Dundee M. E. Church

Sunday school at 10 a. m.

Preaching at 11 a. m.
Evening service at 7:30 p. m.

Rev. J. H. Gillespie, Pastor.

Surveyors Use Airplanes.

Four airplanes are being used to survey the extensive forests of Labrador to determine the value of the wood pulp represented by the growing trees. Aerial photographs will be taken of many parts of the peninsula for use in compiling statistics. The surveying party, which left the United States recently for Nova Scotia, is composed of 40 persons and is headed by a man who served two years as a captain in the British air forces.—Popular Mechanics Magazine.

Thirst and Starvation!

The thing most likely to bring your battery to an untimely end is THIRST. The prevention is so easy no motorman should neglect it.

Look at your battery YOURSELF, once in two weeks, put distilled water in to fill one half inch above the plates.

The other great enemy of battery life is STARVATION, and is less understood by the average motorist.

To keep in good health, your battery must be supplied, by the generator, with electricity at all times, for lights, starter and ignition.

YOU CAN'T TAKE OUT MORE THAN YOU PUT IN OR YOU'LL HAVE A STARVED BATTERY.

Advise with us, it will cost you nothing for testing and distilled water. We make repairs promptly. A service battery for you while yours is being charged.

NEW WILLARDS ALWAYS READY

Flower Gardens of Holland.

It was only after the fall of Constantinople in 1453 that Holland became such a gay land of flowers as it now is. Many Dutchmen went to the East during the years of the great crusades, and those of them who loved beautiful things brought seeds with them. When these were planted in the rich soil of Holland such wondrous flowers appeared as had never before been seen in that country. The people became wildly enthusiastic over the new colors and scents and foliage brought to them from the East, and in Holland there sprang up a great love for gardening.

Orchid Hard to Secure.

Nearly all the orchids found in Burma can be grown with a little care and attention in private gardens. There is one exception, a sweet-smelling species called tazin by the Burmese, and which is usually brought to market in Christmas week in Rangoon. It only seems to flower in the most malarious and least frequented localities, and at a time of the year which is the tigers' mating season, and when they are most dangerous to human beings. It is in great demand by Burmese and sells for its weight in silver.

What Mother Wanted.

I heard a knock at my door the other morning and on answering it found my neighbor's small son. "Mother wants to borrow your lemon-squeezer," I at once knew he wanted my lemon-squeezer, but as he always finds some way to express himself I did not offer to help him.

"When he started and with suggestions of his hands, said: 'She wants your lemon-squeezer. I know now—my lemon-squeezer.'—Exchange.

In the County Court of Yamhill County, State of Oregon.

In the Matter of the Guardianship of the Estate of) to James Lloyd Sawyer and) Show Paulmer Burtress Sawyer,) Cause minors)

On this, the 7th day of January, 1920, come L. N. Sawyer and S. L. Parrett and present their verified petition in due form, showing that James Lloyd Sawyer and Paulmer Burtress Sawyer are minors and reside with their father at Monument in the state of Kansas; and that they own in fee real property situated in Yamhill County, State of Oregon, that needs the care and attention of a guardian, and that their said property is of the probable value of \$1,000.00, and that they have no guardian of their estate in the state of Oregon; and praying this Court to appoint the petitioner, S. L. Parrett, a resident of this county and state, guardian of the said estate of said minors located in this county and state; and it appearing to the Court proper so to do: It is, therefore, ordered by this Court that said petition for the appointment of said guardian for said estate of said minors be heard by this Court at the usual place of holding this Court in the court house in McMinnville, in Yamhill County, Oregon, on Saturday, the 14th day of February, 1920, at eleven o'clock A. M. of said day, and that all persons interested in this proceeding or in said minors or in their said estate are hereby required to be and appear at the time and place appointed for hearing said petition and then and there show cause, if any they have, why said S. L. Parrett should not be appointed guardian of the said estate of said minors situated in this county and state in accordance with the prayer of said petition, and, in order to give due notice of said hearing to all persons interested in this matter, it is ordered that a copy of this order be published once a week for four successive weeks prior to the time for said hearing in the Newberg Graphic, a newspaper of general circulation, published in this county.

C. F. Daniels,
County Judge.

Helium Gas Cheapened.

Up to 1915 the total output of helium gas in all the world had probably been less than 100 cubic feet, and it was worth about \$1,700 a cubic foot. But just before the armistice was signed a shipment of 150,000 cubic feet of helium gas was sent to Europe, and it costs less than 10 cents a cubic foot.

Helium gas was first discovered on the sun, by spectroscopy. It is the best gas for use in balloons, because it is not inflammable. It is now extracted from the natural gas of Texas and Kansas.

The method is delicate and complex, but is based upon the fact that the principal constituents of natural gas liquefy when cooled to about minus 329 degrees F., but that helium remains a gas at that temperature, and hence is easily separated.

SUMMONS

In the Circuit Court for the State of Oregon, for the County of Yamhill. Lulu B. Hollingsworth, Plaintiff, vs. Elmer J. Hollingsworth, Defendant.

To Elmer J. Hollingsworth, the defendant above named:

In the name of the state of Oregon, you are hereby notified and required to appear and answer the complaint filed against you in the above entitled Court and cause, on or before six weeks from the date of the first publication of this summons, which said date of first publication of this summons is the 8th day of January, 1920, and if you fail to appear and answer said complaint, for want of said appearance and answer the plaintiff will apply to the Court for the relief demanded in her said complaint, on file herein, to-wit: For a decree of this Court forever dissolving the marriage contract now existing between said plaintiff and defendant, and awarding to the plaintiff the care and custody of the minor children of the said plaintiff and defendant, and requiring defendant to pay to this defendant the sum of Fifty Dollars, attorney fees, Twenty-five Dollars suit and expense money and Forty Dollars per month for the nurture and education of said minor children and Ten Dollars per month to plaintiff for permanent alimony, and for a decree awarding to plaintiff an undivided one-third of defendant's half interest in Lots 11, 12, 13, 14 and 15, in Block C, First Addition to the City of Falls City, Polk County, Oregon.

This summons is served upon by publication thereof in the Newberg Graphic, once each week, for six consecutive weeks, by order of Honorable H. H. Belt, Judge of the Circuit Court of the State of Oregon, for Yamhill County, which said order is dated January 5th, 1920.

Clarence Butt,
Attorney for Plaintiff.
Date of First Issue January 8.
Date of Last Issue February 19.

Executor's Notice

Notice is hereby given that the undersigned, D. D. Coulson, has been duly appointed executor of the last will and testament of Augusta Lehmann, deceased, by the County Court of Yamhill County, Oregon, and has qualified.

Now, therefore, all persons having claims against the estate of Augusta Lehmann, deceased, are hereby notified and required to present the same with the proper vouchers to the undersigned executor, at his office in the City of Newberg, Yamhill County, Oregon, within six months from the date of this notice.

Dated this 15th day of January, 1920.

D. D. Coulson,
Executor of last will and testament of Augusta Lehmann, deceased.
Clarence Butt,
Attorney for Estate.
First Issue January 15.
Last Issue February 12.

Bean Power Sprayers

Have now reached such tremendous national sale that the manufacturers are the first to carry full page space in the Saturday Evening Post and Country Gentleman. Read this advertisement which will appear in these publications, issue of January 10th, 1920. You cannot afford to use any other than the Bean Power Sprayer.

John Bean, Inventor

He Showed the Way in 1883 to Save Millions of Fruit Trees from Pests

IN 1883, John Bean, inventor of the double-acting force pump for well purposes, owned a fruit orchard near San Jose, California. His trees were suffering from San Jose Scale, imported from China, unwittingly by James Lick of Lick Observatory fame, and the primitive spray pumps of the time were inadequate.

He saw the need for more efficient spraying, and his inventive genius soon had worked out the first high pressure spray pump with air chamber.

Success was instantaneous. Requests from friends soon induced him to manufacture the machine.

The result was that millions of California fruit trees were quickly saved from pests that had blighted many yields.

The third generation of the family are the active manufacturers of "BEAN" Power Sprayers today. And the present machine—a family pride—still retains John Bean's basic principles.

TODAY, wherever men have ten acres of fruit or more, you will almost invariably find power sprayers of which the famous "BEAN" was the forerunner and remains the leader.

San Jose Scale is now practically unknown in California where more "BEAN" Sprayers are used than all other makes combined.

Many of the country's greatest orchards are now equipped with "BEAN" Power Sprayers exclusively. For the "BEAN," the pioneer in 1883, is the world's leading sprayer now.

The 36-Year Development

The 1920 Bean Power Sprayer Different from Others in Money Saving Ways

THE modern "BEAN" is different from all other power sprayers in some very vital ways:

The "BEAN" includes a patented pressure regulator that results in great economy—Threadless Ball Valves—Porcelain-lined Cylinders—doubly strengthened bearings and other wearing parts.

You will want these features and others found in "BEAN" sprayers if you are to spray at the lowest cost and with best results.

The "BEAN" Re-filler alone often saves one-half the time usually spent in spraying an entire orchard.

When occasion requires "BEAN" plunger packing is replaced in twenty minutes by an inexperienced man. No need for a mechanic and the pay for several hours of his time.

All six threadless ball valves are removed in two minutes with engine running and 300 lbs. pressure on the pump. Men who have spent half a day in removing threaded valves have doubted that statement until they have seen "BEAN" valves come out.

The valves are washed out while open, through an underneath suction—an other immensely convenient "BEAN" feature.

The porcelain-lined cylinders are without stuffing boxes. They eliminate greasy troubles and last a lifetime.

These advantages are the result of 36 years specialization in the building of improved power sprayers based on an ingenious, original design.

If you are going to buy a sprayer and want the best, there is little choice today.
