once commanded a corps of bashibazouks, writes that "the Albanian contingent, who generally fight when they are drunk, had a peculiar style of monomachy. The principals, attended by their seconds and by all their friends, stood close opposite, each holding a cocked pistol in his right hand and a glass of raki or spirits of wine in his left. The first to drain his draught had the right to fire, and generally blazed away with fatal effect. It would have been useless to discourage this practice, but I insisted on fair play."—London Chronicle.

Placing the House.

Don't put the house too close to the main road. Have it at least 100 feet away. When you get it too close dust comes into the house, and you sacrifice the privacy of the home to a certain extent. Houses too close to the road do not look well and are not as valuable. Notice this next time you drive to town. Provide a windbreak and trees for shade. Have the main highway in view from certain windows in the house.—Progressive Farmer.

An Exception.

"It is rather strange about Miss Maddox."
"What has happened to her?"
"She sings beautifully—remarkably, in fact."
"Yes, I know, but that is not strange. There are plenty of young women who sing well."
"Still, here is a remarkable case. She has never, so far as I am aware, been called the Patti of this town."—Chicago Record-Herald.

DAMES AND DAUGHTERS.

Mrs. Ella Van Bramer of Pittsfield, Mass., is now in her one hundred and second year.

Lillian Engstrom of New York just after hearing that she had fallen heir to \$150,000 fell and seriously injured herself, owing to excitement.

Miss Van Ingen of the district nursing committee of the New York bureau of charities is a "detective nurse." She sleuths around Brooklyn searching for crippled children who need care and attention.

Miss Olive C. Purser, the first to obtain a scholarship at Trinity college, Dublin, after women were admitted to the university, has just been appointed temporary lecturer on English history in the institution.

Miss Anna Bernsten, daughter of the Danish prime minister, has just served three years' apprenticeship as a joiner. She began her studies in an institute, where she learned carving of various kinds. One of the first pieces of work which she finished, a small box, was purchased by the dowager empress of Russia.

Flippant Flings.

How are Edison's talking motion pictures to succeed on the stage, since they can neither lose jewels nor be divorced?—Chicago News.

When women get the vote the only way that will remain for men to show their superiority will be to raise whiskers.—Cleveland Leader.

A Chicago man had a \$1,000 wad and a goat. He still has the goat, though the creature was still hungry after a breakfast that cost \$1,000.—Cleveland Plain Dealer.

A Missouri man is going to marry the girl whose name he found written on an egg. Had he got the egg in time they might now be celebrating their silver wedding.—Washington Post.

Current Comment.

In the new spelling, hicough is spelled hicup. Why not be consistent and spell it hic? That's all it is.—Cleveland Leader.

None but a rich man can be a diplomatist. It used to be the same way about golf—both are great games.—St. Louis Globe-Democrat.

There's a disposition to regard the Emperor as a "stunt." It is a triumph of science and skill and a monument to German enterprise.—New York World.

The amount of "conscience money" returned to the government is not half as much as it used to be. This shows that there is less stealing or less conscience.—New Orleans Picayune.

Education Notes.

Through its extension division the University of Kansas will give courses of lectures on moral education in a number of the largest cities of the state during the fall of 1913.

The distinction of having the best paid one room country schoolteacher in the United States is claimed by Logan county, Ill., which pays its teacher \$110 per month for a term of nine months.

School lunches are served free or at nominal cost to elementary school children in 41 American cities, in 200 English, 150 German and 1,200 French communities, according to C. F. Langworthy, chief of nutrition investigations at Washington.

The Art of War.

Dogs are made use of to haul light artillery in the Belgian army and are being experimented with by the Holland army.

The English navy has developed fire control to the point that a single officer can discharge all the guns on one side of a ship at the same instant, all the shells reaching the target together and delivering a crushing blow.

French army engineers have designed a field gun for firing at airships that is carried on the rear of an automobile, can be aimed almost vertically and is provided with mechanism to relieve the automobile of the recoil shock.

Town Topics.

Pittsburgh is using a vacuum cleaner in its streets. If such a device would only work in its atmosphere!—Boston Herald.

From their lofty heights the great hotel cities of the country.—New York.

Houston and Chicago—look serenely down upon little lunch counter towns like Atlanta, Memphis, Philadelphia and St. Louis.—Houston Post.

Limiting the height of New York skyscrapers at this late day will suggest locking the barn door after the horse is stolen. Such a law would vest owners of the existing tall buildings with a singular monopoly.—New York World.

Train and Track.

More than 900,000 men are employed a railways of the United Kingdom.

To save time for transatlantic travelers a railroad across Ireland is proposed.

Iceland is presently to have its first railway, a line six and one-half miles long around the city and harbor of Reykjavik.

The most up to date electric railway service in the far east is the government's double track line between Tokyo and Yokohama.

WOMEN WARRIORS.

Amazons of Old Appear to Have Been Dames of High Degree.

For a long time it was held that the story of the Amazons, the valiant race of women warriors, so great a favorite with the Greeks and other peoples of antiquity, was a mere poetic myth, but within recent years archaeological researches have indicated that there were indeed women fighters of high rank in those remote days.

A couple of years ago there was unearthed a sepulcher in that part of Italy known as Etruria in which was discovered a war chariot of bronze and iron, wherein was crouched the skeleton of a woman. About this skeleton were the remains of rich robes and ornaments of gold and ivory, such as in the old traditions the Amazons wore in battle. The bronze work and the terra cotta vases fixed the date of the tomb as about 800 B. C.

The first stories of the Amazons assigned them to the northeastern part of Asia Minor, but Etruria was peopled from Asia Minor and had attained a high degree of skill in certain of the arts long before Rome was founded. Such evidence as this tomb affords is, in the opinion of more than one authority, more convincing than the pictures of Amazons on the old vases or such legends as that of Queen Penthesilea, who was said to have led 5,000 women fighters to the aid of Priam during the Trojan war.—Harper's Weekly.

BLACK SEA DEAD LINE.

Below 1,200 Feet the Poisonous Water Kills All Organic Life.

The Black sea, which in some parts has a depth of more than 6,500 feet, is poisoned by sulphureted hydrogen wherever the water is deeper than 1,200 feet. This accounts for the curious fact that there is no organic life below that depth, excepting perhaps some bacteria of very low order, impregnated with sulphur.

The causes for this phenomenon are explained by the quick outflow of the fresh water through the Bosphorus, while salt water coming from the Mediterranean enters through a deeper current into the depths of the Black sea. The waters on the surface are, therefore, controlled absolutely by horizontal currents of considerable force, and vertical currents which might carry the noxious gases from the bottom to the surface and fresh oxygen from the surface to the bottom are hardly ever noticeable.

The water at great depths is so saturated with sulphuric gas by the disintegration of organic matter sinking to the bottom by reason of its weight that no fish or other living being which needs oxygen for its organic system can exist beyond a stated depth.—London Standard.

Made in Glasgow.

It was a long and tedious train journey, says the Glasgow News, and the other two occupants of the compartment had exhausted several other topics and were now "on" about cock-fighting. "When I was a lump of a liddle in Blantyre," said one of them, "I had a wee bantam that could bate any bird ye could pit before him. Weel, this Sunday mornin' he bate two cocks, yin efter the ither, but he was that sair torn that to pit him out o' pain I thrashed his neck and threw him on the midden. Then we took out another pair o' birds, and yin o' them crawled his challenge, when up me wee bantam staggered tae his feet, gied a cock-a-leerie-law, and drappit doon dead aff the midden." "Ye're an awfu' man, Wully," said the other man solemnly.

"Are ye no' feart ye drap doon deld yerseel?"

Not Sufficiently Explicit.

"I think we met at a summer resort two or three years ago, didn't we?" "Perhaps we did. Your face looks very familiar to me."

"It ought to. I proposed to you one evening and you accepted me."

"Did I? Do you remember where it was?"

"It was on a hotel veranda, behind a lot of palms and rubber plants."

"Oh, you will have to be more explicit than that. Nearly half of my engagements have taken place with that kind of a stage setting."—Chicago Record-Herald.

Not an Uncommon Experience.

"I don't know whether or not it's because they have a personal grudge against me," said the smiling cynic, "but I know when I ride in full daylight on a street car with which I'm perfectly familiar the conductor calls every cross street loudly and clearly, but when I'm trying to find my way on a dark night in an entirely new neighborhood he's silent as a church on a Monday morning."—Milwaukee Sentinel.

Jumbled Wrong.

Manager—My dear madam, your complaint is a very foolish one. The stage director did not slander you because he gave your role to another actress. Actress—Of course he slandered me. Didn't he take away my character?—Baltimore American.

He Knew.

Lady Customer I wish to tell you how these shoes of mine are to be made. Shoemaker—Oh, I know that well enough—large inside and small outside.—Magdonorfer Blatter.

Pretty Bad.

Wife—Aren't you going to smoke those cigars I gave you? Husband—No, I'm keeping them till Tommy begins to want to smoke. They'll settle it.—Illustrated Bits.

BELL CORDS ON TRAINS.

Their Origin, According to an Old Railroad Tradition.

The way the bell cord came into use is about as interesting a railroad tradition as there is. Nearly every one of the older lines in the country claims to have originated it. One of the likeliest claimants is the Baltimore and Ohio. In those early days most of the conductors' takings were cash fares, and tickets were a rarity. Disputes with people who either couldn't or wouldn't pay were therefore of frequent occurrence. To put these off, stopping the train between stations, the conductor had to send a brakeman ahead over the freight cars and make a polite request of the engineer.

A bright young B. and O. conductor one day devised a plan to signal the engineer without sending the brakeman forward. He hung a stick on the engine cab and hitched to one end of it a clothesline which he ran back over the tops of the cars so that the stick would wriggle when the rope was pulled. He carefully explained his scheme to the engineer. The latter looked at it scornfully and made no answer. Three-quarters of a century ago the man in the cab was a high and mighty person to whom no mere conductor could give orders.

This run started, and it was not long before the engineer saw the stick signaling him to stop. Instead of even slowing up, he let out the throttle a few notches and grinned at his fireman. At the next station they had to lie out for another train, and the young conductor came ahead with fire in his eye. The engineer finally climbed down from his cab and showed fight. Fortunately for railroad history the conductor was the stronger man. Stick signals were thereafter obeyed on that train.

Almost immediately the story reached the ears of the superintendent. He at once saw the conductor's idea was a capital one and set about installing the bell cord signal system, practically the same as it exists today.—Chicago Record-Herald.

WANTED AND FOR SALE

Newberg Lodge No. 104 A. F. & A. M. Regular meeting First and Third Wednesday evenings of each month.

Visiting brothers always welcome. By order W. M. R. H. C. Bennett, L. A. Hanning, Secretary.

Dry fir wood for sale.—J. T. Everest.

For well digging. See F. M. Ross, Route 2. 42-46

Money to loan on improved farm security. Clarence Butt.

MONEY TO LOAN—See Atty. B. A. Kliks, McMinnville, Oregon.

Wanted—Early pullets, Leghorns preferred. J. T. Everest. tf.
