On being asked what he thought of the war outlook in Europe, he said he was born in the Netherlands and his opinion was that the Kaiser needed a good licking.

Up in the Palouse country in Eastern Washington a brother of W. L. Robertson lost a threshing machine recently by a dynamite explosion. A number of other machines in that section have been destroyed in the same way this season. The work is laid to labor agitators who are demanding that the threshing men adopt the eight hour system. It is asserted that their methods are to go into a field and fasten sticks of dynamite in sheaves of grain, which are later fed into the machines. About how far are we removed from the days of savagery, anyway?

The peach crop seems to be good and several new varieties are coming into market to compete with the old stand-by, the Crawford, for favors at the hands of the peach cobbler makers. Zimri Mills, of Springbrook, who is experimenting with several new varieties, sold several boxes of the St John in Newberg last week that found ready buyers. The St John is not so large as the Crawford, but has a very rich yellow color and seems to ripen more evenly than the Crawford which has a tendency to ripen one side first, the other side often remaining green.

Two of a Kind.

A young matron, giving a dinner party, was nervous lest the new cook might not prove equal to the occasion. Going down to the kitchen at the eleventh hour, she exclaimed: "Why, Ellen! If we haven't forgotten all about the entrees!"

"Shure enough we have,

mum!" replied Ellen, poising in mid-air a large platter she was wiping. "Ain't we the couple of blunder-headed mutts!"

Saved by a Smile.

"Yes, I had a narrow escape once. It was in Calcutta when the plague was raging—many years ago, when Europeans had little better chance than the natives. The hospitals were full to overflowing, and I, with many others, was lying in a large shed put up for the purpose. Some of the poor chaps were dead, and I pretty near it, when a man came around with one of the doctors to measure the bodies, and I learned from their talk that they counted me already among the corpses. I was too far gone to cry out. I could not move; I could not even open my eyes."

"What did you do?"

"Oh, I just smiled!"—Westminster Gazette.

Cheering the Prisoner.

In "My Varied Life" Mr. F. O. Phillips tells some stories of incidents in assize courts.

Mr. Baron Martin, at the Guildford assizes, was trying a man for murder, and he summed up the jury dead against the prisoner.

The jury, however, too a merciful view of the case and returned a verdict of manslaughter. Baron Martin was always very brief in his sentences and never attempted to harrow a prisoner's feelings.

"Prisoner at the bar," said the old Scotsman, "you're the luckiest man I ever came across. Tak' penal servitude for life."

The Mathematical Problem.

Little Marion was busy at her "home work." After a great many perplexed frowns and much nibbling at her pencil she looked up and said:

"The only answer I can get to

this example is 'five and three-fourths horses.' Do you s'pose that is right, mamma?"

"Well, I don't know," answered her mother cautiously. "It sounds rather queer."

A long pause; then the small arithmetician's face lit up with a smile.

"Oh, I know," she cried; "I'll reduce the three-fourths horses to colts!"

Did you ever stop to think that your child could have been at the head of the class had there been no eye strain?

Do you know that nine students out of ten whose eyes are not perfect are dull in school?

School will soon be commencing. Are you going to let your child be at the foot of the class this year, because you neglected to have his eyes corrected?

Now is the time to act.
