

—a FOUR
with the Power
and Flexibility
of most Sixes!

With its big 3 3/4-inch bore x 5-inch stroke FORTY horse power motor, this Studebaker rivals most of the Sixes on the market both in POWER and in flexibility of operation. It has driving, brute power that masters any hill or the roughest going you ever met. And yet it is power so marvelously adapted to the car's weight that it is as economical of fuel as most cars with much less power.

It's a motor that makes this new Studebaker a wonder to drive, and we'd just like to have the opportunity of taking you for a trial run, anywhere you say, as long as you say, as HARD as you say. Come in today.

A road meeting was held at the church last Wednesday night. Quite a number of interested men were present. Enough volunteer work has been pledged by taxpayers of this district to haul all

the rock which can be crushed this summer. This is an excellent manifestation of the desires of the residents of the community for good roads.

On Wednesday of last week members of the local Ladies' Aid Society were entertained at the home of Mrs. Joanna Davis. A large number were present to partake of the elaborate dinner and to enjoy the social hours that followed.

The West Chehalis band is preparing to give a concert and entertainment at the Ewing Young school Friday evening, March 24. Rumors are that the south side will put on a stunt entitled "The Silent Barber Shop." Next week a hint will be given as to what the north side will present. Selections by the band will be given during the entertainment.

CALIFORNIA SUFFERERS

HEARD FROM

Mrs. C. H. Christenson has had letters from her niece, Mrs. McKittrick, of Otay, near San Diego telling of the experiences of the family at the time of the flooding of the valley occasioned by the breaking of dams. From these letters the following notes are taken:

You are thinking of the dam back of our place but that was not the dam that broke. It was the one eight miles up the valley. The water ran over the top and the pressure and washing made it give way in the middle. The people who saw it say it opened like two big doors—and let all that body of water right down on the valley. The river was very high anyway and the two together took everything, coming with such force that it tore up land eight and ten feet deep, so we have nothing but sand and gravel where that fine soil was.

We figured up today and found our total loss to be \$14,000—quite a sum to go up in ten minutes but we are thankful we had our house all nice and dry to come back to. Out of 32 acres we have 6 left and no water

as all the plants are gone. Every tree wiped out.

Papa came near being caught. Was near the barn when the rush came and got his feet wet but made for safety.

There are very few houses left in Otay. Those that remain were lifted up and jambed together so the village looks terrible.

The loss of life was not heavy, owing to warnings sent out. They had riders out all day warning people to get out, and it was those who stayed that were drowned. One old man about 80 would not go. The water took him and his house away down below Otay where he was left all night in water up to his neck. He is an infidel, but he says all he could say was, "Oh God have mercy."

I don't know what we shall do but think we will strike out for Portland as soon as we can dispose of what little we have left.
