SI DRAFT ON "PESTS"

The longer this old world stands the harder the human race has to fight to keep from being utterly devoured by different kinds of pests that blow along and try to take possession. Now the wimmin folks would probably say that the little "flea" is the worst pest they know anything about because it's so hard to run him down. He's born a natural broad-jumper and when you get after him he generally makes tracks, and about the only way to get rid of him is to catch him and kill him. And then there's the dreaded little fly the worst known spreader of disease. Why, don't you know that one fly will lay and hatch several million eggs a season if you let 'em live peaceably in your home. Of course some of them have had accidents and light on bald heads and slide off and break their necks but the average fly is very athletic and generally lives through the season unless you "swat" him. The boys at 'The Big Hdwe. Store' have got in a big lot of swatters and are goin' to start a war on flies. They will give one free to any grown up teler that comes into the store and asks for one. I reckon that's fair enough ain't it?

And there's bugs that get on our trees nowadays, add little worms on the cabbage, and gophers and moles dig up the lawn and the garden and what's feller a goin' to do about it? Well don't ask me, you jest hitch up and drive down there to Larkin-Prince Hdwe. Co., and the boys will fix you up with the right kind of dope, at popular prices and I know them cinch traps they are sellin' for moles and gophers do get 'em. You take no chances when you trade with the boys. Any storekeeper that sells such goods as John Deere Implements, Acme Quality Paints, Chi-Namel Varnish, etc., has got the right idee of merchandisin', and that is he knows the "Quality" stuff and that's what counts in the long run. The "quality" is remembered long after the "price" is forgotten; you know, and jest as sure as you're born it pays to trade at a place where you always get the right kind of goods or your money back. That's the way Larkin-Prince do business.
