Dr. Wall, of Chicago University, said:

"The Day of the Perfect Eye Has Passed."

The eye is not strong enough, without help, to stand the close studying required today.

99 out of 100 students who break down, in school or soon after graduating, do so simply because in school they forced their eyes to do overwork, thus robbing the nervous system of proper force.

We use "no drops", in testing your eyes, thus doing away with any bad after effect.

School will soon start. Don't put it off. Now is the time, before the eyes are overstrained.

Come at once. TO-DAY!
