

COMING TO NEWBERG SPECIALISTS

From the
**Cataphoric Medical
Institute**

ST. LOUIS, MO.

Will pay their first visit to

Newberg, Ore.

And will be at

The Imperial Hotel

Tuesday and Wednesday

September 8-9

2—TWO DAYS ONLY—2

This being an Advertising Trip, to
Introduce This New System,
They Will Give Consultation,
Examination, Advice and All
Treatment Necessary to Com-
plete a Cure—FREE.

The object is to get just as many positive
cures as they can in the shortest
possible time, and it will be expected of all
patients taking advantage of this offer to state
to their friends the results obtained by their
system of treatment. They treat ALL KINDS
OF CHRONIC DISEASES AND DEFORMITIES.
It is very seldom that a community so situated
as the one in which we live has the privilege
of consulting such renowned specialists,
who are in constant attendance to wait on you,
diagnose your case, give you the benefit of their
knowledge. There is no experimenting or guess
work on our part. We will tell you whether you
are cured or not. If your case is curable they will
treat you; if incurable they will give you such
advice as to prolong your life.

They treat diseases by an entirely new
method, and hearing is restored to many at
once. CATARRH in all its VARIETIES, whether
it be in the nose, throat, or lungs, is cured by
the cold catching tendency by the electrical
absorption of medicine. If you have weak lungs
do not fail to be examined.

The new discovery of absorbing medicine by
electricity in paralysis, loss of memory, rigor,
rheumatism and all diseases of the nervous system,
including EPILEPSY, is a God-send to
suffering humanity. Medical and scientific men
stand amazed at the marvellous cures that are
being effected wherever this system is being in-
troduced. Thousands who have given up all
hope of ever being cured now have an oppor-
tunity of a lifetime to consult skilled specialists
of National reputation. Remember their knowl-
edge of medicine combined with electricity gives
them control of diseases that others do not
possess. If you have WEAK EYES, come and
see the great DOCTOR, Dr. H. V. VAN DER BEEK,
able discovery, cures all those afflicted with
failing eyesight, cataracts or functional blind-
ness. The blind made to see by their entirely
new methods. Be examined. Come and test
it for yourself. Eyes expertly tested and treated.
ALL THIS IS FREE OF CHARGE.

When everything else has failed Radio Ther-
apy Treatments have sent a dispatch with the
rapidity of lightning to affected parts and re-
sults have been like smoke in the air.
The worst and most stubborn case of rheuma-
tism, paralysis, sciatica, brain, nerve, heart and
spinal diseases, lung and throat troubles, blood
disorders, asthma, catarrh, piles, deafness, fits,
skin diseases, liver, kidney, bladder, stomach
and nervousness, dyspepsia, acidity and perma-
nently relieved by the treatments. Also the
quickest cure in the world for ALLMENTS OF
MEN AND WOMEN.

Cretches laid down; boundless gratitude of
those who have been set free. Slavery of
disease is abolished. Infirmities for ages
yield to the radio active treatments.

Radio activity treatments drive gloom from your
brain and vitalize every nerve in your
body.
Radio activity treatments are real nerve vital-
izers—they thrill the brain and bore into the
strength and vitality, making old folks young
again. They renew ambition and courage when
life has dragged along, clear up dull, musty
ideas and bring back your old vigor and energy.
Come hard, your muscles and nerves go weak,
and you feel as if you were "losing your grip."
Radio treatments renew your nerve force and
bring back your vigor and vim.

The joy of perfect digestion, perfect circula-
tion, perfect health. Every nerve and every
fiber of your whole body awakens through this
wonderful Radio Therapy. Feel the thrill-
ling thrill of youth—make every nerve and
function in your body fairly tremble and tingle
with new force and energy. Trembling, nerv-
ous prostration and that tired feeling vanish
after a treatment of Radio Therapy.

Every run-down, weakened, tired-out, nervous
person is invited to call and try the Radio
Treatments.

NONE ARE SO BLIND AS THEY WHO
REFUSE TO SEE!

"Because one billion people in this world say
that a thing is a lie, and but one person claims
it is the truth, it does not follow that the billion
are right."

Hundreds of years ago Galileo claimed that
the world was round and revolved. A billion
called him a madman. Near the middle of the
last century Morse said that it would be pos-
sible to send messages over a wire by means of
electricity. A billion called him a fraud. Bell,
in our own time said that sound waves could be
transmitted from New York to San Francisco, and
Bell was branded a dreamer. Marconi's prediction that
radio messages could be flashed over the track-
less miles of sea separating Japan from San
Francisco without wires was hailed as the joke
of the century. Morse's prediction that tele-
graphic messages could be flashed over the track-
less miles of sea separating Japan from San
Francisco without wires was hailed as the joke
of the century. Morse's prediction that tele-
graphic messages could be flashed over the track-
less miles of sea separating Japan from San
Francisco without wires was hailed as the joke
of the century.

Who was right and sane, the billion or the
one man?
Although the cataphoric treatment is being
extensively used in Europe and throughout the
East in the treatment of chronic, difficult and
long standing cases, it has never before been
introduced in this country. You can now afford to
overlook this opportunity to get well.

VARIOUS VEINS CURED permanently in a
few days.

Remember this liberal offer is for this first
trip only and not one cent will be charged for
all the treatments required to make a perma-
nent cure of all those connecting treatment on
this first visit.

Office Hours: 9 a. m. to 7:30 p. m.

SEPTEMBER 8 AND 9

Guardian's Sale of Real Estate

Notice is hereby given that the undersigned,
Maud McGuire, as guardian of the persons and
of the estates of Ward Livingston Miller and
Hazel J. Miller, minors, has been heretofore
by an order of the county court of the state of
Oregon, for Yamhill county, made and entered
on June 29, 1914, duly authorized and licensed
to sell all the right title and interest of the
above named minors in and to the following
described real estate, to-wit:

Beginning at a point in the center of the
county road on the west line of the D. L. P. of
William Jones, north 12° west 21.00 chains from
an iron pin set in center of county road 80 links
north of most westerly southwest corner of
said William Jones D. L. C. Not. 1420, Claim 41,
in T. 3 S. R. 2 and S. W. 1/4, in Yamhill
county, Oregon; thence south 89 deg. 20' east
12.50 chains; thence south 5.25 chains; thence
north 80 deg. 20' west 12.90 chains to center of
county road; thence north 5.25 chains to place
of beginning, containing 6.52 acres, and that
said guardian has filed her bond and oath of
office in order to sell said real property.

Now, therefore, all persons are hereby notified
that the undersigned, as such guardian, will,
on Friday September 4, 1914, at the hour of 11
o'clock a. m., at the west end front door of the
Yamhill County Court House, in the city of
McMinnville, Oregon, sell at public auction,
for cash in hand, all the right title and inter-
est which the said minors may have in and to
said real property.

First publication August 6, 1914.

MAUD MCGUIRE,
Guardian of Ward Livingston Miller and Hazel
J. Miller, Minors.

B. A. KLINE, Attorney for said Guardian.

DARK OF THE MOON.

An Effect That is Produced by the
Light From the Earth.

Many people have wondered why
the part of the moon that receives
no sunlight is often visible to us,
the term being the "old moon in
the young moon's arms." The dark
part is easily seen as a copper col-
ored globe reposing in the bright
crescent. This that we see is noth-
ing more or less than the earth
shine on the moon. We appear the
same way to the moon when we are
in that phase, and our dark part is
where the moonshine appears and
the bright part of the sunshine.

The reason the copper color ap-
pears is because light has to trav-
erse the atmosphere of the earth
three times—once on coming from
the sun to the earth, once when re-
flected to the moon, and again on
being reflected back to us. Our at-
mosphere possesses the peculiar
property of absorbing the blue rays
of this white light and allowing only
the red and orange to go through,
thus causing the appearance of cop-
per color by the triple absorption.

An odd thing connected with this
phenomenon, though having noth-
ing to do with it, is this: That part
of the moon which appears dark to
us is the same part of the earth
that appears light to the moon at
any specified time, and that part
of the moon which appears bright
to us corresponds to the portion of
the earth appearing dark to the
moon.

Of course it is well known that
the moon gives out no light what-
ever itself, the moonshine being
merely the light of the sun on the
moon reflected to us. The same ap-
plies with the earth in its shine on
the moon, save that we do give out
glows, no doubt, around great cities
at night, on account of the enor-
mous number of lights. One thing,
however, in which moonshine excels
the earth shine is its constant char-
acter. Where the earth possesses
varying clouds the old moon never
has any at all.—St. Louis Republic.

Stone Cake.

In very unusual seasons the peo-
ple of Rajputan, in India, are de-
prived of seeds and succulent roots
of grasses. Under these very ad-
verse conditions the barks of trees
and even ground up rocks are re-
sorted to principally to give bulk to
the scanty meal and thereby to stay
the pangs of hunger for a longer
time. A soft stone found on the
Bikanir-Marwar border of Jaipur is
largely used in that part of the
country to give bulk to the meager
meal. This stone is friable and
easily ground into fine powder. It
contains an oleaginous substance
which has some nutrient qualities,
and the people have found that
when finely ground and used in
proportions of about one-fourth to
three-fourths of flour it does not
impair digestion for a considerable
time.

Reading the Thumb.

The nail phalanx of the thumb is
the index of a person's will power.
The other phalanx shows the
amount and quality of his judg-
ment, reason, logic. To be properly
balanced both phalanxes should be
of equal length. If the will phalanx
is a trifle shorter than the other the
equipoise is still maintained. But
if either phalanx is considerably
larger than the other one's nature
is made up of conflicting elements.
There is either too much will with
too little judgment to curb it or
too little determination to give ef-
fect to the dictates of reason.

Wherein They Differed.

Dr. Emily Blackwell, one of the
pioneers of her sex in medicine,
heard a young physician deliver a
fiere diatribe against opening the
doors of the profession to women.
When he ceased she asked:

"Will you please tell me one reason
why they should not practice
medicine?"

"Certainly, madam. They haven't
the muscle, the brawn, the physical
strength."

"I see, sir. Your conception of a
sickroom is a slaughter house. Mine
is not."

In the Name of the Law.

A mayor in Paris finished a mar-
riage ceremony recently with the
words "You are united." The wed-
ding party had just left when he re-
membered that he had omitted part
of the formula and that consequen-
tly the marriage was invalid. He
promptly opened the window and
shouted after them, "I say, you
know it is in the name of the law
that you are united."

Bright Officer.

"Did you get his number?" mur-
mured the man who had been run
over by the auto, to the policeman.

"No."

"Well, what kind of a looking
car was it?"

"I don't know. I was trying to
get his number."—Life.

NO PERFECT HUMAN EYE.

Too Much Care Cannot Be Given Those
Hard Worked Organs.

Measurements of human eyes
demonstrate that there is probably
no such thing in the world as an
absolutely perfect eye. That would
be a miracle which nature with all
her infinite ingenuity has never per-
formed. No human face among all
the world's 1,600,000,000 may be
held perfect, either artistically or
physiologically. To the owner of
the face this is relatively an unim-
portant matter, but to the owner of
the pair of eyes an error of one
three hundredth of an inch in the
curvature or dimensions of the eye-
balls may make their all important
function abnormal, resulting in eye
strain with its attendant physical
ills.

The eye responds to the slightest
physical force in the world—that is,
light waves which are hundreds
of millions of times more infinites-
imal than sound waves. The eyes
are the hardest worked of all or-
gans, and the safety and existence
of human lives frequently depend
directly on their accurate working.
The harmful results of eye strain,
never wholly absent throughout
life, may begin very early in child-
hood, even in the second year.

Many little children, for instance,
are constantly tearing their clothes,
hurting their feet and legs, stum-
bling and falling, because their eyes
are so faulty that their estimates of
the size, location and nature of ob-
jects are not correctly made. Adults
who have been blind and are sud-
denly given good vision require
years to learn to see with accuracy
of safety in action. Probably 6 per
cent of children are left handed,
left eyedness causing left handed-
ness. From six to ten years of age
many children show an incompre-
hensible "nervousness," twitching of
the hands and face, fickle appetite
and various disorders, all usually
due to eye strain.

Yet almost all of these cases of
eye strain can be relieved and
should be relieved in early child-
hood. The importance of correct-
ing this condition early in the
child's school years and the influ-
ence of the child must be apparent
to every parent and teacher.—Journ-
al of the American Medical Associa-
tion.

What Papa Put Up With.

No matter how smart and intelli-
gent your little boy is, he is sure to
drive you mad some evening with
the following sort of thing:

"Papa!"

"Well, what on earth do you want
now?"

"Papa, didn't Adam have more
than one name?"

"Of course he didn't have more
than one name. Now, please don't
bother me any more; I'm reading.
One more silly question and you'll
go to bed. Do you understand
that?"

"Yes, of course. But can't I ask
you something about the same ques-
tion?"

"Yes; what is it?"

"Was 'Adam' his first name or
his last name?"—Cleveland Plain
Dealer.

Savona.

The history of Savona is that of
a long struggle with the Genoese,
ended in the sixteenth century,
when they seized the town and ren-
dered its harbor useless by sinking
vessels filled with stones at the en-
trance. In 1746 it was captured by
Sardinia, but was soon back again
under the control of Genoa. The
ancient Savo where Mago stored his
booty in the second Punic war,
Savona was the birthplace of the
popes Sixtus IV. and Julius II. and
the home of the ancestors of Co-
lumbus, who bestowed its name on
one of the first islands he discovered
in the West Indies.—London Stand-
ard.

Then the Other Spoke.

In a Great Western railway car-
riage, on the way to London, a
youth had disturbed and annoyed
the other passengers by loud and
foolish remarks during a great part
of the journey. As the train passed
Hanwell Lunatic asylum he re-
marked:

"I often think how nice the asy-
lum looks from the railway."

"Some day," growled an old gen-
tleman, "you will probably have oc-
casion to remark how nice the rail-
way looks from the asylum."—Lon-
don Answers.

Why She Believed.

"What sort of a chap is that fel-
low who has been calling upon
you?"

"He's the luckiest fellow in the
world."

"How do you know?"

"He told me so."

"And do you believe all he tells
you?"

"I believed that, for he told me
it just after I had promised to be-
come his wife."—Houston Post.

WHERE COCOANUTS GROW.

The Way the Natives Strip, Open and
Eat the Milky Fruit.

I had always imagined that cocoa-
nuts grew on trees just the way we
see them down at the grocery, but
instead of this they have a thick
mat around them. It's harder to
get this off than it is to get the nut
open. I wondered how my friend
was going to get the hull off when
he didn't even have a knife. Tak-
ing up the nut he stepped up to the
tree, turned his back and with long
powerful strokes began hammering
the nut against the bole of the tree
between his legs. After a dozen
strokes the rough outer covering
split enough for him to get his fin-
gers in and pull it off. Then the nut
began to look like the kind Ed An-
drews has. Again I wondered how
he could get into this, for back
home it would be a job with a saw
and ax.

Picking up a pointed stick he
punched out two of the eyes, one
for an air hole, and turning up the
cocoanut offered me a drink. It
wasn't very fancy, but it was filling.
When the milk was out he took a
stone and gave the nut a few hard
blows, and the nut opened almost in
half. With the sharp edge of an-
other stick he rimmed the white
meat loose as though with a spoon
—and there it was for me to eat as
though he had had a whole carpen-
ter shop. The meat was soft and
slippery, like trying to pick up but-
termilk.

In Missouri I had never eaten
them that way, for by the time a
nut travels that far the meat is
hard, and I hurt the man's feelings
by telling him that I preferred the
tough kind. One of the nuts was
hard, and he threw it contemptu-
ously to the pigs that stood in a
circle around us, noses in, but I
rushed out and rescued part of it
in glee. A few moments later I
caught him looking at me as if he
couldn't quite make me out, a man
seemingly normal—but who liked
ripe cocoanuts. —Homer Gray in
Leslie's.

Jumping at a Conclusion.

Elsie sat drearily in the gloaming
in the front room. She was miser-
able, for the previous night she had
words with her lover, and now she
feared he would not call. Suddenly
she heard a step, a ring, a voice she
knew and some one speaking to the
servant in the hall. Not waiting
for a light to be brought she gently
called:

"Come in!"

The visitor entered, and with a
joyful sigh Elsie cast herself into
his arms and softly murmured:

"Oh, my darling, I am so glad you
have come! I have so wanted to
make it up and settle."

"Well, I'm very glad, too, that
you're going to settle up at last,"
said the gas collector. — London
Mail.

Took the Tip.

The good advice of the laird of
Waterton, in Aberdeenshire, to a
sheep stealer reads like a very prac-
tical joke. He had himself sent the
man to jail, and in those days sheep
stealing was a capital offense. Visiting
the prisoner the night before the
trial, he asked him what he
meant to do. To which the prisoner
replied that he intended to con-
fess and pray for mercy.

"Confess!" said Waterton. "What,
man, will ye confess and be hanged?
Nae, nae! Deny it to my face."

He did so and was acquitted.—
Dundee Advertiser.

Saved the Edition.

Sir Frederick Gori Ouseley used
to tell a story about the famous
Clarendon Press at Oxford, which
shows how very easily serious blun-
ders may be made. It was when a
new edition of the Bible was com-
ing out, and not till the final re-
vision of the text, when in another
moment it would have been irrevoc-
ably fixed in immortal type, that
the printer was discovered to have
given the following "free" render-
ing of 1 Corinthians xv, 52:

"The trumpet shall sound, * * *

and we shall be hanged."

The Barn Swallow.

From daylight till dark the barn
swallow on tireless wings destroys
countless numbers of insects. It's
favorite nesting site is the barn
rafter. Farmers can easily provide
in their barns for the entrance and
exit of the birds and thereby add
materially to their numbers. Its
food consists of flies, beetles, wee-
vils, small dung beetles of the May
beetle family, ants, wasps and bees.

Origin of the "Dun."

A dun took its name from a cele-
brated bailiff of London during the
reign of Henry VII. named Joe
Dunn. He was extremely clever in
devising ways and means to compel
unwilling creditors to settle their
accounts, and hence the saying,
"Send Dunn after him" or "Dun
him."

Your Attention, Please!

The fall, with shorter days and longer lighting periods
is approaching. Good light is as essential as good water.
Have your house wired **NOW**. We will do your wiring
and make satisfactory terms with you about payments.

Thos. Edison says: "ELECTRIC LIGHT is the only thing
I know of that has grown cheaper in the last 20 years"

KEEPS YOUR HOME FRESH and CLEAN

Duntley

Combination Pneumatic Sweeper

THIS Swiftly-Sweeping, Easy-Running DUNTLEY Sweeper
cleans without raising dust, and at the same time picks up
pins, lint, ravelings, etc., in ONE OPERATION. Its ease
makes sweeping a simple task quickly finished. It reaches
even the most difficult places, and eliminates the necessity
of moving and lifting all heavy furniture.

The Great Labor Saver of the Home—Every home, large or
small, can enjoy relief from broom drudgery and protection from
the danger of flying dust.

Duntley is the Pioneer of Pneumatic Sweepers—
Has the combination of the Pneumatic Suction Nozzle and
revolving Brush. Very easily operated and absolutely guar-
anteed. In buying a Vacuum Cleaner, why not give
the "Duntley" a trial in your home at our expense!
