## Energy From Common Powder.

Common black sporting powder is a source of momentary energy in some railway machine shops and is used for such purposes as loosening nuts and bolts, breaking up scrap iron and steel, forcing a rusted locomotive piston, and breaking metal cooled in a furnace. It is employed in steel guns 5 to 12 inches long and of proportionate diameter. The powder is held by a plunger without wad, and it is fired with the mouth of the gun about an inch from the work. An ounce charge is the average required for an ordinary locomotive nut or bolt.

## HUN FEELING IS UNCHANGED

German Clergy Still Talk of Day of Triumph in Store for the Fatherland.

The Glasgow Herald prints from a special correspondent some interesting information regarding the views of the German churches on the peace treaty.

What, asked the writer, in the guidance offered by the churches at this crisis in the affairs of the nation? We are in no doubt as to its character. In the Kreuz Zeitung recently Doctor Conrad, one of the ex-keiser's chaplains, wrote a homily on the attitude which religious men should adopt toward the peace which is being "dictated to Germany."

He wrote: "Possess your souls and do not despair. God in his good time will turn our sorrows into joy. Is there a German man with the fear of God in his heart who does not realize that this humiliation is but for a time and that before long the drama of the new fashioning of the earth will begin again? When that time comes Germany will rise supreme from the fire of her trials. It was in 1870-71 that began it; that was the prelude; we are now at the close of the second act. The coming third act will give us our final place and God will be with us. All I can counsel is this: Be patient. Our hour is coming. Certainly, sign the peace, for this will give us the breathing time we require and also time for reflection."

In the Kirchen Anzeiger there is a sermon by Stadt-Pfarrer Brockhaus, headed "What Is Now Our Duty?" The preacher after denouncing "the cruel and incredible terms" of the treaty, goes on: "There is a revenge which is holy and ennobles all those who nourish it in their hearts. We cannot sit down under the awful humiliation. But we must wait God's time. We must wait! for him to dictate our course. He who led the German people from weakness to strength, he who once blessed our efforts in our world mission is punishing us now for our sin, but he has great work for us yet and he will see that we yet stand on the necks of our adversaries."

All through these sermons dealing with the peace and the present situation generally the German clergy continuously exhort their flocks to be patient, to be steadfast during the days of tribulation. In a perfunctory sort of way they acknowledge that tribulation has come upon the people because of their sins and shortcomings, but the sins and shortcomings have nothing to do with the guilt of causing the war or with the innumerable crimes committed by Germany in the four years of its duration.

Amethyst Ones Highly Prized. On account of its fine color, play of light and capacity for polish, the amethyst once held a high rank as a decorative stone, perhaps next to the sapphire, but by reason of the discovery of large quantities in Brazil its popularity declined in Europe and consequently its commercial value declined in corresponding ratio.

Of all the quartz varieties the amethyst has been the most highly valued, and the most frequently used for the art of engraving. The deep shades are less brilliant and for this reason the artists of antiquity preferred the lighter shades. Consequently the ancient intagli occur almost invariably on the light-colored specimens so that engravings on the dark shade may be suspected as modern.

But some of the specimens of Egyptian, Etruscan and Roman engraving on amethysts are extant, among which may be mentioned the gem bearing the likeness of the Emperor Trajan, captured by Napoleon when he conquered Prussia in 1806; a bust of Antonia, daughter of Mark Antony; the head of a Syrian king, which is or was in the Pulsky collection, and a superb engraving of Dioscorides, now in the national library in Paris.

Natural Enemies of Mosquito. Dr. L. O. Howard, chief of the United States bureau of entomology, writing on his favorite theme, the mosquito, in a recent bulletin reviews the subject of the natural enemies of this insect. Among fish, he mentions first the common goldfish and silverfish, which destroy mosquito larvae and should be put in artificial ponds. Top-minnows are great feeders on mosquito larvae, and certain species introduced from Texas and Hawaii have proved their value, while a small top-minnow of the genus Girardinus, known in Barbados as "millions," has been used successfully in other West Indian islands. Many predatory aquatic insects feed on mosquito larvae. Certain birds prey upon the adults, and bats also eat them. Many plants are popularly believed to keep away mosquitoes, among them being several species of eucalyptus, the castor oil plant, the chnaberry tree, etc. Scientific observations have not confirmed the popular idea on this subject.—Scientific American.

Swift Handling of Troops. The Canadian national railways recently broke a speed record in the transportation of troops from one ship. The troopship Olympic docked at six o'clock in the evening, with 4,900 returned soldiers aboard. Eleven special trains were made up to take the soldiers to demobilization points inland. The first of these specials got under way at 7:45 o'clock. The other trains followed at average intervals of 18 minutes. Within three hours all the soldiers were on their way for the interior. The troops averaged 445 men to a train and it took 150 cars to handle them.

## Notice of Final Settlement

Notice is hereby given that Helen Calbreath, administratrix of the estate of Mianda Smith, deceased, has filed her final account in the County Court of Yamhill County, Oregon, and said Court has appointed the 15th day of November, 1919, at 10 o'clock a. m. at the County Court room at McMinnville, Yamhill County, Oregon, as the time and place for the final hearing of said final account and settlement of said estate.

All persons interested in said estate are hereby notified and required to be and appear at said time and place appointed for the hearing of said final account and then and there show cause, if any exists why said final account should not be allowed and approved, said estate finally settled and administratrix discharged and her bondsman exonerated.

Dated this 11th day of October, A. D. 1919.

Helen Calbreath,  
Administratrix of said estate.  
J. U. Smith,  
Attorney for said estate.  
First issue October 16, 1919.  
Last issue November 14, 1919.

## The Job of Insulation

Ordinary insulation nearly always gives way before the plates do, and the battery has to be re-insulated.

Willard's threaded Rubber Insulation protects the plates from the very beginning of the battery's life, and protects the car owner against the need of having the battery re-insulated.

Drop in, and we'll tell you about some of the long-life records that Threaded Rubber Insulation has made possible.
