

## Let Us Re-Mile Your Worn Tires And Make Them Oversize

Worn tire casings are usually worth 75 per cent of the tires' original price. For a fraction of the original cost any casing can be made practically as good as new, with a Miller Ad-On-A-Tire.

Bring your old tires and we will re-mile them with the famous tread that is Geared-to-the-Road.

The Miller Ad-On-A-Tire is built of tough, buoyant rubber. It has several layers of fabric—breaker-strip, tread and side walls, which completely cover the tire and clinch under the rim.

Our process makes the Miller Ad-On-A-Tire an integral part of the tire. It cannot come loose or creep.

Fits all tires, regardless of make,

### NOTES FROM PACIFIC COLLEGE CRESCENT

#### BASKET BALL GETS AN EARLY START

The basket ball season has begun and there have been several practices with a good showing each night. The "Prep" team has been out for every practice, resplendent in their new orange and black jerseys, but the only college men to appear so far have been Freshmen.

The Freshmen class of this year has considerable raw material. Among its members are Conway and Edwards, high school stars of various degrees of excellence, the Cook brothers of P. A., Zenas Persh and Harold Rinhard, of Greenleaf Academy, and Chisung Ph, a Honolulu star. It is expected that a team can be drawn from this group which will successfully defend Freshman pride in the interclass tournament to begin November 17.

The upper class basket ball men are few but mighty. Beals has had considerable experience on the second team and Paul Elliott, another Sophomore, has seen one year on the squad. Colcord, a Junior, has played six years of college basket ball, earned five letters and been selected on two "all-league" teams. Howard Elliott, the Senior man, has played on the Varsity two years and is considered one of the fastest and most accurate forwards among the colleges of the state. With this array of material Pacific's prospects for a winning team this season are bright.

#### TREFIAN NOTES

The second meeting of the Trefian Literary Society this fall, met in the Canyon Hall parlors on October 29th. Only the old members were present. After the installation of the new officers for the semester the meeting was open for general discussion as to ways and means of increasing interest in the society. Several plans were presented and a committee was finally appointed by the President to consider the question and submit a definite plan at a called meeting the following Wednesday.

The Trefian Literary Society started a few years ago with a

great deal of enthusiasm. It was agreed that the society was a great benefit to the college and a help to the girls. But, for several years the interest has been gradually decreasing until now many of the girls regard their membership as merely a burden on themselves. However, the new girls seem to be quite anxious to become members and it is hoped that added enthusiasm may result in a better society this year.

#### GIRLS' BASKET BALL

The Girls' Athletic Association met in the gym Tuesday evening after school and had their first tryout for basket ball. The girls are coached by a faculty member, Miss Wright, who took that part in the girls' athletics in Fairmount Academy, Fairmount, Indiana.

The boys' gym is to be used by the girls on Tuesday evenings for a few weeks and after that on Friday evenings.

There is excellent material for a good girls' team this year. Several of the girls are trying for the team who have been of the Pacific College team in former years. All the girls are very enthusiastic and there are splendid prospects in view.

Mr. J. W. Harvey Theobald, of London, England, spoke briefly before the class in Political Economy, Friday, on present industrial conditions in England. He said that the present great problem is that of the floating population of unskilled laborers. He expressed the belief that the present tendency of great industries was toward the co-partnership plan.

Rev. Carl Miller, of Springbrook, spoke Tuesday on the purpose of college students while in college. His remarks were impromptu, but very much to the point and thoroughly enjoyed by the student body.

Ellis Beals, a former student of Pacific College, who has been in France in the Friends Re-construction Unit, is back in school here. He will be heartily welcomed to study again under the colors of Pacific College.

Isle of Utiha Seems to Have Been Appropriately Designated "Lazy Man's Paradise."

Worth while seems life on the Isle of Utiha. Its place on the map would be hard to find, but it's worth discovering. Away off in the Southern sea, never heard from before and but little known, it comes to the knowledge of the Pan-American union that here have Americans found a home that others enjoy when they are dead. "We call it a lazy man's paradise," says the message from this land of delight, "not that the inhabitants are necessarily indolent, but simply because a large amount of labor is superfluous. Nature provides for nearly all our wants here as in most tropical countries. Farming is our principal occupation, yet there is not a plow on the island. Frost is unknown and extreme heat is never experienced. Ninety degrees in the shade would be an unusually high temperature. Our grade schools are of high standard, attendance being compulsory ten months in the year. American text books exclusively are used and social life could not be distinguished from that of the United States. Utiha is one of the Bay Islands, a string of six verdant keys in the bay of Honduras, an arm of the Caribbean sea, which was discovered by Columbus in 1502. They were then thickly populated by native Indians, who became slaves. The islands now are inhabited wholly by English-speaking people. The first family to settle there was that of Joseph Cooper, who found upon landing two lonely American young men, Samuel and Joshua Warren by name. A few years later came Mark G. Morgan, an American from Philadelphia. The descendants of these men now inhabit the islands. These pioneers were the Puritan stock, all seafarers imbued with the spirit of adventure, who though filled with wanderlust, found conditions on the island so ideal that they planted their stakes deep and said: "Alabama—here we rest." Of the principal exports, 110,000,000 coconuts are sent yearly to the United States. There are fourteen Methodist churches and six of the Seventh Day Adventists on the islands with more than 700 members and 300 children to their Sunday schools.—Ohio State Journal.
