

HAWAII'S FAMED VOLCANO.

Kilauea Could Pose as a Model of the Infernal Regions.

Of the volcano of Kilauea who shall speak? Approach it as cynically as you like, you will be startled from your indifference. It will be strange if you do not feel, looking down into that pit, many comfortable veils stripped off your swathed mind. A naked human emotion is a great and terrible thing to encounter, sometimes a thing to turn one's face from.

But this is even more appalling. You may clutch first off at the easy metaphor of hell. Kilauea is not like hell; it is worse—worse because there is no moral significance in it to knit our souls to such a spectacle. Dante's eighth circle, with its barattieri sunk in boiling pitch, was part of a mighty plan, a physical result of moral facts, comprehensible, its very hideousness dependent on the historic three score years and ten of mortal life.

You can avoid hell by being good, and even if you descend into it you will have human company. But this has nothing to do with vice or virtue. It makes naught of moral values. You squat on that rim and stare 700 feet down into Halemau-mau—the inner pit of Kilauea—and history is superseded. The sulphur stench blows up now and then like a great wave and drives you gasping from the brink. You wander about the lava bed for a little (you could wander on that same lava bed for miles if you chose) and then return.

The simple fact of Halemau-mau is a pit some twenty acres in extent that seethes and boils incessantly. Every few moments an acre of solid lava rises up out of the caldron, is sucked back into the scarlet waves and molten again before your eyes. In another corner of the pit a fiery fountain bursts like a great geyser. The worst of it is that you can hear it. The pot seethes and boils and groans in your very ears, for all the 700 feet between you and it.

And if you cared to make a mis-step you could bound from little ledge to little ledge, straight into the mutter and flame of it. I leave you to imagine the spectacle of Kilauea when the sudden tropic night has fallen on the vast crater of which Halemau-mau is only the deepest pocket.—Katharine Fullerton Gerould in Scribner's.

French Scots.

There is an ancient settlement of highland Scots, near Murray bay, on the St. Lawrence, which has adopted the French language instead of English. It was formed of disbanded soldiers soon after the British conquest of Canada, and officers and men intermarried with the French Canadians, adopting their language and habits so completely that, though they bear such names as Blackburn, Warren, McLean and McNicholl, their dependents are in all other respects as French as the inhabitants around them.

Red Flannel Currency.

A Scotch missionary to a group of small islands in the south Pacific a great many years ago found bits of red flannel circulating as money. This currency came to them in a curious manner. The body of a shipwrecked sailor had drifted ashore, and to the untutored savages, who had never before seen clothing of any kind, his red flannel shirt was an object of wonder and admiration. By common consent they cut the garment into small pieces, which thenceforth became the currency of the island.

Those Little Dishes.

Tommy ate his first meal at a country hotel when he was nine years old, and the experience was an event. He was especially interested in the collection of small, thick dishes containing side orders scattered about his plate. When he went home he gave a graphic description of the meal.

"And what do you think, mamma," he concluded, "we ate most of the things out of birds' bathtubs."—Woman's Home Companion.

Clearing Houses.

The function of a clearing house is to enable bankers to exchange drafts, bills and securities, thereby saving much labor and trouble and at the same time curtailing the amount of floating cash that would otherwise be required. By means of the transfer system made possible by the clearing house transactions to the amount of millions are settled easily and expeditiously.

Works Like a Charm.

Hanson—Wonder how it is that the Jugginses get along so harmoniously. They never have any quarrels, apparently. Burt—The reason is simple enough. Juggins always lets Mrs. J. have the last word, and she never tries to prevent him from having his own way.—Boston Transcript.

GENUINE OLD FAMILIES.

Some in Europe and the Orient That Are Really Ancient.

In Great Britain and on the continent those families pride themselves that count their ancestry through ten generations, but their claims to really ancient lineage seem insignificant when compared with those of certain houses in the orient.

We read that the oldest family in Great Britain, the Mar family in Scotland, may trace its pedigree to 1093. Then, too, we have the Campbells of Argyll, whose date is put down at 1190. The Grosvenor family, that of the Duke of Westminster, refers its origin to the same year that the Conqueror "came over"—i. e., 1066. The Austrian house of Hapsburg goes back further than that, its date being 952, while the Bourbons proudly mention 864 as the date of their origin.

But none of them is to be mentioned in the same breath with the emperor of Japan, whose office has been filled by members of his family for a period of over 2,500 years, the present ruler being the one hundred and twenty-second in the line. The first emperor of Japan sat on the throne about the time when Nebuchadnezzar was flourishing—that is, in 650 B. C.

Another oriental branch, the descendants of Mohammed, presents claims not to be dismissed. The prophet was born in 570, and a list of his descendants has been carefully retained, being duly set forth in a volume kept in Mecca. Little or no doubt exists of the authenticity of the long list of names of Mohammed's descendants as registered in this sacred book.—London Standard.

Queen Elizabeth's Amulet.

Queen Elizabeth during her last illness wore around her neck a charm made of gold which had been bequeathed to her by an old woman in Wales, who declared that so long as the queen wore it she would never be ill. The amulet, as was generally the case, proved of no avail, and Elizabeth, notwithstanding her faith in the charm, not only sickened, but died. During the plague in London people wore amulets to keep off the dread destroyer. Amulets of arsenic were worn near the heart. Quills of quicksilver were hung around the neck and also the powder of toads.

The Auger Fish.

The auger fish, half fish, half crab, is the terror of all vessels but ironclads that use the south seas. This creature, which is not bigger than an almond, has a proboscis like an enlarged gnat stinging that can bore through even sheet iron. Auger fish frequent many of the lagoons of the coral islands and burrow holes for themselves in the coral, but they have a perverse habit of doing the same thing to ships lying at anchor, and the damage generally shows itself when next the vessel is at sea in bad weather, with disastrous results.

Mrs. Malaprop.

Mr. Andrew Lang once collected malapropisms. One of these is as follows: "Visitor—I am very sorry for the death of your poor aunt. A very aged woman she must have been. Bereaved Niece—Yes, ma'am. In two or three years she would have been a centurion."

Another is: "Rural Parishioner (about to marry for the second time) to congratulatory friend—Weel, I'm marrying mostly for the sake of the bairns. If it was just mase! I could e'en gang on being a celebrity."

Mamma's Darling.

It was at the piano. Mother's darling firmly refused to do her practice. "What a naughty little girl you are!" chided the mother. "Don't care," grumbled the youngster as she gave the piano a kick.

"Now, treasure, you shall have a nickel if you'll do your exercises nicely," urged mamma. "Shan't," retorted treasure, getting off the piano stool. "I can make more than that taking castor oil."—Argonaut.

None of His Making.

"This is a handsome country home we are passing." "Yes. It belongs to a man who was a poor clerk a few years ago." "Another spectacular rise to fortune, eh?"

"Well, not exactly. I understand the father of the girl he married worked a great many years to accumulate a million."—Birmingham Age-Herald.

A Matter of Birthdays.

Teacher—Why were you not at school yesterday?

Willie—It was my birthday.

Teacher—But I don't stay home from school on my birthday.

Willie—Well, I guess you've got used to 'em.—Philadelphia Record.

SUBDUING ANGRY BILLOWS.

How a Turbulent Sea May Be Calmed by Rising Air Bubbles.

Philip Brasher, a young engineer and a graduate of Princeton university, said to himself not long ago, "If the wind makes the waves, why not use air in motion in another way to still the storm tossed waters?" And the most astonishing part of this seemingly fanciful idea is that he has made it a fact. True, he has not calmed the tempest, but he has robbed the waves of their power to do harm and saved a costly pier that would in all likelihood have been smashed to bits or badly damaged by the billows. He was able to perform this seeming marvel at El Segundo, Cal., by means of a breakerwater of bubbles.

This novel breakerwater is nothing more than iron pipe laid upon the ocean's sandy bottom. It is pierced with small holes, from which streams of air bubbles can be forced upward when compressed. The pipes are laid so as to rest right across the path of the oncoming waves, and the rising bubbles catch the waves before they can reach the pier and rob them of their strength by upsetting the motion inside of the waves. The billows collapse like stricken giants and then roll landward without power enough left to do the pier harm. "But," you will ask, "how can air bubbles do what a big stone wall sometimes fails to do?"

To the eye each wave seems to be a separate body of surging water and apparently goes sweeping along. But this is not really the fact. The mass of the water does not move forward. A wave robbed of its internal motion collapses and cannot pass on this motion to the water next ahead of it. In short, it cannot create another wave. The way to upset this internal motion, then, is to disturb or break up the body of the wave. Mr. Brasher does this by the explosive action of rising air bubbles, and thus he halts the travel of the energy which causes wave after wave.—Robert G. Skerrett in St. Nicholas.

At a Wedding Breakfast.

After a marriage recently the bridal party partook of a sumptuous breakfast, toward the end of which a younger brother of the bride got up and said solemnly, raising his glass:

"Ladies and gentlemen, I have to propose a toast, which, however, must be drunk standing. Please take your glasses and rise up."

The guests, although somewhat bewildered, did so.

"Now," said the young scapegrace, "if you will remain standing for a few minutes I'll find out who has been sitting on my new hat."—London Tit-Bits.

As She Saw It.

"What is the meaning of specter, Lizzie?"

"Please, sir, I don't know."

"Now, think. What is the specter that usually frightens people?"

"The school 'specter, sir."—Pall Mall Gazette.

An Example.

"The evil that men do lives after them." Even when the amateur cornet player dies he leaves the fatal instrument behind.—London Tit-Bits.

Hold all the skirts of thy mantle extended when heaven is raining gold.—Eastern Proverb.

Newberg Lodge No. 104 A. F. & A. M. Regular meeting Second and Fourth Thursday evenings of each month.

Visiting brothers always welcome.

By order George Larkin, W. M., R. H. C. Bennett, Secretary.

SHILOH RELIEF CORPS NO. 28. Meetings held the 2nd and 4th Thursday of each month at 2:30 P. M. in the I. O. O. F. Hall.

Minnie B. Byers, Pres. Emma L. Snow, Sec.

Notice to Contractors

Notice is hereby given that the County Court of Yamhill County, Oregon, will receive sealed bids at the office of the County Clerk of said County until Saturday, July 21st, 1912, at 10:00 o'clock a. m., for grading and constructing a wagon road known as the Fox Hill Road and situated about three miles northeast of Newberg, Oregon.

Contractors to furnish all labor, implements, and material and construct said road according to plans and specifications upon file in the office of the County Clerk. Bidders will be required to furnish the usual contractor's bond. Certified check equal to 5 per cent of amount of bid must accompany each bid. The Court reserves the right to reject any or all bids.

J. R. Dodson, County Judge. W. M. Gunning, Commissioner. W. E. Allen, Commissioner.

"New Post Toasties"

From House to House the Good News Spreads

Many housewives have found a happy solution of the breakfast problem in New Post Toasties.

These new corn flakes are distinctive in that they bear a self-developed flavor all their own—the delicate, fascinating flavor of choice, white Indian corn. Unlike other flakes, they do not depend on cream and sugar to make them palatable.

Try a handful without cream and sugar—note the fine flavor and new form; also the tiny "bubbles" on each flake. These bubbles are a distinguishing characteristic and are produced by the quick, intense heat of the new process of making, which also brings out the wonderful flavor.

Although the New Post Toasties are a great improvement in flavor and form, they cost no more than ordinary flakes. Have a package delivered for tomorrow's breakfast.

New Post Toasties

—sold by Grocers everywhere.

WANTED AND FOR SALE

Cummins pays cash for poultry and eggs. 28tf

Have that plow sharpened at McCoy Bros.' garage for 25c.

Get your berry crates and hallocks of Spaulding Logging Co. 32tf

Screens for doors and windows at Spaulding Logging Co. 28tf

For Sale—A good second-hand auto at a bargain. Inquire at Graphic office. 1t

For Sale—A 21-jewel Hamilton watch at a bargain by Kienle & Sons. 1t

For Sale Cheap—1 A No. 1 2nd hand Ford Engine. J. B. Manegre, St. Paul, Ore. 1t

The highest market price paid for dried prunes by H. S. Gile & Co. 1t

Money furnished promptly all ways on real estate at 7 and 8 per cent. Atty. B. A. Kliks, McMinnville.
