

Worth Careful Thought

Do you read the label to know whether your baking powder is made from cream of tartar or, on the other hand, from alum or phosphate?

Royal Baking Powder is made from cream of tartar, derived from grapes, and adds to the food only wholesome qualities.

Other baking powders contain alum or phosphate, both of mineral origin, and used as substitutes for cream of tartar because of their cheapness.

Never sacrifice quality and healthfulness for low price.

This is Important to You

There are many people who suffer with physical ailments that do not know that the eye is responsible for these troubles.

There are people who have had headaches, been nervous, had stomach trouble and similar ailments, due to eye strain, for 20 and even 30 years, who would never suspect glasses would give relief.

Whenever sight is not perfect, the muscles of the eye are always on a strain, and it takes more nerve force to supply these muscles of the eye than should have to go to the eyes, thus robbing other parts of the body.

When we have the very best instruments and take the same pains with your eyes as we would with our own.
