MAXWELL OWNERS AWARD-ED LIBERTY BONDS

In the recent contest staged by the Maxwell Motor Company in a nationwide gasoline economy test, over forty Maxwell owners on the Coast were awarded Liberty bonds ranging from \$50 to \$200 as a reward for their efforts in establishing some new high marks in gasoline economy.

In San Bernardino several Maxwell owners received \$200 Liberty bonds, one owner making 49.5 miles to a single gallon of gasoline, together with twelve other entrants who made a total average of 39.7 miles to the gallon. The highest mileage recorded was made in Atlanta, Georgia, where one owner made 51.9 miles. Out of 2,000 competitors the grand average was 22.7 miles to the gallon and is considered remarkable in view of the fact that no special adjustments were permissible and each owner was compelled to drive his own car. Numerous contests of a like nature will be arranged from time to time and many owners are seeking information concerning exact dates of the contests, being anxious to better their former high marks.
