You have admired the smooth running engines in great industrial plants.

Care makes them run like that. All machinery is in the same class—your car, for instance.

Smooth operation and power depend on correct adjustment of its mechanism.

The ideal time to have this work done is in winter, when you can best spare your car for a brief period and when the shop can give you a pain-taking job.

We are able to place at your disposal now—

1st. Mechanical skill.

2nd. Material and

3rd. Time

For a thorough tuning up.

Make your arrangements now and avoid waiting for your car when the spring season opens.
