Little grains of dandruff mean good-by to Hair

Dandruff literally smother the life out of the hair roots and eventually brings baldness. Wildroot is guaranteed to clean up dandruff and remove it—but it does more; it cleanses, softens and loosens the scalp and stimulates the hair to normal, healthy growth.

LAND OF KOSSUTH

Mixed Races Make Up Population of Hungary.

Country Long Under German and Austrian Domination Until Magyar Secured Political Emancipation—Has Immense Mineral Riches.

Hungary has a population of 20,000,000. The area of Hungary is about equal to that of the state of New Mexico.

Hungary is unusually rich in its mineral deposits. Its mines contain almost inexhaustible quantities of gold, silver, lead, copper, iron, coal and rock salt.

Hungary, like Austria, is inhabited by several distinct races, but since the ninth century, when the Magyars invaded the region from Asia and conquered it, they have controlled the government.

Self-government through parliament in Hungary is of ancient origin, being founded upon a charter called the Golden Bull, which dates back to 1222, and is thus almost contemporary with the Magna Charta of England.

Budapest, the capital city of Hungary, consists of the sister towns of Buda and Pest. Lying on either side of the Danube, just at that point where it definitely sets south, Pest spreads itself out over the flat sandy plain on the left bank, while Buda occupies a series of small and steep hills on the right bank.

Empress Marie Theresa Germanized Hungary as completely as she Germanized all her alienated Austrian provinces, and German furnished as the official, bureaucratic, scientific and society medium in Hungary until the Magyars broke loose from Austrian thralldom and secured their political emancipation. Then German went to the wall, and today there are millions in Hungary wholly ignorant of the German language.

The great national hero of Hungary was Louis Kossuth, whose memory is revered by Hungarians as that of Washington is revered by the people of the United States. Kossuth visited America in 1851, and it is a matter of history that no foreigner save Lafayette ever received at the hands of the American people such marks of esteem as were bestowed on the Hungarian exile. After the failure of the Hungarian revolution, of which he was the leader, in 1849, Kossuth sought refuge in Turkey, Austria and Russia demanded his extradition, but the Porte, resisting all threats, declined to give him up, in which attitude Turkey was supported by England and France. At length the intervention of England and the United States secured his liberation, and at the beginning of September, 1851, he was permitted to avail himself of the invitation of the United States to come to America as the guest of the nation. In New York, where he landed, he was enthusiastically received. He attended meetings and received deputations in Philadelphia, Baltimore, Washington, Boston and numerous other places. At the national capital a great banquet was given in his honor by the members of congress.

Champion for the Whale.
Under the new law the only game that can be shot from an airplane is a whale. Also it is still permissible to bombard whales from bux wagons or motor launches. The whale has few champions among the game lawbreakers, says the Los Angeles Times. Any one stumbling on the fresh spoor of a whale is permitted to plug the animal on sight with whatever artillery he may have on hand. Why the whale should be thus marked for slaughter is not explained. Left to itself the whale is a perfectly harmless beast, having no grudge against any man. They will not even bite a loan shark unless provoked. There is no reason why they should be left at the mercy of every pey shooting aviator. That was no way for the legislators to celebrate the week set aside for being kind to dumb animals.

Germany's Big Mistake.
The distinguished Danish veterinarian, Dr. M. Hindede, has made the interesting discovery that Germany owes her downfall to the pig. In 1914 she had over 25,000,000 pigs to feed. For the first five months of the war slaughtering was discouraged, at the cost of enormous reserves of foodstuffs. Early in 1915 this policy was reversed, and by April the number of pigs had been reduced by 35 per cent. Then a reaction in favor of pigs set in, and their numbers were kept at about 70 per cent of the pre-war figure. Not till late in 1917 and early in 1918 was the fatality of this mistake realized, and then it was too late. Doctor Hindede argues that Denmark avoided starvation by killing her pigs early.

Tip From Little Brother.
A youngster who heard an older sister say she would like to "shake" a boy who was rather attentive decided that he had solved the problem for her. He had a little girl playmate, who, when she tires of him, runs home.
After receiving such treatment the other day, he entered the house and said: "Mother, I know how sister can shake John. Mary knows how to do it and she'll tell her."
"How does Mary do it?" mother asked.
"Oh, she just runs away. That's how you can shake anybody."—Wee-wee (Mass.) Evening Post.

FIRST CALL WAS FOR SOAP

Nothing German at Coblenz Would Not Do for Them Artists—Pepper Soap Used.

German supplies were getting rather short when the American army of occupation moved across the Rhine at Coblenz. The pronunciation was making a tough black bread which was nothing more than a bran mash, wearing paper clothes, and going virtually unwashed, as they had no soap.

There is almost nothing the Germans won't do for a piece of American soap. The washwomen will darn impossible holes in the doughboy's socks, mend his trousers, scrub his leggings, and would stand guard in his place if assured they will be rewarded with a portion of this delicacy. Soap takes the preference over cigarettes, chocolates or chewing gum.

The Germans have an imitation soap they provide for the populace. It looks like soap and makes a rich-appearing lather, but it isn't soap. It doesn't do the work. You might as well try to shave with the foam from their bad-tasting beer as that soap. Having no oils or fats in it, it is plain camouflage.

Another thing the Germans are shy on is pepper. A person who has always had pepper might give it little thought and it probably would be the last thing included in an "emergency" but you'll begin to think that it is the staff of life.

Soap and pepper are to the Germans what pie and ice cream and going home are to the American doughboys.—The Spiker of April, published in France by the United States Army Railway Engineers.

MARY HAD NOT FORGOTTEN

Movie Actress Tells Why She Long Has Had Grudge Against Robert Hilliard.

Robert Hilliard, actor, and best-dressed man in New York theatrical circles, was introduced to Mary Pickford recently. As they shook hands he smiled and said:
"My dear Miss Pickford, I have wanted to meet you for a long time. This is a pleasure, I assure you."
"Thank you, Mr. Hilliard," replied the movie actress, "but I must say your memory for faces isn't very good."
"Why?" he asked.

"Some twenty years ago, when you were playing in 'The Littlest Girl' in Toronto, you needed a child to be the girl. My mother offered my services. I was little Gladys Smith then. You looked me over and told me to go home and wash my hands."
"No, no!" replied the horrified Hilliard. "I couldn't have said that."
"But you did," persisted Miss Pickford; "but I told you my hands weren't dirty—they were chapped. You finally gave me the job, but I took a dislike to you just the same."
"You did? Why?"
"Because," concluded Miss Pickford, "you made me go home and wash my hands, anyway, and I detested soap and water in those days."
"Well, I declare!" said Mr. Hilliard, as he arranged his boutonniere.—Rehebeboth Herald.

Rescue Cape.
Less thrilling than being rescued and carried down on a swaying ladder, but much more practical, is a new rescue cage. When the fire ladder is thrown against a burning building it carries with it a wire cable attached to a steel cage. Like an elevator without a shaft the cage hangs from its pulley at the top of the ladder, within easy reach of the windows. It is lowered by turning the cable drum on the fire truck below, and will carry four passengers safely.—Popular Mechanics Magazine.

Bright Rupert.
The lesson was on the rabbit.
"The rabbit has long ears, fur on its body, and a tail, nothing to speak of, though," the master informed the class.
The next day he wanted to see what they knew about it.
"Now, then, Rupert," he barked to a particularly bright youth, "tell me something about the rabbit."
"The rabbit has a tail," said Rupert, eyeing his silent fellow triumphantly, "but it doesn't talk about it."
Just so.

She was teaching the word "element" to a sixth grade. She had told them its meaning—the substances of which a thing is composed—and they had illustrated her definition by saying that the elements of the earth were water and soil.
"Then she asked them to write sentences containing the word. And this is the one Henry wrote: 'Water is one of the elements of life.'"
—New York Herald Tribune.

The First National Bank of Newberg

In the state of Oregon, at the close of business on June 30, 1919.

RESOURCES	
Loans and discounts, including rediscounts	\$175,034.37
Overdrafts unsecured	15.37
