Electricity

in your home is not a luxury. It is as much a necessity as cordwood, victuals and water. You are compelled to have light. Why not have the best? If you are using coal oil you are getting an inferior illuminant, burning up the life giving element in the air of your home, putting unnecessary work on the housewife, clearing smoky, sooty, smelly lamps, with the imminent prospect of a dangerous and expensive explosion that may cost a life, the loss of your home, or both.

Do you prefer this to perfect safety?

If your house is not wired we have an easy plan to offer you that will give you this modern convenience and you will not miss the money. We will extend your payments for house wiring over a period of 6, 9, or 12 months to suit your convenience. Electricity can be used in your home for many purposes that will save time, work and money. Phone us for an estimate. We will tell you to a cent what it will cost to wire your house complete. **For the month of August we will give a special discount of 10 per cent on all house wiring jobs along our established lines.**

Do you know What Causes Cataract?

FIRST OF ALL. Only neglect on your part to take care of your eyes.

SECOND. By straining your eyes reading and studying when they need help.

THIRD. By using the cheap reading glasses fitted by some incompetent person.

Do you know that nine out of ten people who come to me with cataracts have no one to blame but themselves? For only a few dollars spent from time to time in keeping their eyes in proper shape their eyes would have been good as long as they lived.
