Doubtless you have noticed that the electric lights have been shining with an unusual lustre during the past week, and also that Superintendent R. J. Moore has been walking with an elastic step when going about his work. The explanation is easy. Mrs. Moore and the babies are home from "way down in Georgia," where they spent a couple of months visiting, and bachelor quarters have been broken up. Mr. Moore says he don't think he will ever consent to a family separation again.

Roy Clark, a former Newberg lad, who is now assistant in the office of the State Engineer at Salem, stopped off here between trains on Monday. He came from McMinnville where he submitted plans for the new steel bridge over the Yamhill river at Dayton, to the county court. Plans for bridges throughout the state are now furnished from the office of the State Engineer, and this work has been assigned to Mr. Clark. He has drawn plans for twenty-seven bridges since taking a position in the office.

Frank Garner and family, consisting of wife and four daughters, who passed through Newberg Tuesday on the way to Southern California from their home at Cheney, Washington, visited while in town with S. P. Timberlake and family. Mr. Garner said he rented his property at Cheney with a view of spending a year in travel to show his daughters, who had never been away from home, something of the world. He fitted out a spring wagon, making it comfortable for travel, and they are on their way south, traveling by easy stages.

A Queer Election.

In ancient days, it has been averred, the people of Grimsby formed an admirable notion of the wisdom required for corporation honors. The burgesses assembled at the church and selected three of themselves as candidates for the mayoralty. The candidates were conducted, with a bunch of hay tied to each of their backs, to the common pound, in which they were placed blindfolded with a calf, and he whose bunch of hay was the first eaten by the calf was thereupon declared mayor for the ensuing year. —London Answers.

Sunshine and Long Life.

Some towns on the Italian side of the Swiss Alps are noted for the great number of sunny days. Carabietta and Pentilino, near Lugano, head the list with 327 and 331 sunny days respectively in one year. Possibly because of this liberal amount of sunshine the percentage of old people is exceptionally high in the canton of Tessin, forty-four per thousand being over seventy years old and ten per thousand over eighty.

Venus.

Inhabitants of Venus, if there are any, must find it extremely difficult to establish units of time. Venus always turns the same face toward the sun, so the planet has no day, and the lack of a moon deprives it of a month. Finally it has no year, for its axis of rotation is perpendicular to the plane of its orbit, and the latter is almost circular.

The Watch That is the best for the railroad man is the best watch for you

Because no man gives a watch harder use and no man expects as much of a watch as a railroad man. For it not only means his job, but his life and the lives of those trusted to him.

After I learned to make every piece of a watch, I worked in a railroad inspection office, where we had to take care of the men's watches of eight Eastern railroads.

One day I counted and found that out of 1035 Railroad men 702 carried Hamilton watches.

It is a watch that as soon as you realize half its value you will not be satisfied until you carry a Hamilton watch.

If you are not now in shape to buy a Hamilton watch, come in, for we are always proud to explain their good points, why they will last you a lifetime and give you perfect time.
